

## Standard requirements for the submission of programme for eradication, control and monitoring PROGRAMME for ERADICATION : ANNEX I

Member States seeking a financial contribution from the Union for national programmes for the eradication, control and monitoring of animal diseases and zoonosis listed below, shall submit applications containing at least the information set out in this form.

Bovine brucellosis, bovine tuberculosis, ovine and caprine brucellosis (*B. melitensis*), bluetongue in endemic or high risk areas, african swine fever, swine vesicular disease, classical swine fever, rabies.

The central data base keeps all submissions. However only the information in the last submission is shown when viewing and used when processing the data.

If encountering difficulties, please contact [SANCO-BO@ec.europa.eu](mailto:SANCO-BO@ec.europa.eu), describe the issue and mention the version of this document: 2014 1.09

Instructions to complete the form: Your current version of Acrobat is: 10.104

- 1) Be informed that you need to have at least the Adobe Reader version 8.1.3 or higher to fill and submit this form.
- 2) To verify your data entry while filling your form, you can use the "verify form" button at the top of each page.
- 3) When you have finished filling the form, verify that your internet connection is active and then click on the submit notification button below. If the form is properly filled, the notification will be submitted to the server and a Submission number will appear in the corresponding field.
- 4) **IMPORTANT: Once you have received the Submission number, save the form on your computer.**
- 5) If the form is not properly filled, an alert box will appear indicating the number of incorrect fields. Please check your form again and try to re-submit it according to steps 3), 4) and 5). Should you still have any difficulties, please contact [SANCO-BO@ec.europa.eu](mailto:SANCO-BO@ec.europa.eu).
- 6) For simplification purposes you are invited to submit multi annual programmes
- 7) As mentioned during the Plenary Task Force of 28/2/2014, you are invited to submit your programmes in English.

**IMPORTANT: AFTER SUBMITTING THE FORM DO NOT FORGET TO SAVE IT ON YOUR COMPUTER FOR YOUR RECORDS!**

Submission number

1409724628281-3665

# Standard requirements for the submission of programme for eradication, control and monitoring

## 1. Identification of the programme

Member state: SLOVENSKA REPUBLIKA

Disease African swine fever

Species: Domestic pigs and wild boar

This program is multi annual: no

Request of Union co-financing  
from beginning of:

2015

# Standard requirements for the submission of programme for eradication, control and monitoring

## 1.1 Contact

Name : Prof.Jozef Bireš, DVM DrSc.

Phone : 00421260257212

Fax : 00421260257242

Email : bires@svps.sk

## 2. Historical data on the epidemiological evolution of the disease

*Provide a concise description on the target population (species, number of herds and animals present and under the programme), the main measures (sampling and testing regimes, eradication measures applied, qualification of herds and animals, vaccination schemes) and the main results (incidents, prevalence, qualification of herds and animals). The information is given for distinct periods if the measures were substantially modified. The information is documented by relevant summary epidemiological tables (point 6), complemented by graphs or maps (to be attached).*

*(max. 32000 chars) :*

African swine fever was never detected on the area of Slovakia. However ASF was detected in neighboring countries (Poland, Ukraine) in wild boar population.  
In the year 2013 totally 1000 samples were serologically examined in wild boars, none of them was positive.  
In the year 2012 totally 2008 samples were serologically examined in wild boars, none of them was positive.

## 3. Description of the submitted programme

*Provide a concise description of the programme with its main objective(s) (monitoring, control, eradication, qualification of herds and/or regions, reducing prevalence and incidence), the main measures (sampling and testing regimes, eradication measures to be applied, qualification of herds and animals, vaccination schemes), the target animal population, the area(s) of implementation and the definition of a positive case.*

*(max. 32000 chars) :*

The programme will be carried out on the whole territory of the Slovak Republic defined as a risk areas (map of risk areas is in attachment).

When defining the risk area, the competent authority shall take into account:

## Standard requirements for the submission of programme for eradication, control and monitoring

1. the results of the epidemiological investigations carried out and the geographical distribution of the disease,

2. the feral pig population in the area,

3. the existence of major natural or artificial obstacles to movements of feral pigs.

