Location of HPAI outbreaks July 2023

à la date du 11/07/2023

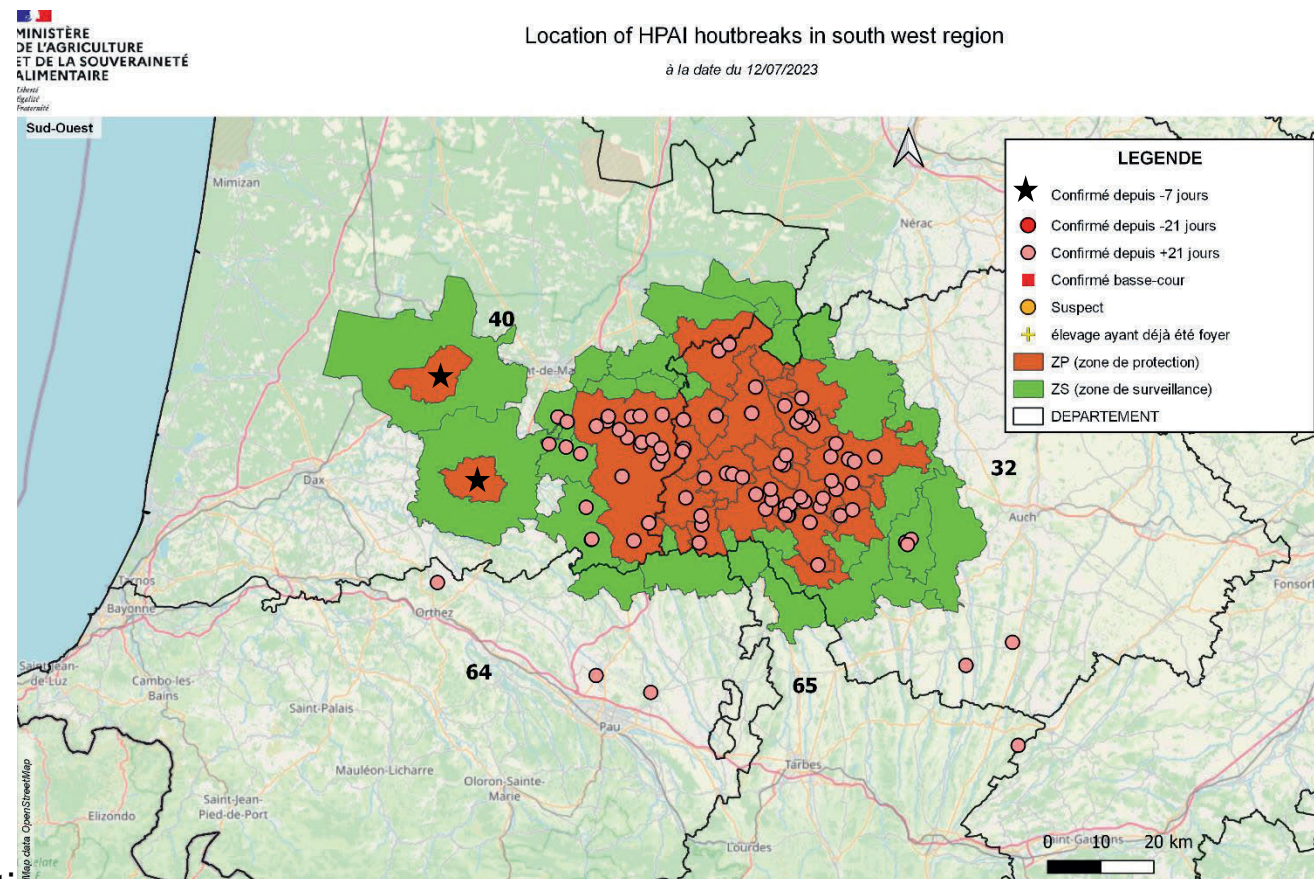

# HPAI situation in South West

**TOTAL number of outbreaks in poultry, since 4th May 2023 : 87**

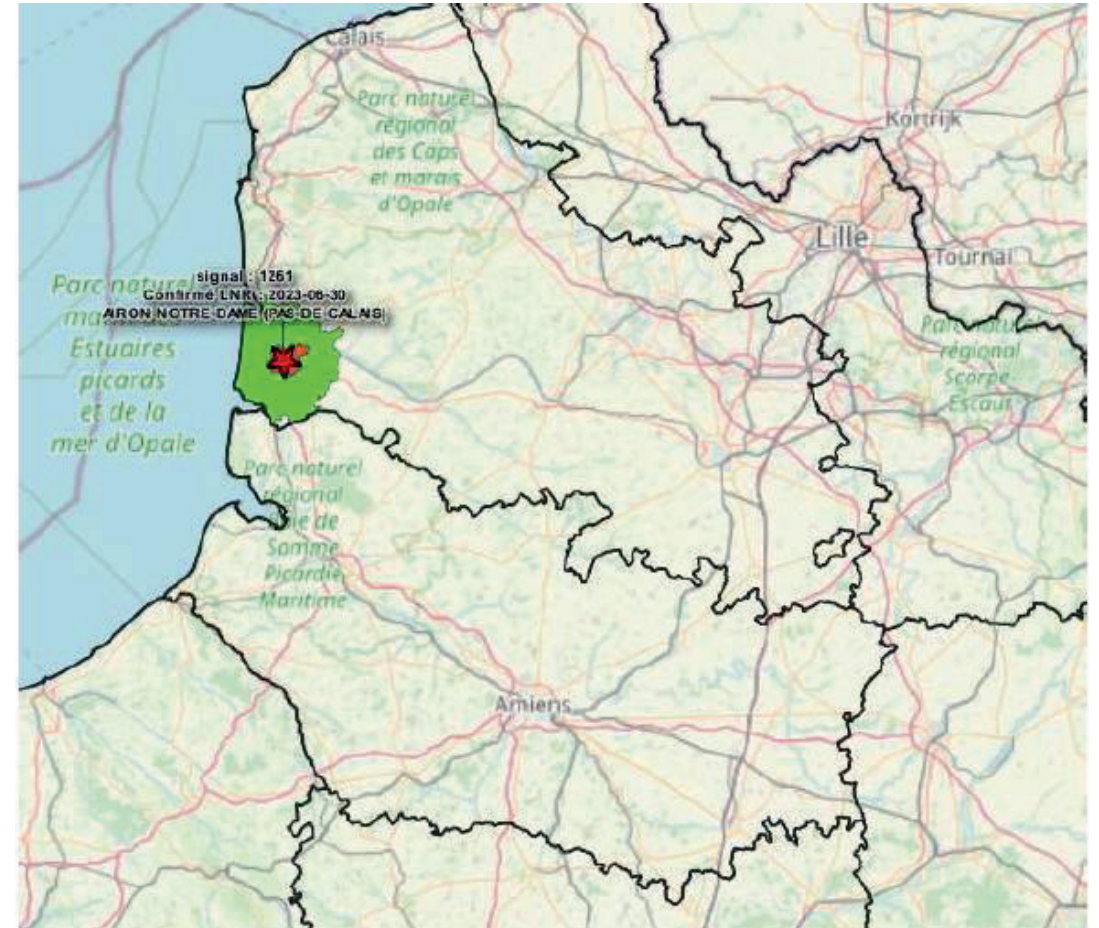

Regions/Departments	Poultry outbreak
<b>Nouvelle-Aquitaine</b>	<b>29</b>
40 , Landes	26
64 , Pyrénées-Atlantiques	3
<b>Occitanie</b>	<b>58</b>
32 , Gers	57
65 , Hautes-Pyrénées	1
<b>Total général</b>	<b>87</b>

- 2 new outbreaks confirmed on 11th of July in Landes department
- Located in high density area
- Duck farms
- Epidemiological investigations ongoing
- Protection and surveillance zones, with movements restrictions
- In affected farms : culling + cleaning/ disinfection

# HPAI situation in North

- A new outbreak confirmed on 30th of June, in Pas-de-Calais department
- Turkey farm
- No epidemiological links
- Protection and surveillance zones, with movements restrictions
- In affected farms : culling + cleaning/ disinfection

# Weekly evolution of the number of HPAI outbreaks in poultry

- **Phase 1 :** From September 2022 to Mid-November 2022

- Many primary introductions from wildlife
- Split distribution throughout France
- High proportion of captive birds affected

- **Phase 2 :** From Mid November to end of December

- Primary Introductions and inter-farm diffusion
- Concentrated mainly in the Great West
- Mainly affected poultry farms

- **Phase 3 :** From end of December to mid-March

- Incidence decreases
- Primary introductions
- Cluster in Côtes d'Armor department

