# ASF situation in Italy

**Directorate General for Animal  
Health and veterinary medicinal  
products**

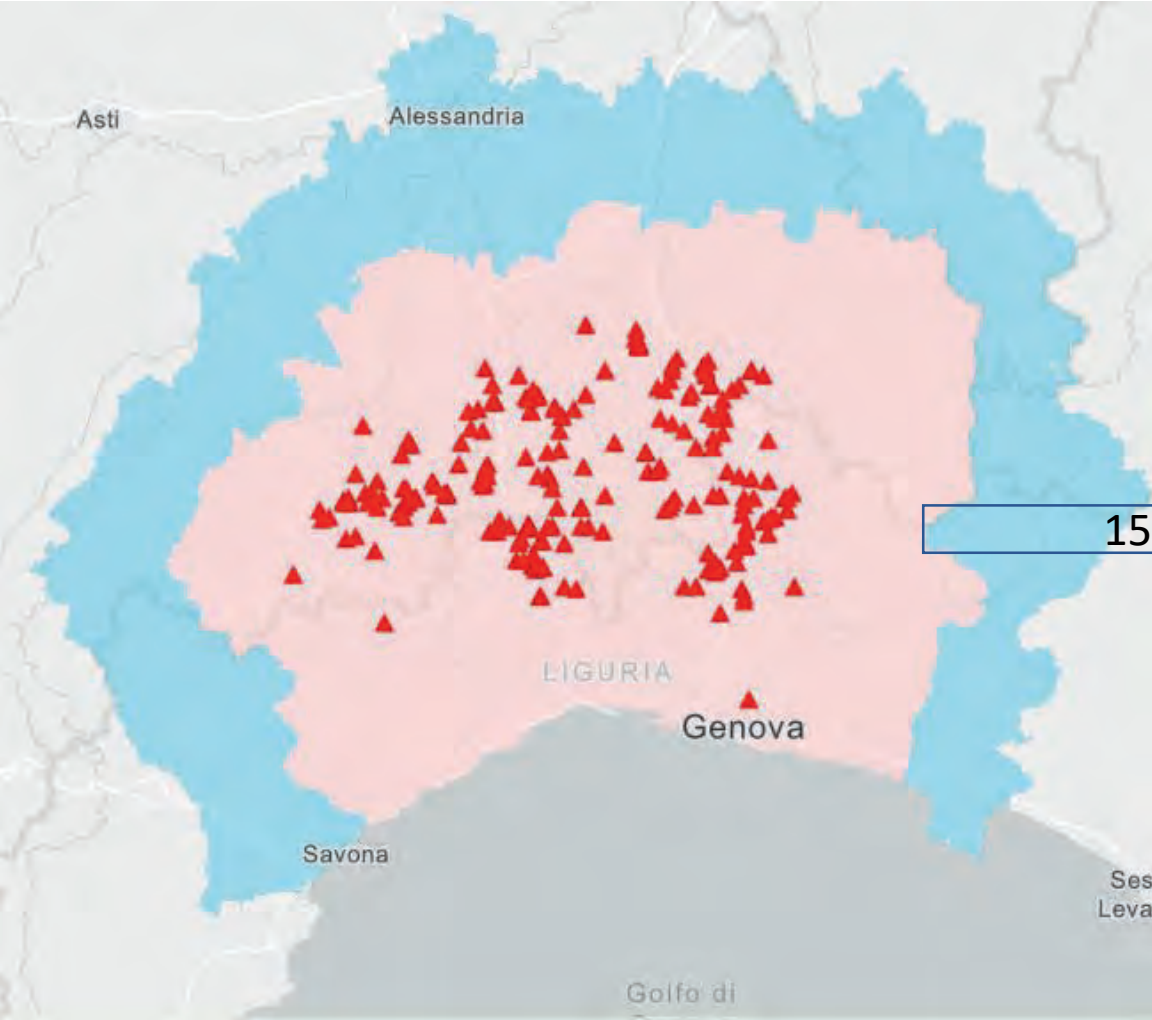

