

African swine fever in Poland – update

General Veterinary Inspectorate
13 May 2019

Update on epizootic situation in wild boar

ASF cases in wild boar in 2019

- ✓ 1 January – 31 December 2018: **2243** ASF cases in wild boar
- ✓ 1 January - 10 May 2019: **1037** cases
- ✓ Since last PAFF (11.04.2019): **173**

ASF outbreaks in pigs:

- ✓ No more outbreak since 2019/1 which was confirmed on **29 January 2019**

Proposal of amendments to the Annex to CID 2014/709

Enlargement of the area listed in Part I and Part II:

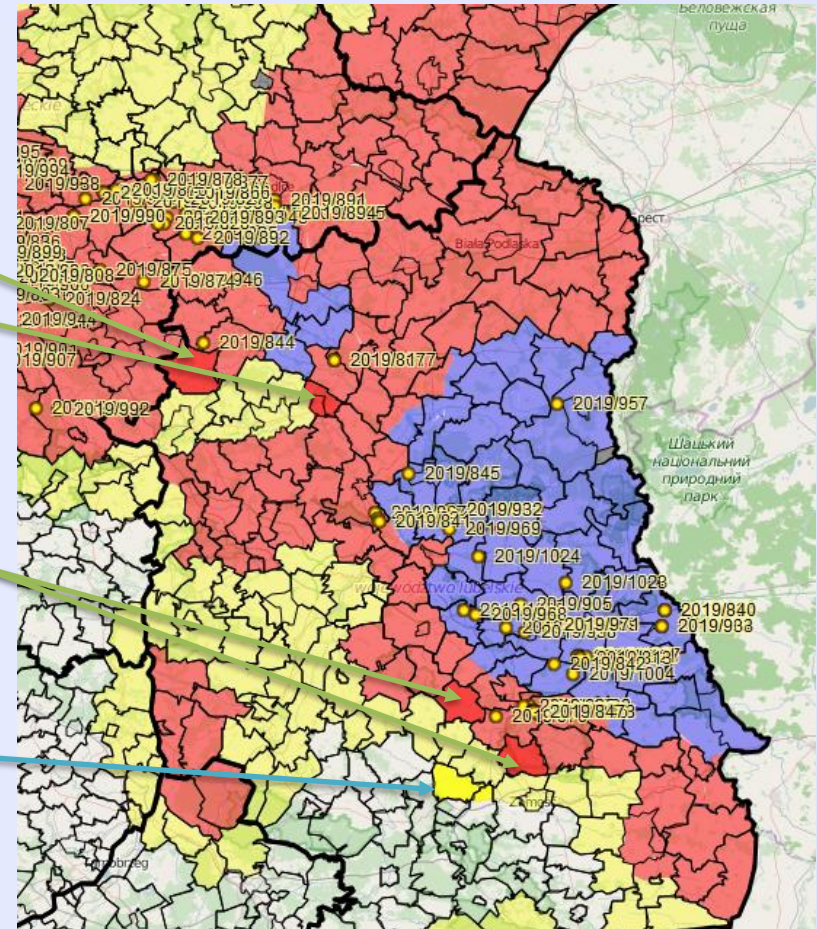

➤ Lubelskie voivodship:

- **new Part II** due to cases no. 2019/844 and 2019/1017 –municipality of Kłoczew and part of municipality of Kock

- Due to cases no. 2019/970:

✓ **new Part II:**
municipalities of Gorzków and Stary Zamość

✓ **new Part I:**
municipality of Sułów and part of municipality of Szczepieszyn

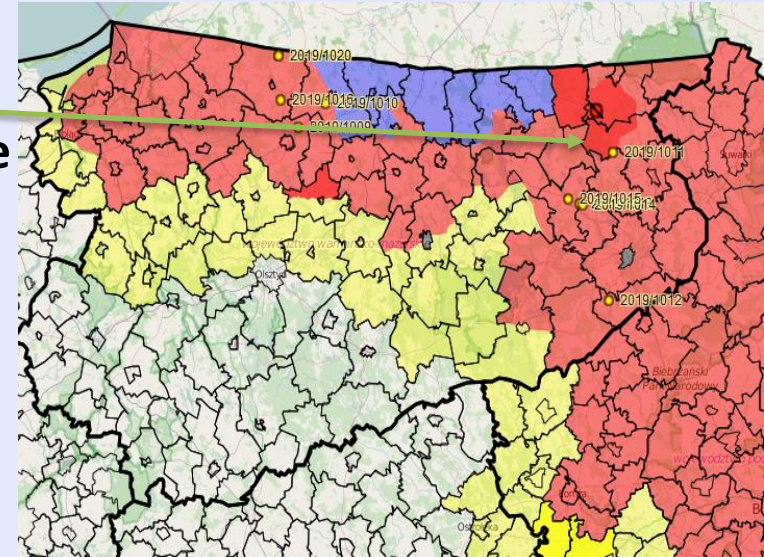

Reverting of the area listed in Part III into Part II:

