WORKING DOCUMENT SANTE/2019/12772

Outcome of the evaluation procedure of survey programme submitted by Member States for Union financial contribution for 2020: list of the programmes technically approved and final amount for each programme.

Table of Contents

1. General information

The current legal framework for which a financial contribution from the Union for plant health survey programmes can be granted is Regulation (EU) No 652/2014[1] which entered into force on 30 June 2014.

Regulation (EU) No 652/2014 foresees that the Commission shall adopt the annual or multi-annual work programme by 30 April of the year preceding the execution of the measures of the work programme.

The work programme for the implementation of plant health survey programmes for the years 2019-2020 was adopted on 30 April 2018[2] and subsequently amended on 14 May 2019 by Commission Implementing Decision C(2019)3509[3].

In the work programme, the pest that may be co-funded in priority for the years 2019 and 2020 have been identified and divided into six priority category (A, B, C, D, E and F), on the basis of Annex III to Regulation (EU) No 652/2014 which sets out priorities for the Union financial support, as regards the orientation of survey programmes.

In order to ensure the financial support by the Union to the implementation by the Member States' competent authorities of the survey programmes for plant health, a financing Decision for the year 2019 and 2020 has been adopted on 10 September 2018[4] and the maximum Union contribution was set at EUR 30.500.000 for 2020.

This document aims at providing the Member States with the list of plant health survey pests programmes technically approved for a Union financial contribution for the year 2020 and the preliminary amount allocated to each programme.

Based on the provisions of Article 22 of Regulation (EU) No 652/2014 it contains:

- the list of national programmes technically approved and proposed for co-financing,
- the final amount allocated to each programme,
- the final maximum level of the Union financial contribution for each programme

Eligible costs concerning plant health surveys pests programme for the year 2020 are detailed in working document SANTE/10646/2016/Rev 4 ("*Guidelines for the Union co-funded programmes of Surveys programmes for pests*)[5]