At present a area with higher ASF risk in the Slovak Republic is an area covering the territory of districts bordering with districts in Ukraine and Poland.

Area with higher CSF risk includes:

The District Veterinary and Food Administrations of Trebišov (Trebišov district); Michalovce (Michalovce and Sobrance districts); Humenné (Humenné, Medzilaborce and Snina districts); Svidník (Svidník and Stropkov districts); Bardejov (Bardejov district); Stará Ľubovňa (Stará Ľubovňa district); Poprad (Poprad and Kežmarok districts); Liptovský Mikuláš (Liptovský Mikuláš district only); Dolný Kubín (Dolný Kubín, Tvrdošín and Námestovo districts) and Čadca (Čadca and Kysucké Nové Mesto districts).

Area with lower ASF risk is an area covering the territory of districts located outside the ASF high risk area.

The surveillance of ASF in domestic pigs will be performed in the year 2015 on the whole territory of the SR.

The surveillance of ASF in domestic pigs in the defined area with higher ASF risk:

- clinical surveillance in all pig holdings witch are mentioned in the Central Database of Animals
- monitoring through taking the samples directly in the holding: virological monitoring of all sick and death domestic pigs with ASF-clinical signs in all pig holdings witch are mentioned in the Central Database of Animals

The surveillance of ASF in domestic pigs in the defined area with lower ASF risk:

- clinical surveillance in all pig holdings witch are mentioned in the Central Database of Animals
- monitoring through taking the samples directly in the holding: virological monitoring of all sick and death domestic pigs with ASF-clinical signs in all pig holdings witch are mentioned in the Central Database of Animals

Monitoring in wild boars will be performed in the year 2015 on the whole territory of the SR.

- in the defined area with higher ASF risk to examine all hunted (including all sick animals) and perished wild boars virologically
  - in the defined area with lower ASF risk to examine all sick and perished wild boars virologically
- According Act No.274/2009 Coll. hunting season for hunting of wild boars (for all age category) is defined from 1st April to 31st March next year.

### 4. Measures of the submitted programme

#### 4.1 Summary of measures under the programme

Duration of the programme : 2015

##### **First year :**

- Control
- Testing
- Slaughter and animals tested positive
- Killing of animals tested positive

## Standard requirements for the submission of programme for eradication, control and monitoring

- Vaccination
- Treatment
- Disposal of products
- Eradication, control or monitoring

### 4.2 Organisation, supervision and role of all stakeholders involved in the programme

*Describe the authorities in charge of supervising and coordinating the departments responsible for implementing the programme and the different operators involved. Describe the responsibilities of all involved.*

*(max. 32000 chars) :*

**European legislation:**

Directive 2002/60/EC

Directive 82/894/EEC

CD 2014/178 EC

REGULATION (EC) No 853/2004 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

REGULATION (EC) No 854/2004 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

CD 2007/777 EC

CD 2007/275/EC

**National legislation:**

Act No. 39/2007 Coll.

Act No.274/2009 Coll.

## Standard requirements for the submission of programme for eradication, control and monitoring

### National ASF Contingency Plan

#### Plan of control of african swine fever in wild boar population in Slovakia

Central authority charged with supervising and coordinating the department responsible for implementing the programme is the State Veterinary and Food Administration of the Slovak Republic. Departments responsible for implementing the programme are district (40) veterinary and food administrations.

#### Ministry of Agriculture of the Slovak Republic

##### Section of forestry

##### State Veterinary and Food Administration of the Slovak Republic

##### Regional Veterinary and Food Administration of the Slovak Republic

##### District Veterinary and Food Administration

##### State Veterinary and Food Institute Zvolen

##### Regional Forestry Office

##### District Forestry Office

##### Slovak Hunter's Chamber

##### ASF - expert group

#### Ministry of Agriculture of the Slovak Republic

- the central state administration authority at ASF eradication
- approval of the National plan of ASF eradication
- confirms emergency measures on the proposal of the Chief Veterinary Officer

#### Section of forestry and woodworking

- preparation of legislative framework
- to reevaluate the conception of breeding and hunting of boar game with emphasis on ASF and requirements of agricultural animal production.

