

Under the new Good Growth Plan started in 2020, Syngenta makes four ambitious commitments and targets for 2025.

We are accelerating our innovation to provide solutions for farmers to make agriculture more resilient and sustainable. We strive for carbon neutral agriculture, while continuing our work to enhance biodiversity and soil health. We are reinforcing our existing commitment to help people stay safe and healthy in our operations and on the field.

We want to achieve these commitments in partnership with others and through open dialogue about the value of agriculture innovation for farmers, nature and society.

Accelerate innovation for farmers and nature	Strive for carbon neutral agriculture	Help people stay safe and healthy	Partnering for impact
<ul style="list-style-type: none"> • Continue investing in sustainable agriculture breakthroughs • Deliver two new sustainable technology breakthroughs per year • Strive for the lowest residues in crops and the environment 	<ul style="list-style-type: none"> • Measure and enable carbon capture and mitigation in agriculture • Enhance biodiversity and soil health on 3 million hectares of rural farmland every year • Reduce the carbon intensity of our (Syngenta Crop Protection and Syngenta Seeds) operations by 50 percent by 2030 	<ul style="list-style-type: none"> • Goal Zero incidents in our operations • Train 8 million farm workers on safe use every year • Strive for fair labor across our entire supply chain 	<ul style="list-style-type: none"> • Build cohesive partnerships and publish their sustainability objectives • Launch innovation dialogues for inclusive consultation on sustainability • Board-level governance of sustainability
SDG 1, 2 and 12	SDG 6, 13 and 15	SDG 3 and 8	SDG 16 and 17