- **Phase 4 :** From mid-March to beginning of May

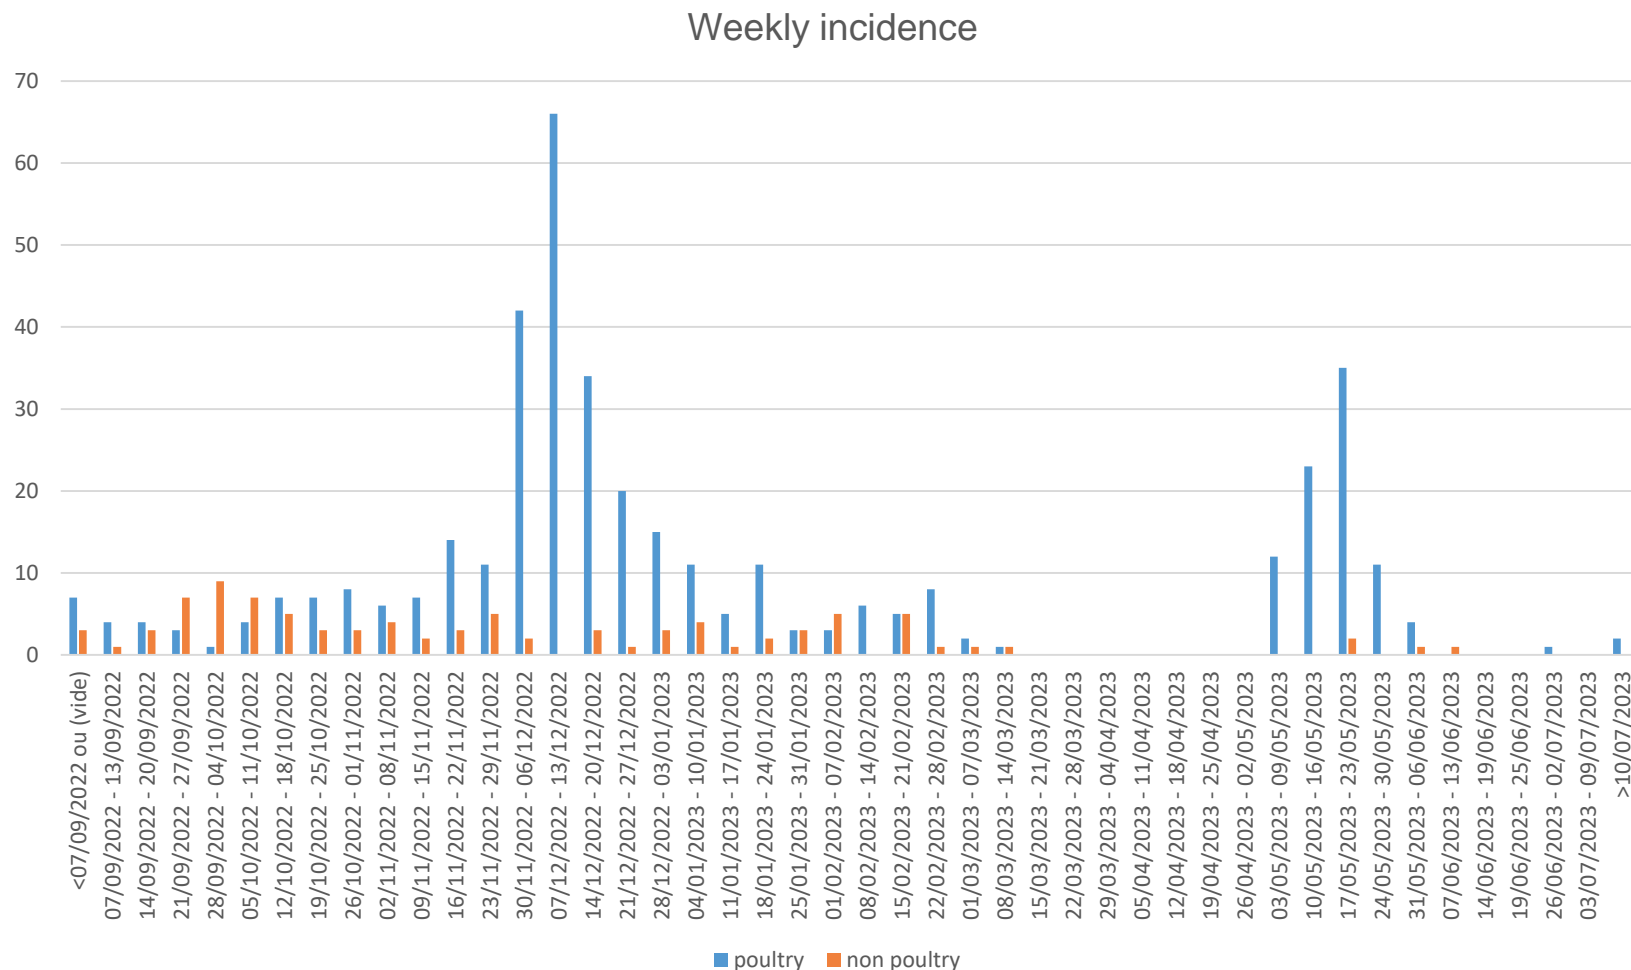

- Stabilization – no outbreaks except in wildlife

- **Phase 5 :** From 4th May to mid-June