#### State Veterinary and Food Administration of the Slovak Republic

- proposal of the plan of disease eradication
- regionalization of the Slovak Republic from the viewpoint of ASF
- determination of the monitoring in the Slovak Republic
- evaluation of the monitoring in the Slovak Republic
- adoption of measures based on the disease situation in the Slovak Republic
- submission of reports to the European Commission
- proposes to the Minister of Agriculture of the Slovak Republic the budget for performance of the eradication plan

#### District Veterinary and Food Administration

- ordering of measures for users of hunting grounds
- discussion of measures with users
- methodical direction of users on sampling and sending of samples, storage of hunted wild boars and on their handling (manipulation)
- evaluation of boar game density
- evaluation of the monitoring and disease situation in the region
- payment of financial compensations and subsequent submission of them to the State Veterinary and Food Administration of SR for re-invoicing

## Standard requirements for the submission of programme for eradication, control and monitoring

### State Veterinary Institute Zvolen

- laboratory examination
- evaluation and processing of data from examinations for the Slovak Republic including data about age and category of wild boars
- expert service

### District Forestry Office

- planning of breeding and hunting of boar game in pursuance of instructions of the Ministry of Agriculture of the Slovak Republic
- classification of hunting grounds
- control of observance of NKS by users
- control of boar game density
- determination of correction measures at non-fulfilment of breeding and hunting plans
- control of issued permissions for individual hunting ( whole year-round )

### Slovak Hunter's Chamber

- educational activity based on member's meetings and magazine (Poľovníctvo a rybárstvo – Hunting and Fishing), broadcasting of Halali
- cooperation with state administration authorities

### Chamber of Veterinary Surgeon's of the Slovak Republic

- Monitoring of ASF in domestic pig holdings
- ASF-sampling for laboratory examination in domestic pigs

### ASF - expert group

The expert group shall perform the evaluation of the plan of ASF eradication in wild boar population twice a year. After performance of the evaluation of the disease situation development in the Slovak Republic, it shall submit to the Chief Veterinary Officer the proposal for the change of the plan of ASF eradication.

The subject of the evaluation shall be mainly:

- geographical spreading of the disease
- fulfilment of the monitoring and shooting
- occurrence of serologically positive samples, especially samples from young animals
- occurrence of serologically positive samples outside risk area
- age structure of hunted wild boars
- number of sick, suspect and perished boars
- density of wild boars
- transmission of ASF from wild boar population into pig holdings

Implementation of the control measures according to 2002/60/EC, particularly

- the epidemiological enquiry which is carried out on each feral pig, whether shot or found dead – usage of the uniform specimen of the application form for laboratory examination with indication of all data in compliance with the Directive, collation of data by the reference laboratory for ASF (the geographical area where the animal was found dead or shot, the date on which the animal was found dead or shot, the person who found or shot the animal, the age and sex of the pig, if shot: symptoms before shooting, if found dead: the state of the carcass, laboratory findings)
- the requirements to be complied with by hunters in order to avoid any spread of the disease
- the method of removal of feral pigs found dead or shot
- the information campaign to be enforced to increase hunters' awareness – organization of meetings

## Standard requirements for the submission of programme for eradication, control and monitoring

with users of hunting grounds at local level, information materials on ASF, publication in professional journals

☒ specific efforts made to determine the number and location of feral pig meta-populations in and around the infected area – on the basis of the close cooperation with hunting organizations at local level

Organisation of wild boar hunting :

a) hunting shall be organised in a manner preventing the spread of herds of wild boar into other areas; to use hunting of wild boars at areas for placing the baits according to the Decree of Ministry of Agriculture of SR No. 344/2009 Coll. implementing the Law on hunting;

b) to transport the hunted boars in a manner precluding spreading of the disease to the designated places where the boars can be disembowelled, to take samples for testing, to safely remove the disembowelled parts through a rendering plant (in summer dig in 1 meter deep), to disinfect the place and to ensure a transport in an easy to clean and disinfect means of transport;

c) it is prohibited to store wild boar in refrigerating boxes intended for game for export;

d) the users of hunting grounds shall notify once a month the district forestry office about the numbers of hunted and perished wild boars,

e) the District veterinarian shall, by means of measures, after agreement with the respective District forestry office, determine evenly in the period February – July, the minimum number of hunted wild boars to the individual users of hunting grounds according to the density of wild boar population, minimum 20 % from the real hunt in the last year

f) District forestry offices shall determine plan of breeding and hunting of wild boar , so that at the end of the hunting season the standardized basic herds are reached. District forestry offices shall adjust in detail the hunting conditions and the notification duty for users of hunting grounds according to the situation within their competence.

