Eradication: Final report for Classical Swine Fever 2019

For each approved annual or multi-annual programme Member States shall submit to the Commission by the 30 April each year an annual detailed technical and financial report covering the previous year. That report shall include the results achieved and a detailed account of eligible costs incurred (Art 14 of Regulation (EU) No 652/2014).

This form is for information only, no submission possible.

ID: 20200429-LSVJ8CKO

Country code: SK

Reporting period

From: 2019

To: 2019

Year of implementation: 2019

1. Technical implementation of the programme

1.1 Description and evaluation of the evolution of the epidemiological situation, the technical implementation of the activities foreseen under the programme and the cost-effectiveness of the programme.

In the years 2018 and 2019 epidemiological CSF-situation was consolidated in the Slovak Republic - it was not detected any new CSF-outbreak in domestic pigs as well as in wild boars.

In the year 2018 totally 115 samples from 17 farms were virologically examined in domestic pigs, none of them was positive. Samples were taken according to the national monitoring of CSF in domestic pigs - "Monitoring of CSF in domestic pigs".

In the year 2018 totally 4173 samples were virologically examined in wild boars, none of them was positive. In the year 2018 totally 3403 samples of wild boars were serologically examined, none of them was positive.

In the year 2017 totally 4095 samples from 184 farms were serologically examined in domestic pigs, none of them was positive.

In the year 2017 totally 5935 samples were virologically examined in wild boars, none of them was positive. In the year 2017 totally 7291 samples of wild boars were serologically examined, none of them was positive.

1.2 Details on the level of achievement of the targets set in the approved programme and technical difficulties.

Monitoring in wild boars will be performed in the years 2017 on the whole territory of the SR (map of risk areas is in attachment).

The main objective of CSF programme is prevention of introduction of the CSFV into the country and early detection of its presence in the buffer zone. CSF programme included:

- Passive surveillance in wild boars
- Active surveillance in wild boar
- Passive surveillance in domestic pigs

Passive surveillance in wild boars:

Passive surveillance in wild boars was performed in the year 2019 on the whole territory of the SR.

- to examine all sick and perished wild boars virologically

Active surveillance in wild boar population:

Active monitoring in wild boars was performed in the year 2019 in the CSF buffer zone only.

- in the defined CSF buffer zone to examine all hunted animals (including all sick animals) virologically as well as serologically;

The objectives set in the programs approved in 2019 were achieved. Within implementation of CSF programme was not showed any technical difficulties.

1.3 Epidemiological maps for infection and other relevant data on the disease/activities (information on serotypes involved,...) (Please attach files of data using the PDF attachment feature) Use the textbox below to provide clarifications for the maps you attach, if needed.

Annexies

Geographical origin of samples submitted for CSFV investigation in wild boars in Slovakia during 2019.
CSF risk areas in Slovakia during 2019.

2. Tables for SWINE DISEASES PROGRAMMES monitoring outcome of the year

VERY IMPORTANT: Please fill out the following tables with figures corresponding to measures performed during the implementing period (1/1 to 31/12)

Table A - DISEASE SURVEILLANCE IN DOMESTIC PIGS

Region	Number of clinical examined holdings	Number of farms sampled	Type of farm	Number of animals sampled	Number of farms with serologically positive result	Number of farms with active infection detection	Number of outbreaks
Total	0	0		0	0	0	0

Table B - DISEASE SURVEILLANCE IN WILD BOAR/FERAL PIGS

Region	Type of surveillance	Number of animals tested	Positive	% positive	Number of cases
Trebišov	Active	437	0	0 %	0
Michalovce	Active	988	0	0 %	0
Humenné	Active	476	0	0 %	0
Slovakia whole territory	Passive	1,437	0	0 %	0
Total		3,338	0	0 %	0

Table C - WILD BOAR ORAL VACCINATION

Region/Area	Month	Number of baits	Size of vaccinated area (km ²)
Total		0	0

Table D - DIAGNOSTIC TESTS AND RESULTS

Region	Animal population	Laboratory test used	Number of animals tested	Number of tests carried out	Number of positive results	Comments
Trebišov	feral pigs	PCR	437	0	0	
Trebišov	feral pigs	ELISA	424	0	0	
Michalovce	feral pigs	PCR	988	0	0	
Michalovce	feral pigs	ELISA	984	0	0	
Humenné	feral pigs	PCR	476	0	0	
Humenné	feral pigs	ELISA	476	0	0	
Slovakia whole territory	feral pigs	PCR	1,437	0	0	

Total	5,222	0	0