# Trend of outbreaks in wild boars at national level

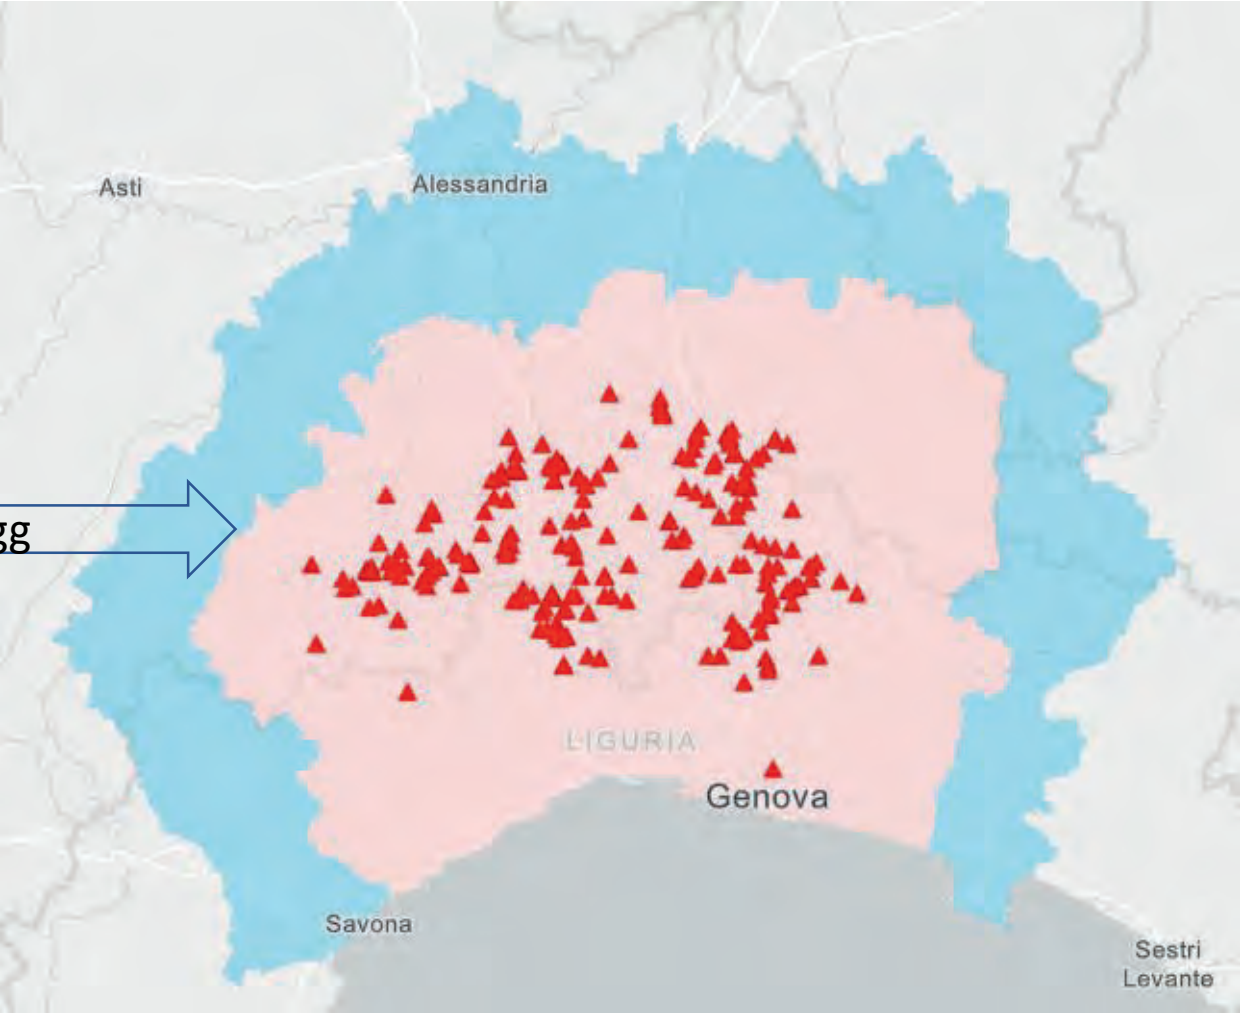

— Lazio 48    — Liguria 84 (+14)    — Piedmont 163 (+32)