g) measures to reduce the density of boars by hunting, including over-fulfilment of the plan of breeding and hunting of wild boar, regardless age and sex,

h) measures that the shooting of wild boar at the place of occurrence of virologically positive wild boars (cadastral territory) be performed only by wait in the wings or tracing, with the use of hunting at areas for placing the baits during the whole year; common huntings in this cadastral territory are banned during 6 month since the last occurrence,

i) measures for safe store of wild boar in refrigerating box or at other place registered by the DVFA (outside direct of indirect contact with pig holdings) until the results of the laboratory test are available

Storage and manipulation with the hunted wild boar in skin prior to storing in a refrigerating box

- to place the cooled wild boar (in winter approximately 2 hours, in summer approximately 6 hours) into an impermeable plastic bag;

- to mark the boar with the mark (label) containing the following data (place and date of hunting, name of hunter, number of mark ) and to hang in a refrigerating box until test results are available;

the wild boar processed in this way may be stored in a refrigerating box along with other hunted game;

j) ensuring of an inspection and taking of samples for laboratory examination of all hunted and found perished wild boar for ASF (shall be carried out under the supervision of the trained persons). Based on result from the examination the official veterinarian shall decide on further manipulation with the boar game;

k) to ensure safe removal of perished animals in the nearest rendering plant, to ensure their transportation in the similar way as in case of hunted ones.

l) in inaccessible terrains or if it is not possible to safely store the hunted boar game until the results of the laboratory test are available as well as the perished boar game can be safely removed in the presence of an official veterinarian by digging it in or burning it;

m) safe removal of bowels, including hunting rights after sampling on the spot or in a rendering plant;

## Standard requirements for the submission of programme for eradication, control and monitoring

n) safe removal of hunted virologically positive boar game;

### 4.3 Description and demarcation of the geographical and administrative areas in which the programme is to be implemented

*Describe the name and denomination, the administrative boundaries, and the surface of the administrative and geographical areas in which the programme is to be applied. Illustrate with maps.*

(max. 32000 chars) :

The programme will be carried out on the whole territory of the Slovak Republic defined as a risk areas (map of risk areas is in attachment).

At present area with higher ASF risk in the Slovak Republic is an area covering the territory of districts neighboring the Ukraine and Poland:

The District Veterinary and Food Administrations of Trebišov (Trebišov district); Michalovce (Michalovce and Sobrance districts); Humenné (Humenné, Medzilaborce and Snina districts); Svidník (Svidník and Stropkov districts); Bardejov (Bardejov district); Stará Ľubovňa (Stará Ľubovňa district); Poprad (Poprad and Kežmarok districts); Čadca (Čadca and Kysucké Nové Mesto districts); Dolný Kubín (Dolný Kubín, Tvdošín and Námestovo districts) and Liptovský Mikuláš (Liptovský Mikuláš district only)

Area with lower ASF risk is an area covering the territory of districts located outside the ASF high risk area.

Area with lower ASF risk includes:

The District Veterinary and Food Administrations of Bratislava (Bratislava I - V districts); Senec (Senec, Pezinok and Malacky districts); Trnava (Trnava, Piešťany and Hlohovec districts); Dunajská Streda (Dunajská Streda district); Galanta (Galanta district); Senica (Senica and Skalica districts); Trenčín (Trenčín and Bánovce nad Bebravou districts); Nové Mesto nad Váhom (Nové Mesto nad Váhom and Myjava districts); Púchov (Púchov, Považská Bystrica and Ilava districts); Prievidza (Prievidza and Partizánske districts); Nitra (Nitra and Zlaté Moravce districts); Levice (Levice district); Nové Zámky (Nové Zámky district); Komárno (Komárno district); Topľčany (Topoľčany district); Šaľa (Šaľa district); Žilina (Žilina and Bytča districts); Martin (Martin and Turčianske Teplice districts); Liptovský Mikuláš ( Ružomberok district only); Banská Bystrica (Banská Bystrica and Brezno districts); Zvolen ( Zvolen, Detva and Krupina districts); Veľký Krtíš (Veľký Krtíš district); Lučenec ( Lučenec and Poltár districts); Rimavská Sobota (Rimavská Sobota and Revúca districts); Žiar nad Hronom (Žiar nad Hronom, Žarnovica and Banská Štiavnica districts); Poprad (Levoča district only); Prešov (Prešov and Sabinov districts); Vranov nad Topľou (Vranov nad Topľou district); Košice-mesto (Košice I - IV districts); Košice-okolie (Košice-okolie district); Rožňava (Rožňava district); Spišská Nová Ves (Spišská Nová Ves and Gelnica districts).

### 4.4 Description of the measures of the programme

*A comprehensive description needs to be provided of all measures unless reference can be made to Union legislation. The national legislation in which the measures are laid down is mentioned.*

#### 4.4.1 Notification of the disease

(max. 32000 chars) :

Directive 2002/60/EC

## Standard requirements for the submission of programme for eradication, control and monitoring

Directive 82/894/EEC

An owner, holder, intermediary or importer, recipient, forwarder, seller or persons empowered to dispose of live animals, germinal products, products of animal origin, waste of animal origin and pathogens, animal by-products and selected products of plant origin, medicated feedingstuffs shall be obliged at control of animal diseases and notification of diseases to notify without any delay to the Veterinary Administration Authority of any suspicion of ASF as well as death of any animal, and to allow examination of such animal

- based on the § 37, para 1, letter a) of the Act No. 39/2007 Coll.

### 4.4.2 Target animals and animal population

(max. 32000 chars):

Domestic pigs, wild boars.

### 4.4.3 Identification of animals and registration of holdings

(max. 32000 chars):

Domestic pigs

Directive 64/432/EEC

Directive 92/102/EEC

No. of registered pig holdings with one and more animals in Slovakia at the beginning of April 2014 – 1546.

Defined area with higher ASF risk is the area with low density of pig farms. No. of registered active pig farms on the ASF-high risk territory at the beginning of January 2014 - 96 active pig farms from which was 37 back yard holdings (holdings with less than 7 animals).

Wild boars

It is difficult to obtain reliable data on the wild boar population. The most accurate information is obtained by the yearly number of hunted wild boar.

Directive 92/102/EEC

The basic condition at eradication is animal identification stipulated by the Act No. 39/2007 Coll II. § 19 according to which the animals must be identified and their identification data must be registered with the central register of animals.

At present the breeding pigs are marked by tattooing and ear tags.

Non breeding pigs are marked by ear tags.

### 4.4.4 Qualifications of animals and herds

(max. 32000 chars):

not applicable

# Standard requirements for the submission of programme for eradication, control and monitoring

## 4.4.5 Rules of the movement of animals

(max. 32000 chars):

Movement of pigs shall be carried out only in compliance with classification of holdings performed for purposes of ASF prevention and control according to the health situation in the holding in relation to this disease. Movement is subject to veterinary control and is carried out in compliance with the instruction „Health requirements at movement of live animals and germinal products“.

For movement of live animals the issuing of accompanying document on the classification of the holding is necessary. The condition for issuing of this document is a clinical examination of moved animals intended for breeding and production and fulfilment of the monitoring of diseases according to the national control programme.

Movement of pigs from holdings must originate from a holding that fulfils ASF monitoring according to the plan of VPP for the respective year, must fulfil the requirements for trade within the European Union.

## 4.4.6 Tests used and sampling schemes

(max. 32000 chars):

Monitoring of ASF is described in section 3.- Description of the submitted programme.

