ASF in Lithuania 2025

2025

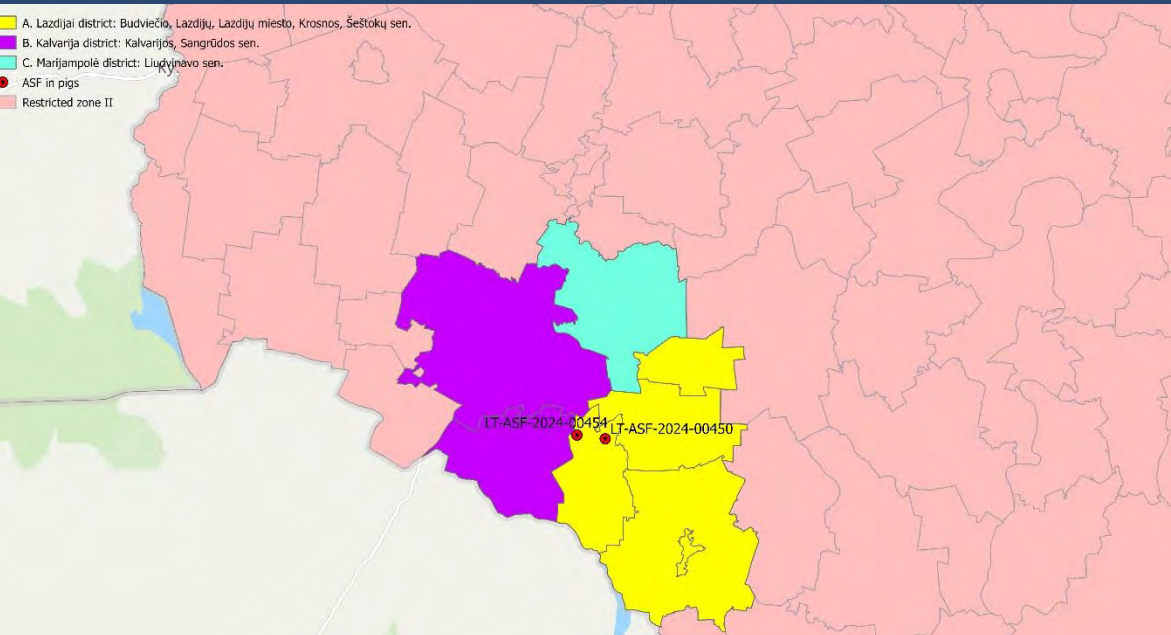

- 17 hunted wild boar
- 46 found dead wild boar

In total:
30 ADIS notifications / 63
affected wild boars

No outbreaks in domestic

ASF in Lithuania in domestic pigs

Reverting RZ III to RZ II

Distance and timing between ASF outbreaks

ASF outbreak ADIS No.	ASF outbreak confirmation date	Distance from ASF outbreaks in that zone	
		LT-ASF-2024-00450	LT-ASF-2024-00454
LT-ASF-2024-00450	30/09/2024	0	2.75 km
LT-ASF-2024-00454	07/10/2024	2.75 km	0

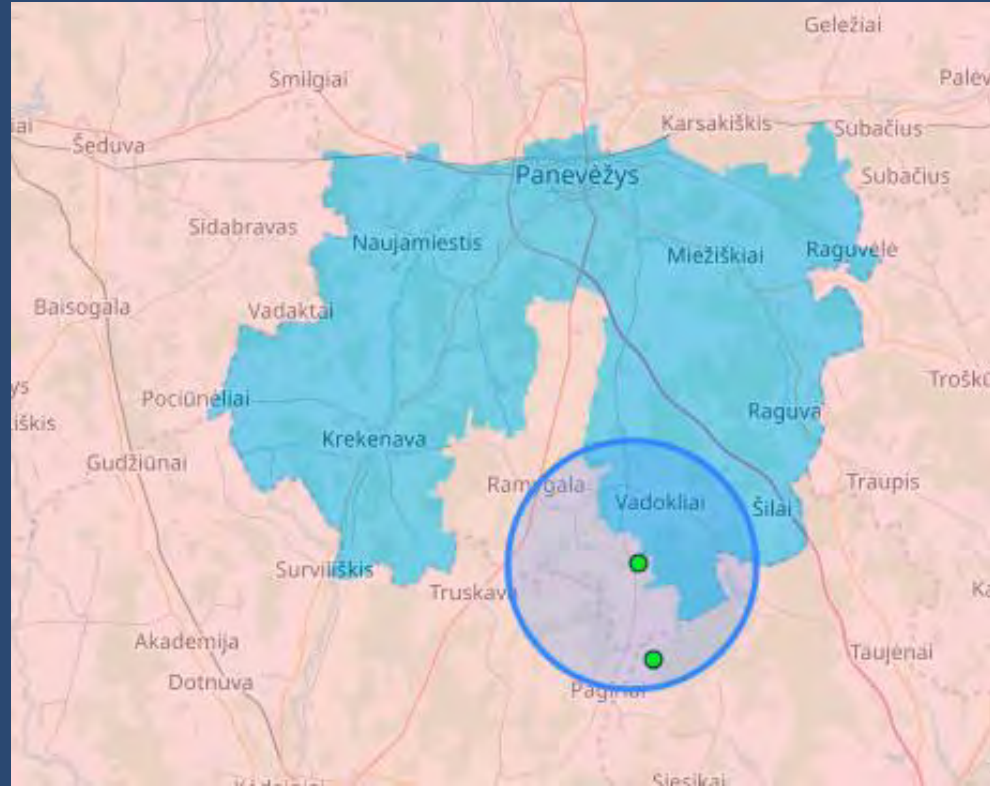

Based on the Commission Delegated Regulation (EU) 2020/687 and African swine fever in the Union ('ASF guidelines') (C/2023/1504) of 18 December 2023:

- 'in the event of a single or limited ASF outbreaks clustered in space and in time (during a period of 30 days from the first outbreak in that zone) in establishments of kept porcine animals in a sufficiently large area with no ASF outbreak in kept porcine animals for the past 12 months – the three year or 12 months period referred to in point 6.1. can be reduced to 3 months'
- Passive surveillance system for establishments of kept porcine animals is implemented;
- Active and passive surveillance for wild porcine animals are implemented.

ASF in Lithuania in wild boar

2025/January/09, at the border with the RZ I, a wild boar was hunted (positive) during a hunting activity.

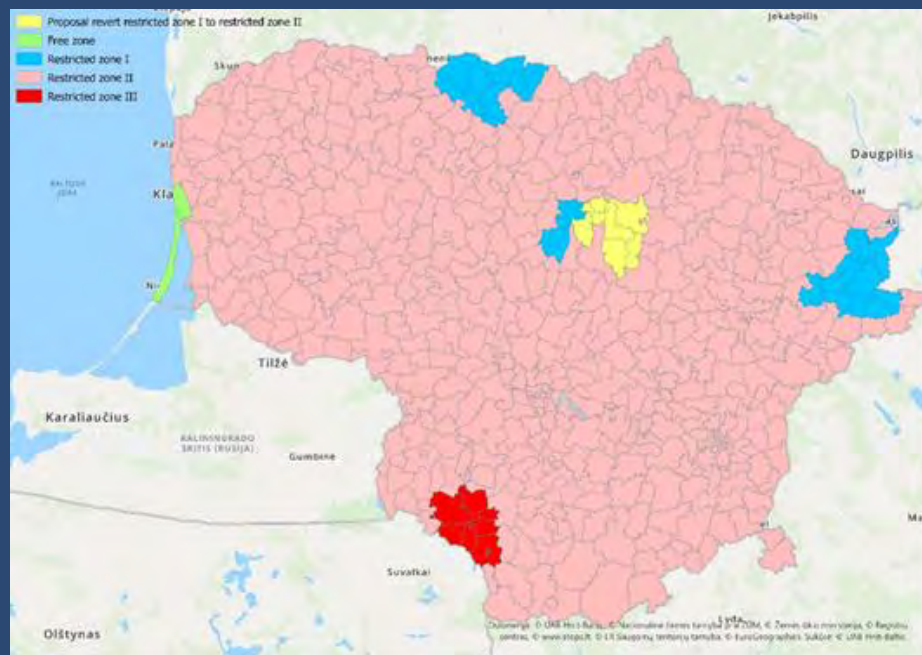

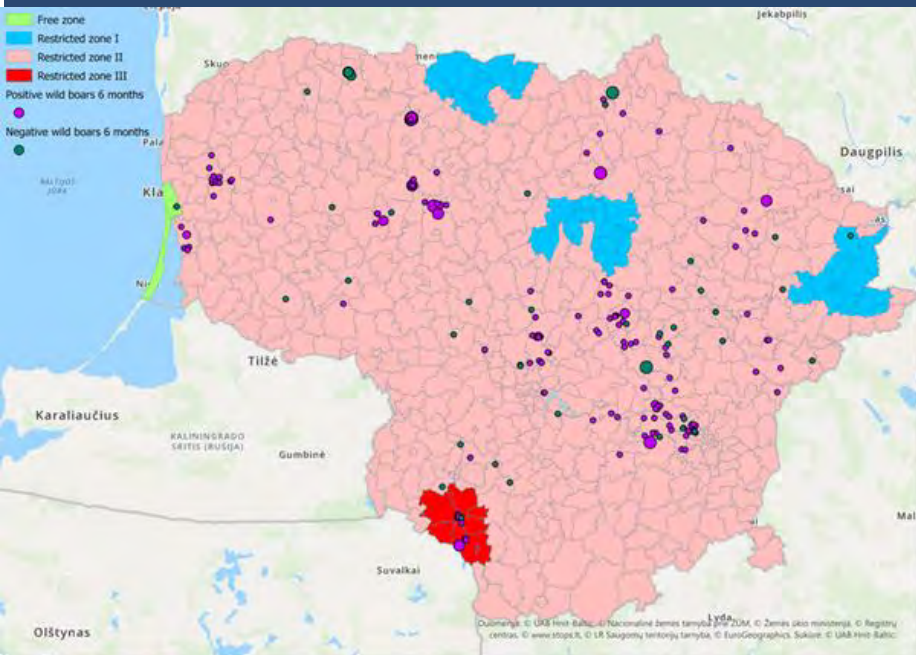

The hunter did not report any behavioral changes prior to the hunt. There was no clinical signed observed.

ASF in Lithuania in wild boar

No reports of wild boar carcasses have been received.

Due to ASF outbreaks in WB, Restriction Zone (RZ) I was reverted to RZ II