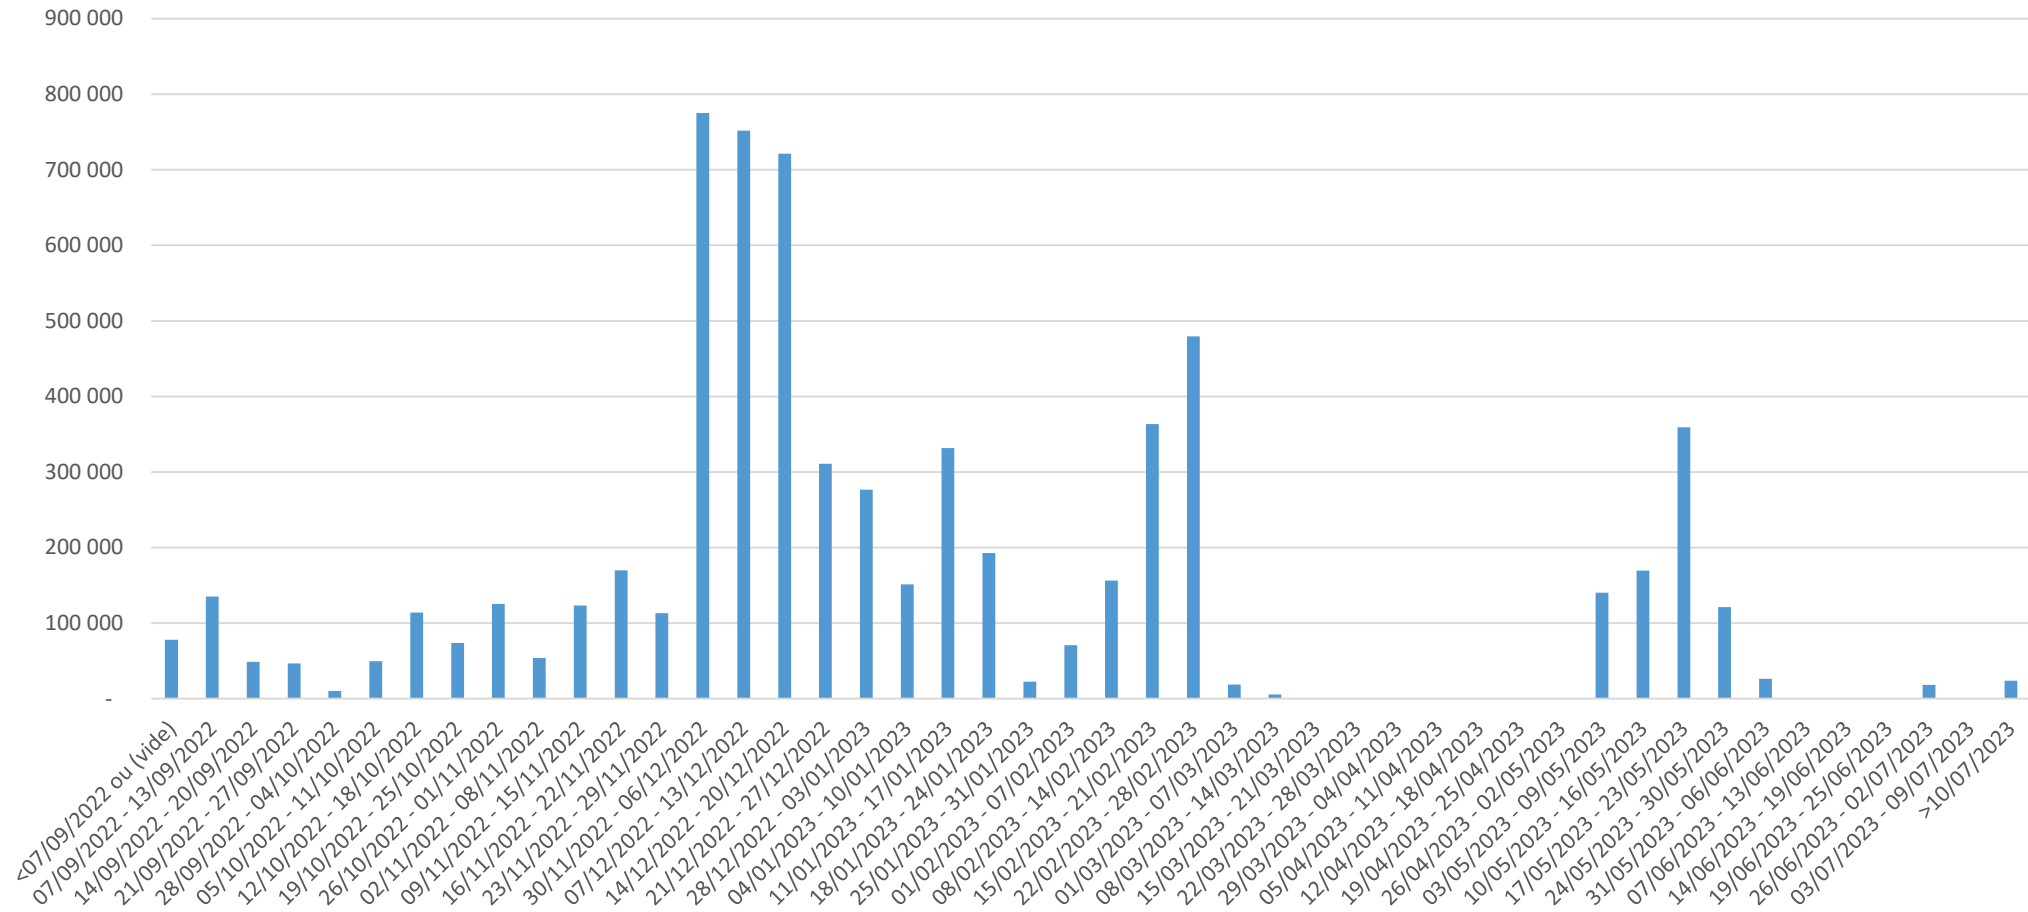

- Primary Introductions and inter-farm diffusion
- Concentrated mainly in the South West
- Mainly affected poultry farms