Tests used and virological strategy

Virological tests:

- Antigen detection on cryostat sections with indirect immunoperoxidase technique using monoclonal antibody
- PCR method (published by Agüero et al., 2003)
- Real-time PCR method (published by Fernández-Pinero et al., 2009)
- Real-time PCR method (published by King et al., 2003)

Sampling methods

Material suitable for examination

It is sent:

- the whole body up to the weight of ca 20 kg, if it is more suitable for the reason of ensuring the bio-security upon handling the perished (destroyed) animal
- for virological examination from perished, destroyed pigs or shot wild boars the most suitable are tissues from tonsils, spleen and kidneys . Moreover, it is possible to take two samples from other lymphatic tissues such as retropharyngeal, parotid, mandibular or mesenterial lymph nodes and a sample from ileum. If it does not concern an animal suspicious of ASF infection and it concerns the examination within ASF monitoring, at least one tissue from the above mentioned organs or its part in a size of a walnut is enough in the sample. In an advanced stage of cadaver decay it is suitable to take for the laboratory examination a long tubular bone or thoracic bone.
- in live pigs, showing signs of a fever or other signs of ASF disease, the samples of non-coagulated blood or clotted blood in compliance with the instruction of the laboratory must be taken

Manner of taking the samples

The sample from live animals may be taken only by veterinarian or veterinary assistant under the supervision of a veterinarian in compliance with medical procedures upon performance of this action.

The sample from perished, destroyed or shot animals may be taken by veterinarian, veterinary assistant or trained hunters.

Data on the sample

The person who performed the sampling must attached the data to the sample taken (in case if he/she

## Standard requirements for the submission of programme for eradication, control and monitoring

does not write up an application form on the spot) on the place of sampling (holding, stable, pen-full), date of sampling, marking of an animal, age category, number of animals in the holding, reason of sampling, clinical signs, material which the said sample contains.

In case of hunted wild boars, the data on identification of the sample are attached (number of mark of hunted game), age category, sex, behaviour prior to shooting, content of a sample (sent organs), owner of the sample, district, cadastral territory where the wild boar was shot (found perished), hunting ground, hunting manager, shooter, who and when did perform the sampling.

The indicated data are written by the official veterinarian into the application form for laboratory examination. The official veterinarian from the respective DVFA shall be responsible for the correctness of the data and contents of the sample.

### 4.4.7 Vaccines used and vaccination schemes

(max. 32000 chars):

not applicable

### 4.4.8 Information and assessment on bio-security measures management and infrastructure in place in the holdings involved.

(max. 32000 chars):

Program of surveillance and preventive measures adopted in the holdings located in the area with higher ASF risk:

At confirmation of the primary case of ASF in wild boars the respective authority shall order official supervision in pig holdings in the infected area so that to prevent the spreading of the disease, mainly:

1. to perform an official registration of all categories of pigs in all holdings and its regular updating by an owner; information in the register shall be submitted on request and can be verified at a control; in holdings in the open air, the first registration can be performed on the basis of estimation of pig numbers.
2. to keep all the pig in the holding in their stable premises or at place where they can be isolated from wild boars; it shall order the placing of materials which may come into contact with pigs in the holding in such a way so as to prevent the contact of wild boars with them.
3. prohibition of movement of pigs out from and into the holding without permission by the respective authority adopted with regard to the epizootological situation
4. usage of effective disinfecting facilities at entry into holdings and into individual areas for lairage of pigs as well as at exit from them
5. to comply with hygienic measures for entrance and exit of persons which come into contact with wild boars as well as for decrease of the risk of spreading of african swine fever virus, including temporary ban of entrance of such persons into pig holdings,
6. taking samples for laboratory examination from all perished or sick animals with signs of ASF
7. clinical examination and taking samples for laboratory examination from all registered holdings within a radius of three kilometres
8. measures against the contact of pigs in the holding with: the part of hunted or found perished wild boars as well as materials and equipment, including the possible vectors of infection, which could have been contaminated with african swine fever virus

## Standard requirements for the submission of programme for eradication, control and monitoring

9. that pigs, their semen, embryos or eggs are not moved from the infected area for the purposes of trade with member states

10. the monitoring of ASF in domestic pigs for the year 2015 and the control of movement of domestic pigs in compliance with directions of the SVFA SR.

