The Farm to Fork Strategy

For a fair, healthy and environmentally-friendly food system

European Green Deal - von der Leyen Commission

Policy Dialogues EU - Central America on sustainable agriculture and food systems

22 March 2022
Establish a sustainable food system that:

- has neutral or positive environmental impact of food production:
  - preserving and restoring the land and sea-based resources;
  - mitigate climate change and adapt to its impact;
  - reversing the loss of biodiversity;

- ensures food security and public health:
  - Access for everyone to sufficient, nutritious, sustainable food;
  - high standards of safety and quality, plant health, animal health and welfare

- preserves the affordability of food, while (a.o.):
  - generating fairer economic returns & fostering the competitiveness sector
  - promoting fair trade
  - safeguarding occupational health and safety
  - ensuring integrity of the single market

Food security and food safety are cornerstones of our food system, and will never be compromised
Why sustainable Food Systems?

• Because Food Systems are globally responsible for around **21-37% of total greenhouse gas (GHG) emissions**.

• Because, we are confronted to overwhelming paradoxes in the food systems:

  *While, in the EU, 33 million people cannot afford a quality meal every second day, 20% of the food produced is wasted, half of the adult population is overweight and obesity is rising.*

• Because the COVID-19 pandemic has stressed the importance of robust and resilient food systems.

• Because we are committed to achieve the United Nations’ Sustainable Development Goals.
Reduce by 50% the overall use and risk of chemical pesticides and reduce use by 50% of more hazardous pesticides.

Reduce nutrient losses by at least 50% while ensuring no deterioration in soil fertility; this will reduce use of fertilisers by at least 20%.

Reduce sales of antimicrobials for farmed animals and in aquaculture by 50%.

Achieve at least 25% of the EU’s agricultural land under organic farming and a significant increase in organic aquaculture.

2030 Targets for sustainable food production
Actions to ensure sustainable food production

Proposal for a revision of the existing animal welfare legislation, including on transport and slaughter (2023)

Proposal for a revision of the feed additives Regulation to reduce the environmental impact of livestock farming (2021)

Legislative initiatives to enhance cooperation of primary producers (support position in food chain) (2021-22)

Clarification of the scope of competition rules with regard to sustainability in collective actions (2022)

Proposal for a Farm Sustainability Data Network (data and advice on sustainable farming practices) (2022)
Actions for sustainable fisheries and aquaculture

- Reinforce efforts to bring fish stocks to sustainable levels via the Common Fisheries Policy; strengthen fisheries management in Mediterranean
- Next Maritime and Fisheries Fund will spend more than EUR 1 billion to support sustainable seafood farming
- Adopt EU Guidelines on Aquaculture: pathways for Member States’ national aquaculture development plans
- Intensify fight against fraud through an enhanced traceability system
- Adopt EU Strategy on Algae
Actions to stimulate sustainable practices by food industry and retail, hospitality and food service

- Initiative to improve the corporate governance framework (integrate sustainability into corporate strategies) (2021)
- Develop an EU code and monitoring framework for responsible business and marketing conduct in the food supply chain (2021)
- Stimulate reformulation of processed food, including setting of maximum levels for certain nutrients (2021)
- Set nutrient profiles to restrict promotion of food high in salt, sugar or fat (2022)
- Proposal revision EU legislation on Food Contact Materials (food safety, environmental footprint) (2022)
- Revision EU marketing standards for agricultural, fishery and aquaculture products (ensure uptake and supply of sustainable products (2021-22))
- Enhance coordination to tackle Food Fraud (2021-2022)
Actions to promote shift towards healthy, sustainable diets

- Determine the best modalities for setting minimum mandatory criteria for sustainable food procurement (2021)
- Review of the EU school scheme legal framework: refocus on healthy and sustainable food (2023)
- Review of the EU promotion programme for agricultural and food products (aimed at sustainable production and consumption) (2020)
- Proposal VAT rates (currently being discussed in Council): could allow to make more targeted use of rates (e.g. to support organic fruit and vegetables).
- Proposal for a harmonised mandatory front-of-pack nutrition labelling to enable consumers to make health conscious food choices (2022)
- Proposal to require origin indication for certain products. (2022)
- Proposal for a sustainable food labelling framework to empower consumers to make sustainable food choices (2024)

The 2021 UN Food Systems Summit: recognises the need for global action to transform food systems into sustainable food systems, so as to reach the Sustainable Development Goals.

The F2F Strategy is a European Strategy but it is also the EU contribution to the global action.

The EU acting alone is not enough.
THE COST OF INACTION IS HUGE

- World lost an estimated EUR 3.5-18.5 trillion per year in ecosystem services from 1997 to 2011 owing to land-cover change, and an estimated EUR 5.5-10.5 trillion per year from land degradation.

- Today, one in every four persons worldwide is hungry or does not have regular access to nutritious and sufficient food (FAO). There will be no food security without sustainability of food systems.

- Approximately 80% of global deforestation is caused by the expansion of land used for agriculture (FAO)

- Food & farming is the sector worst hit by the increasing occurrence of severe weather disasters & extreme weather, (FAO, March 2021)
SUSTAINABILITY: AN OPPORTUNITY, NOT A THREAT

• Food systems in line with the SDGs:
  - would deliver nutritious and affordable food for a growing world population,
  - help restore vital ecosystems and
  - create new economic value of over EUR 1.8 trillion by 2030.

• The transition to sustainability is not a threat for the farming or retail sectors, but an economic opportunity. There is a growing demand from consumers, which might benefit front runners;
New Genomic Techniques
Farm to Fork Strategy
Plants derived from targeted mutagenesis and cisgenesis

A proportionate regulatory oversight that:

✓ Maintains a high level of protection of human and animal health and of the environment.

✓ Enables safe plants to provide benefits and contribute to the innovation and sustainability objectives of the European Green Deal and of the Farm to Fork and Biodiversity strategies

✓ Enhances the competitiveness of the EU and ensures the effective functioning of the internal market
Timeline

- **April 2021**: Policy initiative announced
- **November 2021**: High level event
- **2Q 2022**: Open public consultation
- **September 2021**: Inception impact assessment
- **2022**: Impact assessment
- **2023**: Possible legal proposal
Reducing food loss and waste: EU action plan
Farm to Fork Strategy
EU Code of Conduct on responsible food business and marketing practices

Farm to Fork Strategy

October 2021
For healthy people, healthy societies and a healthy planet.