# Piedmont and Liguria: Trend of positives cases in wild boars in the last 15 days

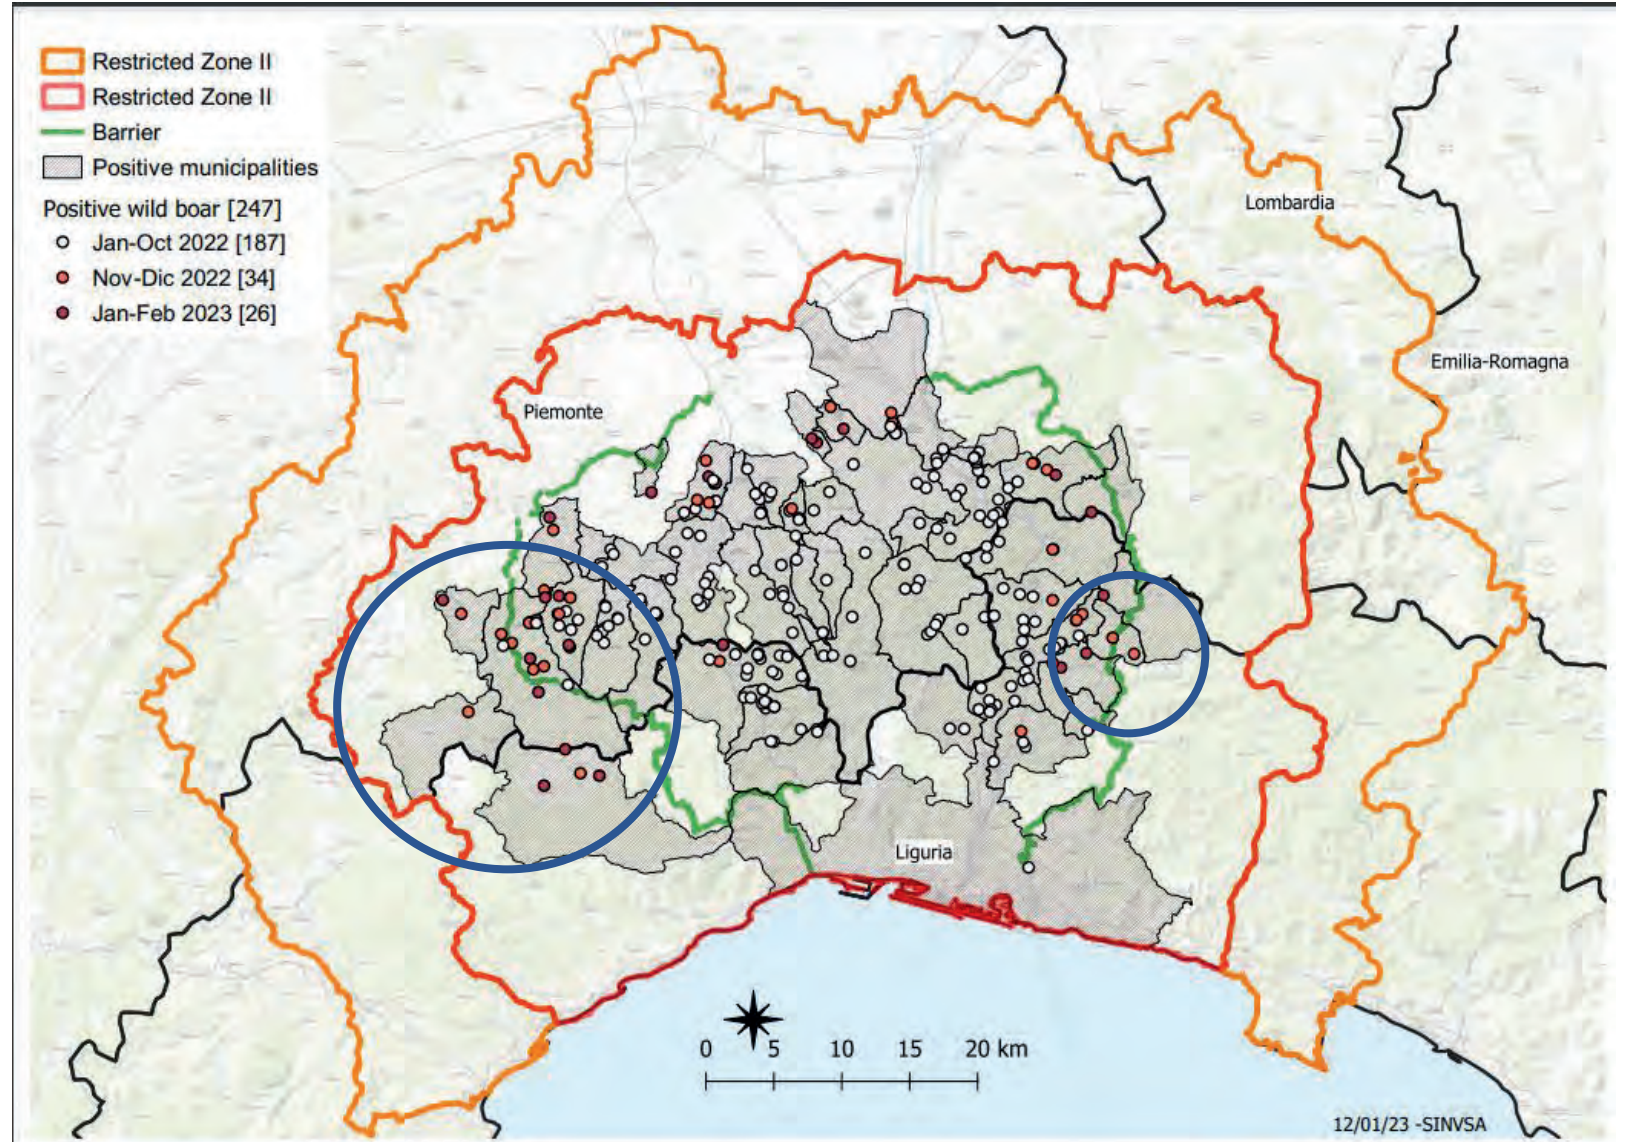

15 gg →

# WB outbreaks and barriers

Piedmont & Liguria: wild boars tested from 27/12/2021 to 12/01/2023

Number of tests are divided in three periods

# Next measures

- Widening and revision of the West and East line of fences
- Enlargement of restriction zones I and II in West part
- Revision of strategic approach to the eradication is ongoing
- Italy is looking for funds to install new fences and organize active search of carcasses by payment.