### Peace time bio-security measures

In the high risk area the respective authority shall order official supervision in pig holdings so that to prevent the spreading of the disease, mainly:

1. to keep all the pig in the holding in their stable premises or at place where they can be isolated from wild boars;
2. prohibition of movement of pigs out from and into the holding without permission by the relevant authority
3. usage of effective disinfecting facilities at entry into holdings and into individual areas for lairage of pigs as well as at exit from them
4. to comply with hygienic measures for entrance and exit of persons which come into contact with wild boars as well as for decrease of the risk of spreading of african swine fever virus, including temporary ban of entrance of such persons into pig holdings,
5. taking samples for laboratory examination from sick animals with signs of ASF

### Biosecurity program at the borders:

Certain measures to avoid introduction of ASF virus into the European Union

- import of swine, pig meat and products from pig meat from third countries or from the parts of the territories of third countries, in which occurrence of ASF has been confirmed, is not authorized
- all vehicles, which transport live animals and which enter the territory of the Union through Border Inspection Posts of the Slovak Republic (BIPs) from the third countries, in which occurrence of ASF has been confirmed, will be released only if they were properly cleaned and disinfected;
- at arrival to the BIP, operator or driver of the vehicle for transport of livestock, which entering the territory of the Union from the territories of third countries, in which occurrence of ASF has been confirmed, shall present to the official veterinarian of the BIP information certifying that the vehicle and related equipment have been cleaned and disinfected after the last unloading of animals;
- operator or driver of the vehicle shall prove performance of the cleaning and disinfection by presenting of information to the official veterinarian of the BIP throughout the providing of original of right filled in "Declaration, which must be provided by operator/driver of the vehicle for transport of livestock, which entering the territory of the Union from the third countries or from the parts of the territories of third countries, in which occurrence of ASF have been confirmed" (Declaration)
- official veterinarian of the BIP will take original of the declaration from operator or driver of the vehicle, then he will make several copies of the declaration, which he will give to the operator or driver of the vehicle after its verification
- at all vehicles for transport of livestock, which entering the territory of the Union from the third countries or from the parts of the territories of third countries, in which occurrence of ASF have been confirmed, official veterinarian of BIP will perform visual check in order to ascertain, that the vehicle and related equipment have been properly cleaned
- if the information on performance of cleaning and disinfection, provided by the operator or driver of the vehicle in the declaration, is correct and visual check performed by official veterinarian of the BIP is satisfactory, official veterinarian of the BIP will certify these facts in "Certificate on the cleaning and disinfection of the vehicle for transport of livestock, which entering the territory of the Union from the third countries or from the parts of the territories of third countries, in which occurrence of ASF have been confirmed" (Certificate)
- official veterinarian of the BIP will provide original and copies of the certificate to the operator or driver

## Standard requirements for the submission of programme for eradication, control and monitoring

of the vehicle

- the operator or driver of the vehicle will present copy of the certificate to the authority responsible for customs release of the vehicle
  - official veterinarian of the BIP will archive original of declaration and copy of the certificate over 3 years
  - If official veterinarian of the BIP will find out, that respective vehicle was not sufficiently cleaned and disinfected:
    - a) he will order right cleaning and disinfection of the vehicle for transport of livestock at the place, which will be determined by respective authority and which is situated closest to the place of entry to Union and then he will issue a certificate
    - b) if there are no suitable premises and equipment for cleaning and disinfection in the immediate vicinity of the place of entry or serious risk exist, that remains of faeces, urine, litter, fodder or of animal products could flow or fall out from the non-cleaned vehicle
      - i) he will not permit to such a vehicle enter to the Union or
      - ii) on site he will perform preliminary disinfection of the vehicle which was not sufficiently cleaned and disinfected, until enforcement of measures laid down in letter a) within 48 hours from the arrival of vehicle to the border of the Union
  - Respective authority of the Member State, in which the place of entry into the EU is situated, can subject all vehicles, including those which transport feedingstuffs and where significant risk as regards spreading of ASF into the territory of the Union cannot be excluded, to disinfection on site of wheels or any other parts of the vehicle, which are considered as necessary to reduce risk.
  - All expenses associated with disinfection of the vehicles shall be borne by the operator of the vehicle.
- State Veterinary and Food Administration of the Slovak Republic regularly inform Customs Directorate of the Slovak Republic about actual situation as regards occurrence of animal diseases. Customs Directorate of the Slovak Republic has been informed on occurrence of ASF and was requested to increase intensity of checks of personal luggage and consignments.