➤ **Warmińsko - Mazurskie voivodship:**

- **Part III -> Part II:** municipality of Banie Mazurskie,
part of municipalities of Gołdap and Kowale Oleckie

- **Arguments:**

- ✓ 1 ASF outbreaks in pigs which was confirmed on 29 January 2019
- ✓ Over than 3 months without outbreaks in pigs
- ✓ Areas with ASF cases in WB

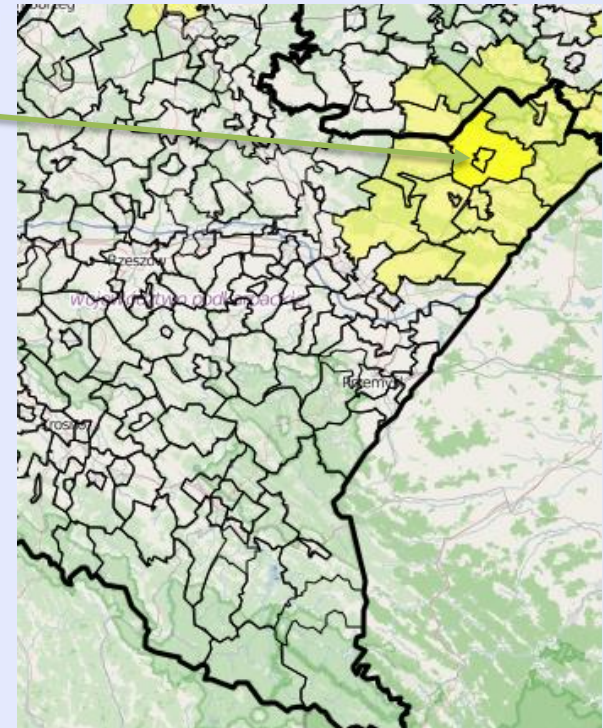

Reverting of the area listed in Part III into Part I:

➤ **Podkarpackie voivodship:**

- **Part III -> Part I:** municipality of Cieszanów

- **Arguments:**

- ✓ 8 ASF outbreaks in pigs were confirmed in August 2018 (1 primary and 7 secondary outbreaks).
- ✓ Before these outbreaks – free area with 67 holdings and 5431 pigs, including 35 holdings keeping up to 10 pigs
- ✓ Killing of pigs in all contact holdings within the established protection area (24 holdings with 491 pigs).
- ✓ There has not been pig's repopulation yet.
- ✓ The distance from this area to the nearest ASF case in the neighboring voivodship is over than 60 km.
- ✓ Since August 2018 to April 2019 in lubaczowski district there 850 samples obtained from wild boar have been laboratory tested with negative results.

Reverting of the area listed in Part III into Part I:

➤ Podkarpackie voivodship:

- Part III -> Part I: municipality of Cieszanów

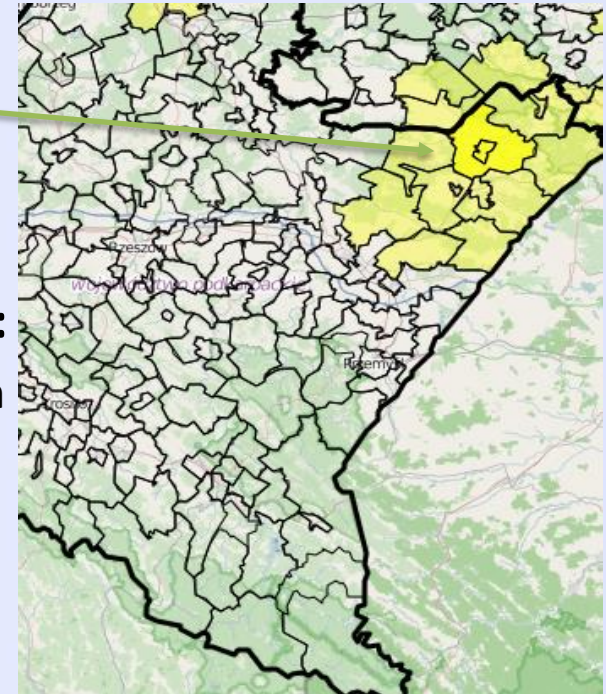

- Measures taken in this area to avoid re-introduction of the disease on the base of epidemiological inquiries:

✓ Notification to the law enforcement authorities in relation to the primary outbreak, due to the hypothesis that farmer could transmit ASV virus by contaminated materials or goods. However the investigation had to be suspended due to the farmer's death.

✓ Awareness campaign addressed to pig farmers and other industries related to pig breeding (i.e. inseminators, transporters).

✓ Awareness campaign concerning biosecurity measures addressed to hunters.

✓ Controls of biosecurity rules in farms.