- **Phase 6 :** from late June until now

- Few isolated outbreaks

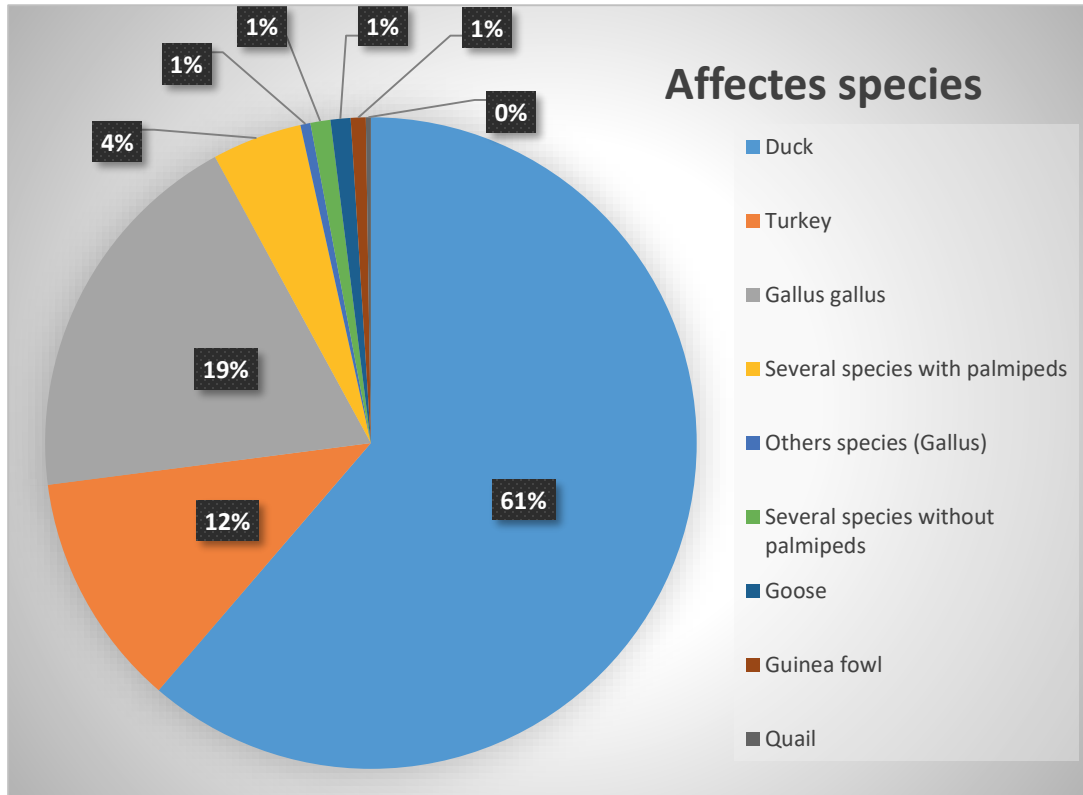

# Weekly evolution of the number of killed poultry in the outbreaks (excluding preventive depopulation)

**Total : 6 628 728**

# Affected species

