

African swine fever in Lithuania (update of the situation in Kupiškis municipality) 2016-11-07

**State Food and Veterinary Service,
Lithuania**

Regionalization

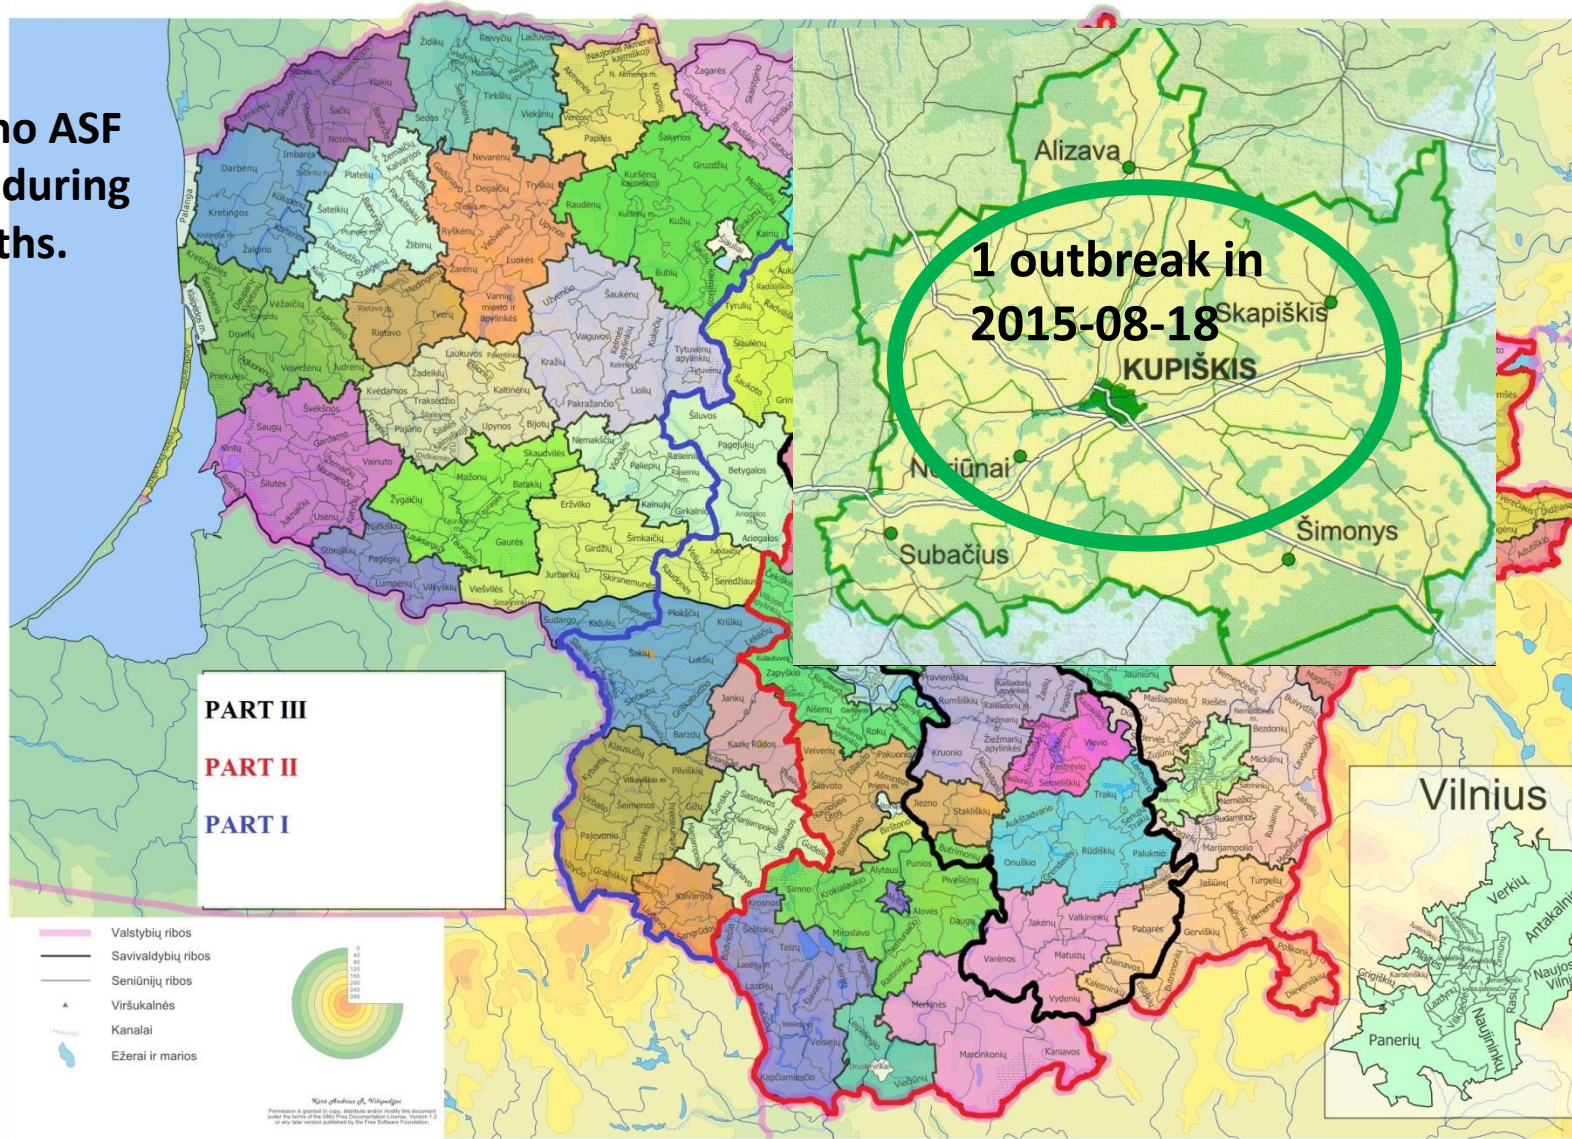

Lift PART III and revert to PART II (Kupiškis municipality)

