## Eradication: Final report for Salmonella 2019

For each approved annual or multi-annual programme Member States shall submit to the Commission by the 30 April each year an annual detailed technical and financial report covering the previous year. That report shall include the results achieved and a detailed account of eligible costs incurred (Art 14 of Regulation (EU) No 652/2014).

This form is for information only, no submission possible.

### Reporting period

**To:** 2019

**Year of implementation:** 2019

## 1. Technical implementation of the programme

### 1.1 Description and evaluation of the evolution of the epidemiological situation, the technical implementation of the activities foreseen under the programme and the cost-effectiveness of the programme.

The SNCP have been implementing since 2007 in breeders, 2008 in layers, 2009 in broilers and 2010 in turkeys (breeding and fattening), with satisfactory results in all poultry populations.

The prevalence for target serovars has declined every year and at this moment (in 2019), we have a low prevalence in all poultry populations, so we consider that the measures applied have been effective and efficient.

Nevertheless, in 2019 we don't have reached the UE target in layers (our target is slightly above it, 2.34%)

### 1.2 Details on the level of achievement of the targets set in the approved programme and technical difficulties.

In 2019 we have reached the EU target in all poultry populations except layers (our prevalence has been 2.34%)

At the beginning of the programme implementations (in 2008), we had a very high prevalence in layers, but every year we have decreased the prevalence until a low level.

We are going to find out the reasons for this increase in order to get the EU target in 2020 again and as soon as possible.

**1.3 Epidemiological maps for infection and other relevant data on the disease/activities (information on serotypes involved,...) (Please attach files of data using the PDF attachment feature) Use the textbox below to provide clarifications for the maps you attach, if needed.**

See the attached document (Prevalence evolution and serotypes in Spain 2019)
