

May 2024 REPORT ON EU AGRI-FOOD FRAUD SUSPICIONS

The purpose of the Monthly report on EU Agri-Food Fraud suspicions is twofold:

1. Assist Member States' authorities for the enforcement of the provisions of Article 9(2) of the Official Control Regulation which requires the organisation of risk-based controls to identify and combat fraudulent and deceptive practices along the agri-food chain (across some control areas listed in its Article 1(2)).
2. Provide valuable but selected information to stakeholders of the agri-food sector to perform adequate vulnerability assessments and identify new emerging risks.

Disclaimer: *The monthly report includes 'non-compliances with fraud suspicions' of cross-border nature identified and shared between members of the Alert and Cooperation Network (ACN) and retrieved from its three components: the Rapid Alert System for Food and Feed network (RASFF), the Administrative Assistance and Cooperation network (AAC) and the Agri-Food Fraud Network (FFN).*

The monthly report covers food, feedingstuff, materials and articles intended to come into contact directly or indirectly with food, animal welfare issues for farmed animals, plant protection products, veterinary medicinal products and other inputs that may end in the form of residues and contaminants in food and feed.

The monthly report does not reconcile data and suspicions related to the following subjects:

- *animal and plant health,*
- *release into the environment of Genetically Modified Organisms,*
- *animal welfare for companion animals,*
- *placing on the market and use of plant protection products, veterinary medicinal products and other inputs that are not ending as residues and contaminants in food and feed, and*
- *animal by-products and derived products when they not intended to be used for oral feeding to animals.*

Commission Implementing Regulation (EU) 2019/1715 of 30 September 2019 laying down rules for the functioning of the information management system for official controls and its system components ([the IMSOC Regulation](#)) defines a fraud notification as a " non-compliance concerning any suspected intentional action by businesses or individuals, for the purpose of deceiving purchasers and gaining undue advantage therefrom, in violation of the rules referred to in Article 1(2) of Regulation (EU) 2017/625".

The report includes 'non-compliances with fraud suspicions'. Those 'non-compliances' are not confirmed frauds but contribute alerting and triggering investigations by Member States competent authorities.

**THIS MONTH 281 SUSPICIONS WERE RETRIEVED
FROM 727 IRASFF NOTIFICATIONS.**