- There are 2 commercial pig farms one of them with **7683** pigs and other with 493 pigs;
- Both farms comply with very high biosecurity level;
- The farms are inspected twice a year by official veterinarians including clinical examination of the pigs and sampling according to Commission Implementing Decision 2014/709/EC;
- Last officialy inspected on 2016-10-27;

According to the working Document SANTE/7112/2015

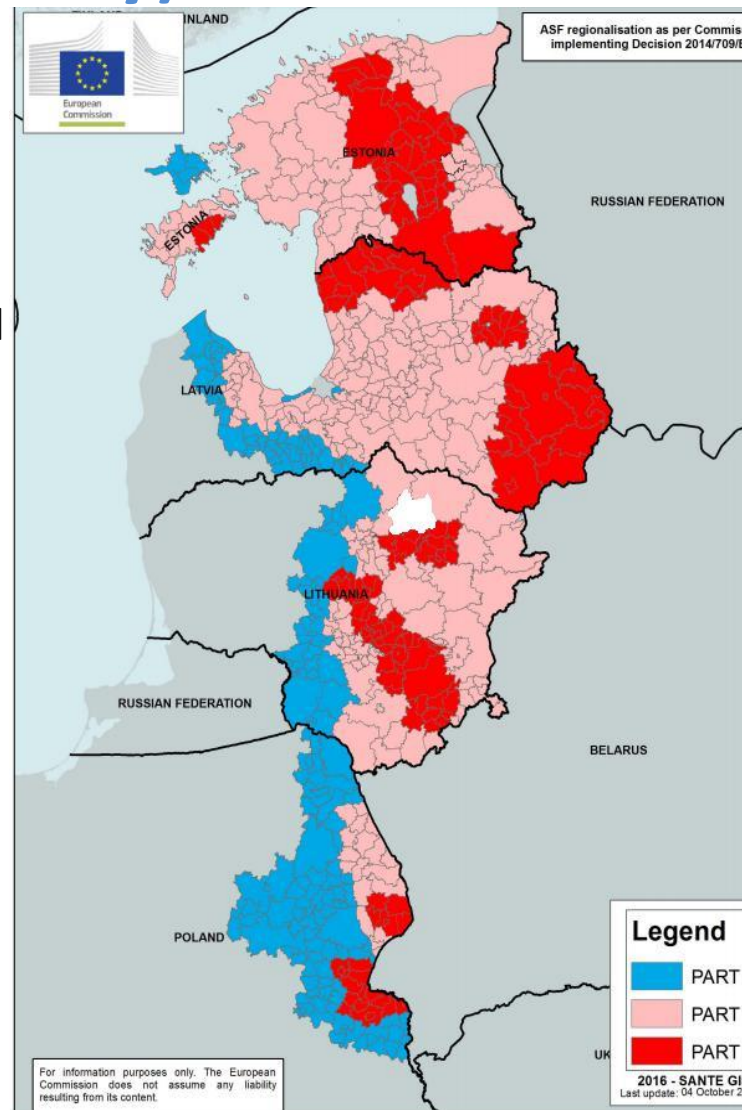

There has been no ASF outbreak in pigs during the past 15 months.

Regionalization

Lift PART III and revert to PART II (Kupiškis municipality)

- There are 156 non-commercial farms with 500 pigs;
- The inspections are performed by official inspectors and trained staff from municipality administration;
- **96 inspections were performed by territorial State Food and Veterinary Service to re-check of biosecurity measures in non-commercial farms in 2016;**
- 171 inspections were performed in non-commercial farms by the trained staff of municipality administration;

Biosecurity requirements for non-commercial farms

- A fence around the farm;
- Changing of working clothes and boots entering the farm;
- Disinfection mats at the entrance to the farm;
- Prohibition to bring food into the farm;
- Prohibition to use food waste for feeding of pigs;
- All farmers who keep pigs for their own consumption or other purposes once a quarter should declare it to official register

Surveillance data in domestic pigs

Municipality	Samples of domestic pigs in 2015		Positive	Samples of domestic pigs in 2016		Positive
	From commercial farm	From non-commercial farms		From commercial farm	From non-commercial farms	
Kupiškis	167	858	1 in backyard farm(2015-08-18)	174	26	No positive

Surveillance data in wild boars

Municipality	Wild boar sampled in 2015	Number of positive cases in wild boars	Wild boar sampled in 2016	Number of positive cases in wild boars
Kupiškis	647	Hunted-7 Found dead-11	267	Hunted-2 Found dead-3 (last case 2016-02-18)

Information about wild boars in Kupiškis municipality

Years	Hunted	Found dead
2014	828	2
2015	635	12
2016 (from fanuary 1 till october 31)	266 (till 2 years-65 over 2 years-43)	5

Conclusions

- To revert PART III to PART II all conditions are met;
- Last outbreak in domestic pigs 15 months ago (**2015-08-18**);
- Commercial farms with high biosecurity requirements;
- Non-commercial farms are under official control;
- Few cases of ASF in wild boars (spread is not increasing);
- Active and passive surveillance in place are performed
