

Analysis of the main irregularities found during the non-discriminatory inspections and action plan in accordance with Article 27(2) of Regulation (EC) No 1/2005

1. ANALYSIS OF THE MAIN IRREGULARITIES FOUND DURING THE NON-DISCRIMINATORY INSPECTIONS

For the purpose of this annual report, the following have been considered to be major deficiencies:

1. documentary: completion and return of the CABs, transporter authorisations and means of transport, certificate of competence, etc.
2. Inadequate transport practices, available spaces and watering intervals.
3. Transport of unfit animals: pregnant females, animals with wounds or prolapses and unable to move by themselves.

2. ACTION PLAN TO CORRECT THE IRREGULARITIES DESCRIBED IN POINT 1

The main measures planned by the competent authorities to correct the irregularities are as follows:

1. Training: courses (welfare during transport, emergency slaughter) intended for veterinary inspectors, transporters
2. Strengthening of controls:
places: contests, fairs, markets, assembly centres and departures of intra-Community movements
documentation: CAB and certificates of competence,
fitness for transport, bovine animals
means of long-distance transport with satellite navigation systems
3. Intensify the systems for communicating legislation governing citizens
