OUTBREAK OF NCD IN BROILERS HOLDING JUNE 2022, ALMERÍA

The OVS of Andalucía immediately adopted the measures, established in Commission Delegated Regulation (EU) 2020/687:

- Immediate immobilization of the farm
- Epi survey to find out the possible origin, and farms at risk (movement of people and vehicles)
- Stamping out: culling, disposal and C&D ongoing
- Establishment ZR around : 3 km PZ and 10 km SZ. 17 commercial farms (broilers and turkeys) with current census, are located in this restriction zone.

2 SUSPICIONS and 10-25 KM CONTROL ZONE

- 2 suspicions within 3 km from first outbreak (10.000 and 26.700 boilers)
- 1 epi link farm at 180m of 1 of the suspicions (no signs)
- Established a buffer zone from 10- 25 km around outbreak:
 - ✓ 13 farms
 - ✓ No RZ, but additional measures
 - ✓ Voluntary slaughter or vaccinate urgently

Thank you for your attention
