Eradication: Final report for Avian Influenza 2019

For each approved annual or multi-annual programme Member States shall submit to the Commission by the 30 April each year an annual detailed technical and financial report covering the previous year. That report shall include the results achieved and a detailed account of eligible costs incurred (Art 14 of Regulation (EU) No 652/2014).

This form is for information only, no submission possible.

ID: 20200511-9MOVCCN6

Country code: FR

Reporting period

From: 2019

To: 2019

Year of implementation: 2019

1. Technical implementation of the programme

1.1 Description and evaluation of the evolution of the epidemiological situation, the technical implementation of the activities foreseen under the programme and the cost-effectiveness of the programme.

Au sujet de la surveillance "faune sauvage" : la surveillance des oiseaux sauvages a été effectuée sur tout le territoire, en comptant particulièrement sur la vigilance des chasseurs.

Pour ce qui concerne les animaux domestiques, la surveillance passive a été menée selon les modalités évoquées dans la note relative à l'enquête épidémiologique 2019.

Aucun cas d'IAHP n'a été mis en évidence en 2019, que ce soit au sein de la faune sauvage ou au sein d'exploitations d'oiseaux domestiques.

1.2 Details on the level of achievement of the targets set in the approved programme and technical difficulties.

Il n'y a pas eu d'anomalie remarquable au cours de cette mission. Néanmoins, les services déconcentrés ont relevé la difficulté d'effectuer certains prélèvements. Enfin, certains prélèvements étant effectués en abattoir, ils ne permettent pas d'avoir une vision globale.

1.3 Epidemiological maps for infection and other relevant data on the disease/activities (information on serotypes involved,...) (Please attach files of data using the PDF attachment feature) Use the textbox below to provide clarifications for the maps you attach, if needed.

Les données sont extraites de notre système d'information (SIGAL) sous la forme d'un tableau et n'ont pas fait l'objet d'une mise en page cartographique particulière.

Les effectifs concernant les dindes sont des effectifs globaux et ne font pas la différence entre l'élevage d'engraissement et les reproducteurs. Il en est de même pour les poules pondeuses.

Les tests de recherche H5 et H7 sont réalisés en même temps et sont enregistrés séparément dans le tableau A. Ceci fausse donc le nombre total d'élevages (souvent enregistrés 2 fois pour une même région).

2. TECHNICAL IMPLEMENTATION OF THE PROGRAMME ON AVIAN INFLUENZA

VERY IMPORTANT: Please fill out the following tables with figures corresponding to measures performed during the implementing period (1/1 to 31/12).

In the column "Total number of samples taken", please put 0 if the same samples have already been counted for another laboratory analysis (example : for HI-H5 and HI-H7 test, only 1 sample should be counted).

Table A - POULTRY HOLDINGS SAMPLED : SEROLOGICAL INVESTIGATION ACCORDING TO ANNEX I TO COMMISSION DECISION 2010/367/EU

Poultry category	NUTS2 Code	Total number of holdings	Total number of holdings sampled	Number of samples per holding	Total number of samples taken	Methods of laboratory analysis	Total number of tests performed per method