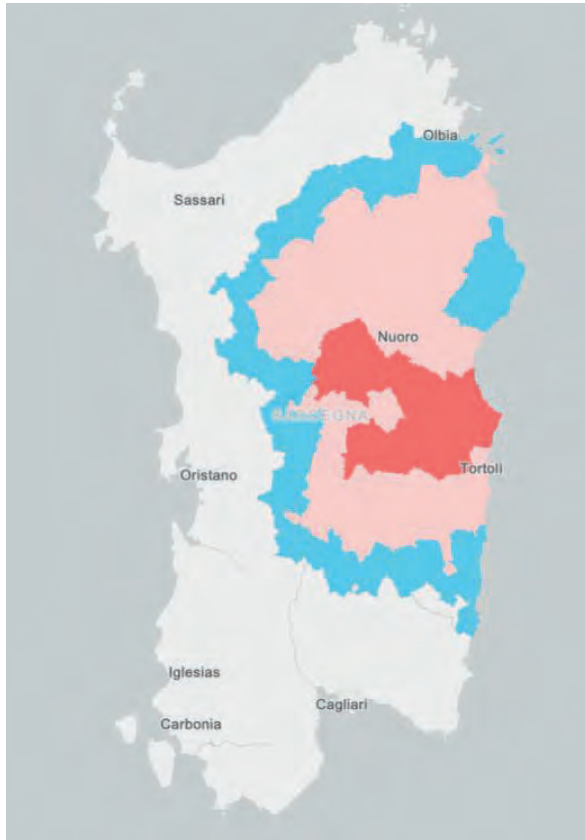

## Critical aspects

- Lack of funds to install new fences e to support the activities for eradication (monitoring and maintenance of the already installed fences, active searching of carcasses, activities for depopulation WB, strengthening of biosecurity measures of establishments)
- Opposition by local communities ( e.g. hunters, farmers, citizen) to the extension and strengthening of measures

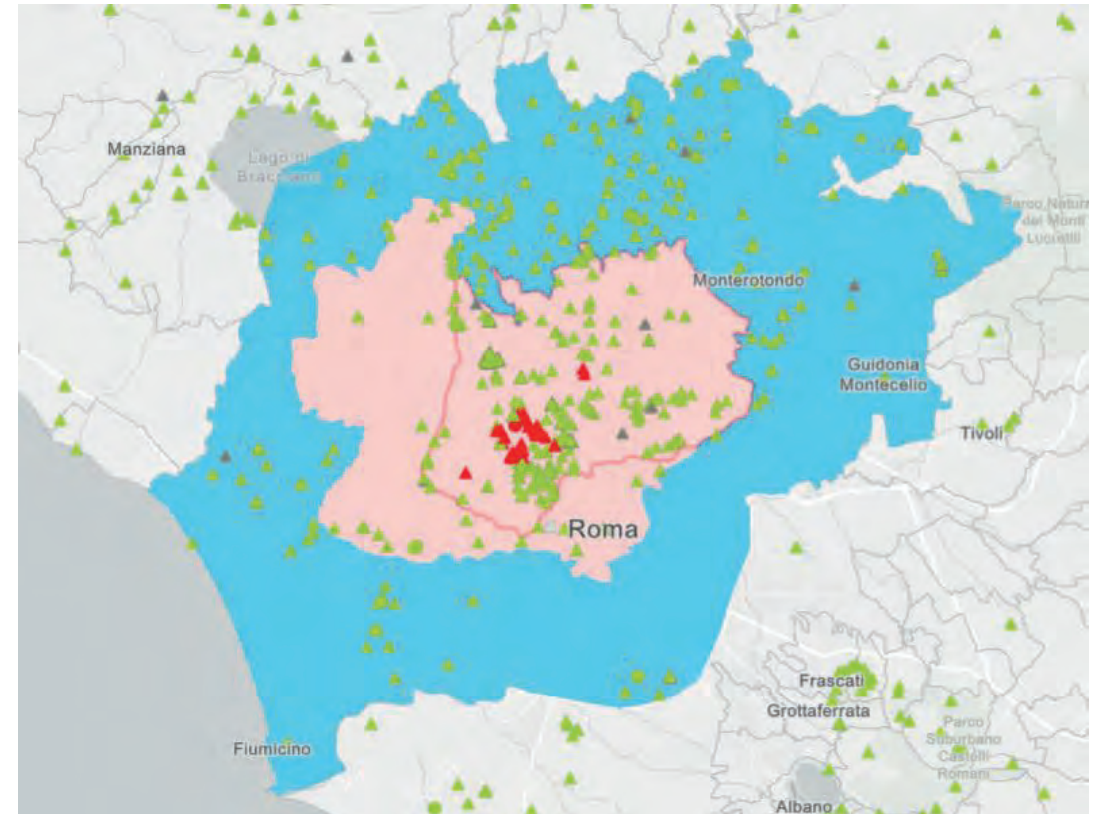

# Meanwhile in Sardinia and Lazio

Implementation of ongoing activities to maintain the positive results reached

Procedures for the application of Regulation (EU) 2021/605

Active search of carcasses is ongoing and the number of positive cases is stable as at the beginning of September
