# Control measures

29,4 thousand tests performed for ASF

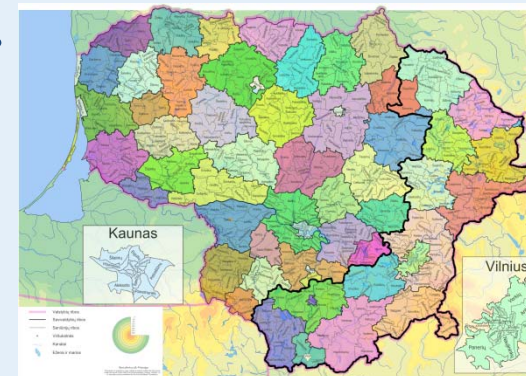

16,5 thousand tests performed for ASF

In 2014 223 wild boar have been found dead  
(56 tested positive for ASF)

# Actions taken (I)

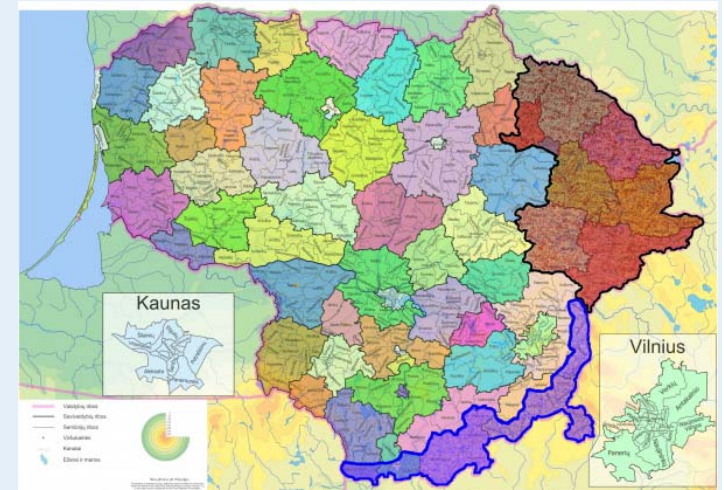

- Feeding of wild boars prohibited by the Decision of CVO from 10 of October 2014, only attractive feeding for hunting purposes;
- Hunt with beaters prohibited in regions bordering with Belarus and in Part III;
- In other regions hunt is organized once per month in hunting unit;
- Hunting rules amended accordingly.

## Actions taken (II)

- All pigs in back yards in Part III are slaughtered after clinical examination and sampling, pig meat have been used for own consumption after ASF test;
- In total 4642 pigs have been slaughtered in holdings with less than 100 pigs.

Only 6 pig establishments (approx. 30 thousand of pigs kept) with high biosecurity are located in Part III.

# Actions taken (III)

- Strengthened control of personal luggage;
- Random sampling from confiscated products of animal origin;
- Out of 20 samples 3 have been found positive for ASF genome.