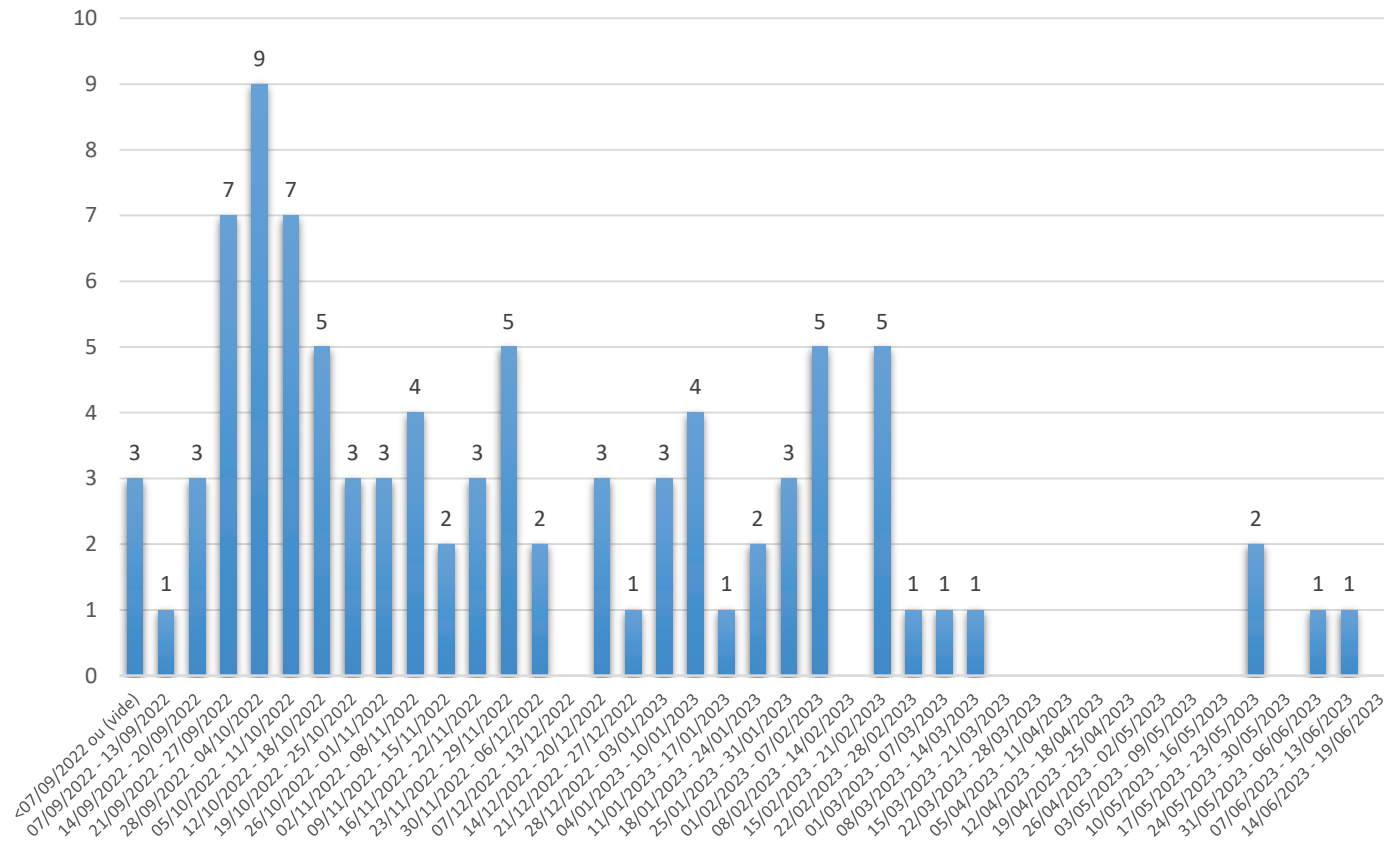

Affected species	Outbreaks
Duck	247
Turkey	47
Gallus gallus	77
Several species with palmipeds	18
Other species (gallus)	2
Several species without palmipeds	4
Goose	4
Guinea fowl	3
Quail	1
<b>Total général</b>	<b>403</b>