### 4.4.9 Measures in case of a positive result

*A short description is provided of the measures as regards positive animals (slaughter, destination of carcasses, use or treatment of animal products, the destruction of all products which could transmit the disease or the treatment of such products to avoid any possible contamination, a procedure for the disinfection of infected holdings, the therapeutic or preventive treatment chosen, a procedure for the restocking with healthy animals of holdings which have been depopulated by slaughter and the creation of a surveillance zone around infected holding)*

*(max. 32000 chars) :*

According to Directive 2002/60/EC

According to National ASF Contingency Plan

In the case of confirmation of the occurrence of ASF in the border zone of another Member State, National center for disease control of Slovak Republic shall promptly cooperated with the Central Authority of the Member State and the Local center for disease control of the Slovak Republic shall promptly cooperated with the local authority of another Member State.

### 4.4.10 Compensation scheme for owners of slaughtered and killed animals

*(max. 32000 chars) :*

National legislation: domestic pigs: Act No. 39/2007 Coll. Article 45

wild boar: Plan of control of african swine fever in wild boar population in Slovakia

Compensation for shooting and for delivery of samples for ASF examination in case of hunted wild boar

## Standard requirements for the submission of programme for eradication, control and monitoring

In all hunting grounds in an area with higher ASF risk the compensation is paid:

Financial compensation for virologically positive animals

In case of hunting virologically positive animals (to attach a copy of positive result of laboratory examination), impairment of game by storage as well as found perished wild boars which were safely disposed of either by a rendering plant, by burning or deep digging, the respective District Veterinary and Food Administration shall be asked for the set financial compensation

- 67 € EUR to the user of the hunting ground

- for each hunted virologically positive wild boar regardless of age and weight;

- 50 € for a found perished wild boar to the user of the hunting ground, on non-hunting land to the user of the closest hunting ground, while the person who finds the perished animal is obliged to notify the game manager of the nearest hunting ground and the respective district veterinary and administration of this fact.

### 4.4.11 Control on the implementation of the programme and reporting

*(max. 32000 chars):*

The Veterinary Officer of the District Veterinary and Food Administration carry out cross-check of numbers of hunted and perished wild boars and numbers of samples in co – operation with the District forestry office after hunting season.

All veterinary practitioners and hunters (who perform ASF- sampling ) shall be regularly trained by regional veterinary officers. Number of samples and time sampling shall be under control of regional veterinary officers.

SVFA reports to Commission the implementation of the programme in accordance to current EU legislation.

## 5. Benefits of the programme

*A description is provided of the benefits of the programme on the economical and animal and public health points of view.*

*(max. 32000 chars):*

Programme for wild boar

1.1. Diagnostic tests

- Sampling: according to the monitoring of ASF in wild boar population.

Table 2 in annexes

1.2. Financial compensation

- Premiums for presenting wild boar for analysis in infected area and compensation according to national programme

For brucellosis (bovine and small ruminants) and tuberculosis, if an annual programme is submitted, please provide also the targets for herd incidence and prevalence , and the animal prevalence for at least 3 years (including the year for which the programme is submitted).

Standard requirements for the submission of programme for eradication, control and monitoring

		<b>Total</b>			244 200,00 €		

### 8.2 Co-financing rate:

The maximum co-financing rate is in general fixed at 50%. However based on provisions of Article 5.2 and 5.3 of the Common Financial Framework, we request that the co-financing rate for the reimbursement of the eligible costs would be increased:

- Up to 75% for the measures detailed below
- Up to 100% for the measures detailed below
- Not applicable

## Standard requirements for the submission of programme for eradication, control and monitoring

### 8.3 Source of national funding

*Please specify the source of the national funding:*

- public funds*
- food business operators participation*
- other*

*Please give details on the source of the national funding (max 32000 characters)*

ASF programme will be funded from the budget of the State Veterinary and Food Administration and Ministry of Agriculture of the Slovak Republic.