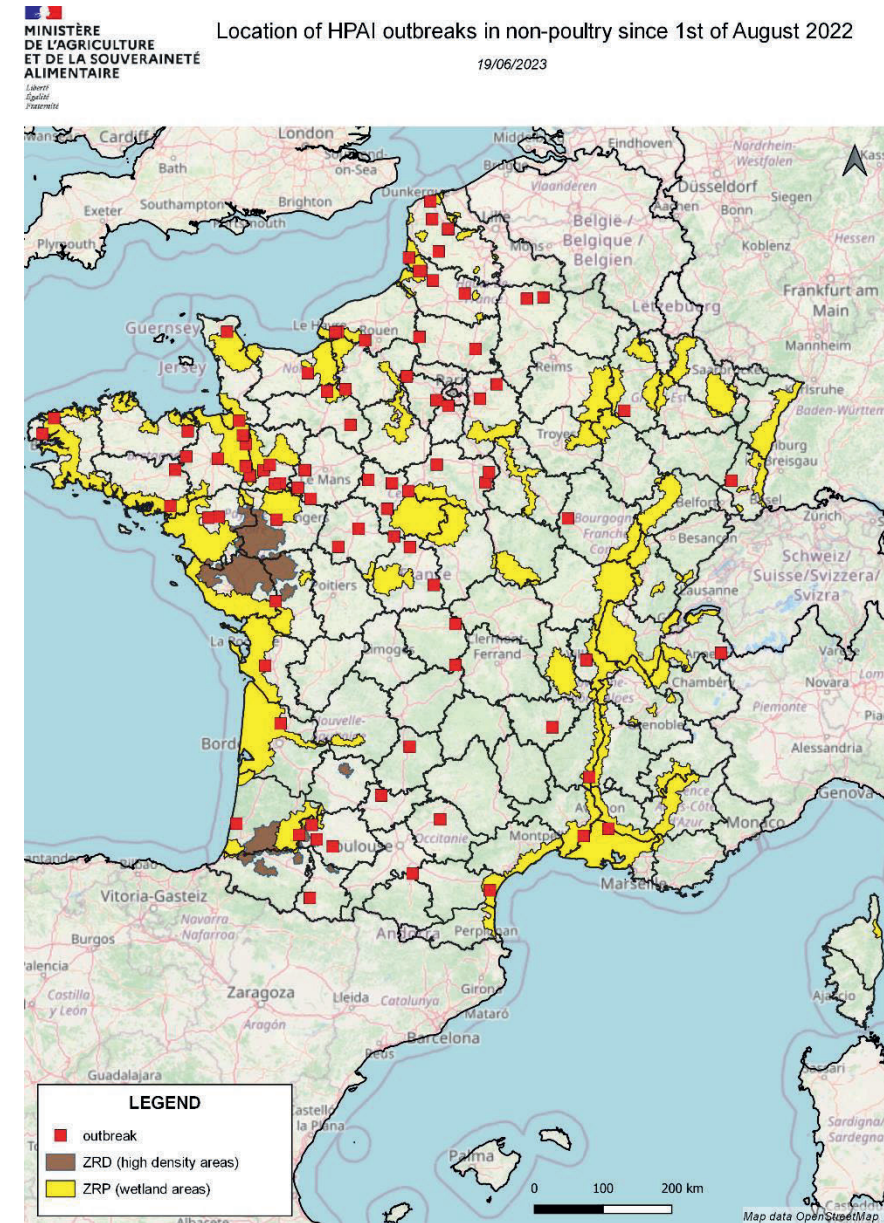

# HPAI in captive birds

**TOTAL in France, since 1 August 2022 : 92 outbreaks**

WEEKLY INCIDENCE

**+ One outbreak in La Réunion (974) (08/07/23)**

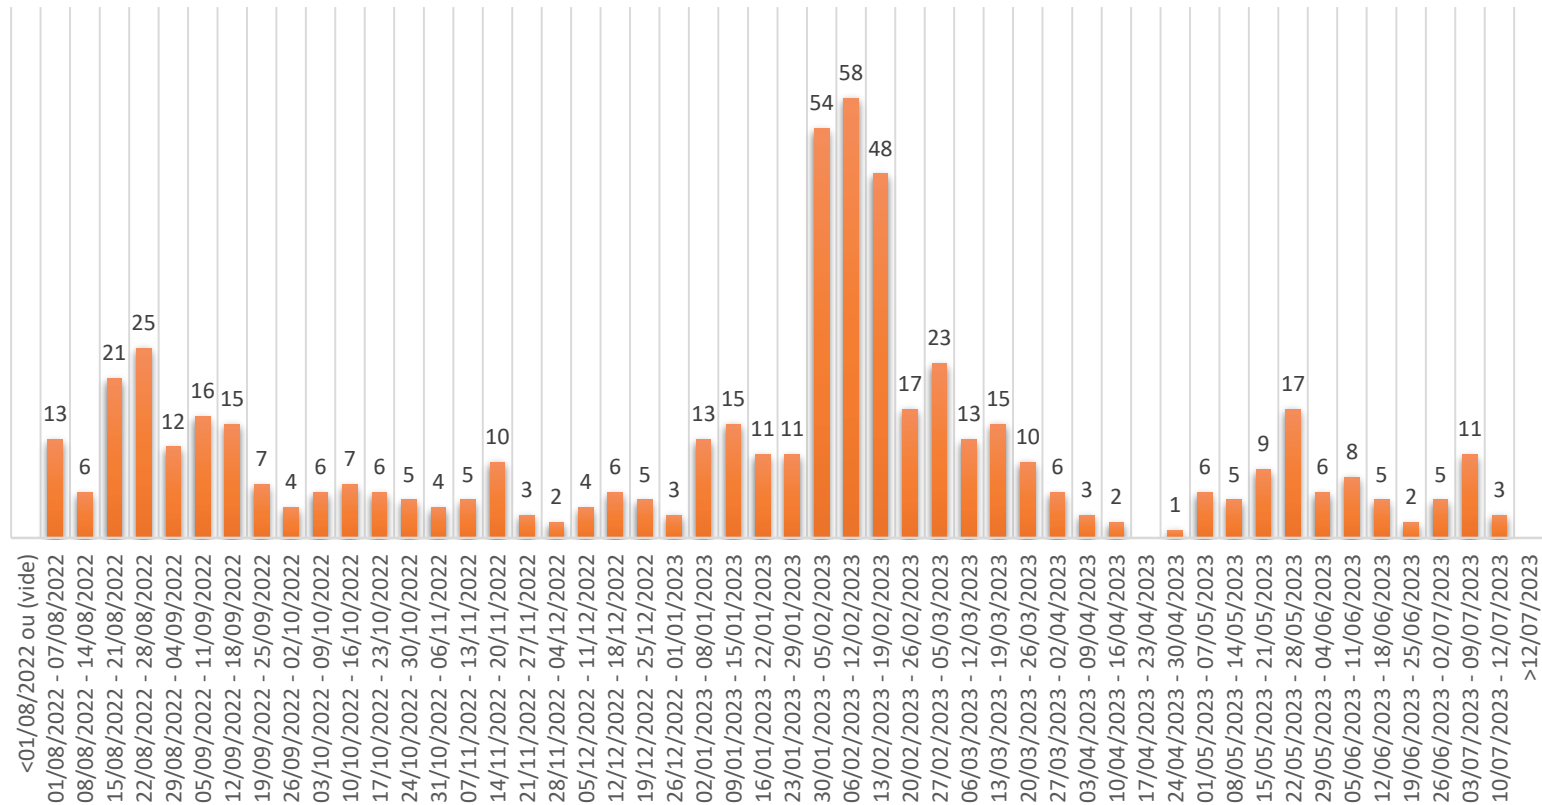

# HPAI cases in wildlife

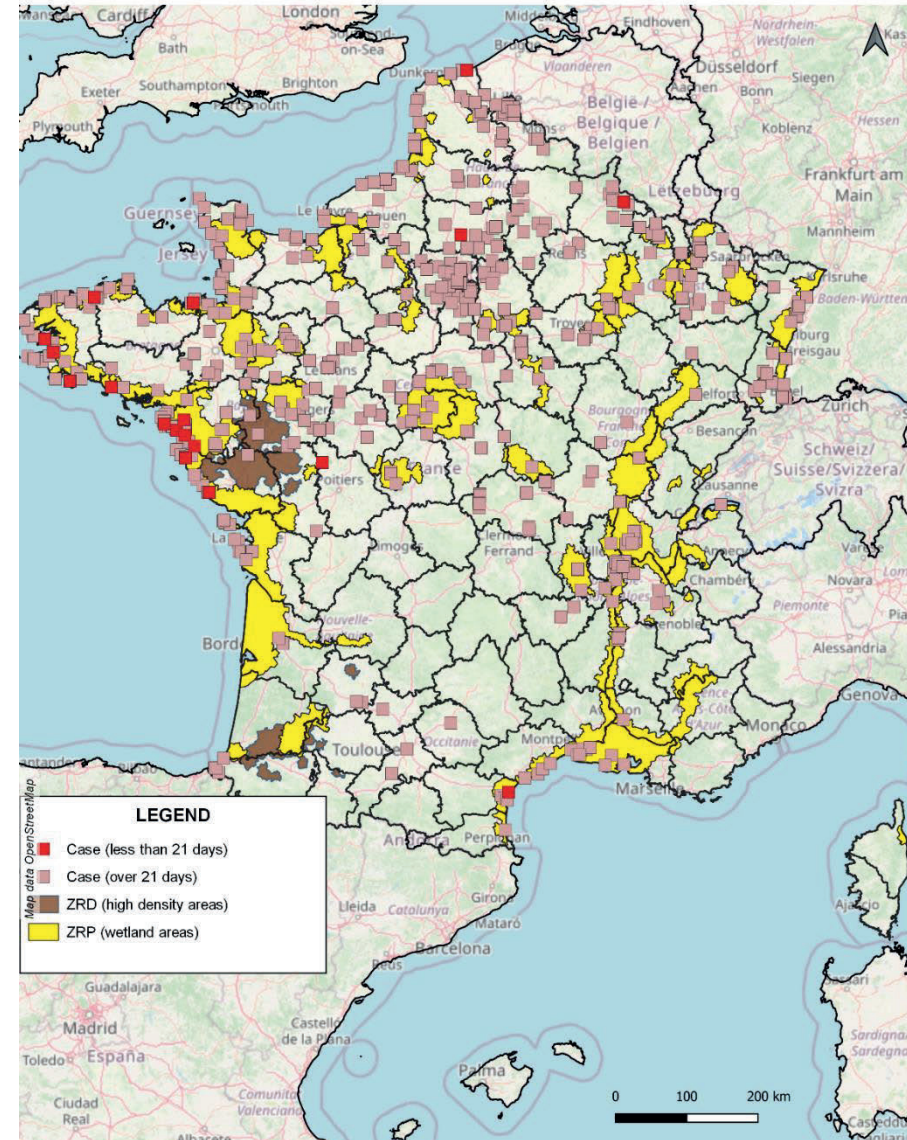

**TOTAL in France, since 1 August 2022 : 540 cases**

## WEEKLY INCIDENCE

Location of HPAI cases in wildlife since 1st of August 2022

12/07/2023

# PREVENTION MEASURES

# Lowering the level of risk throughout France

*Arrêté du 7 juillet 2023 qualifiant le niveau de risque en matière d'influenza aviaire hautement pathogène*

- HPAI risk level changed from "moderate" to "low" on July 11
- Applicable prevention measures :
  - Basic biosecurity prescribed by the legislation
  - Passive surveillance in farms and wild life

# Thank you for your attention
