| <b>SUMMARY REPORT</b> |
|-----------------------|

**B.01 Exchange of views and possible technical agreement of the Committee on a draft Commission Implementing Regulation establishing the list of animals and products subject to official controls at border control posts, including their codes from the Common Nomenclature.**

After a short introduction by COM, in which MS were informed about late changes to the Annex as regards food supplements (introduced to clarify that status quo is retained as regards such products), Member States were given some time to check with their national experts if the draft act as recently amended could be supported in a technical vote. NL raised questions related to animal by-products and the number of digits to be used in the CN codes. Those matters were clarified, but it eventually turned out that some Member States had not received any mandate as regards the late changes to the text. For that reason, Germany, Austria and Belgium decided to abstain but there was still a sufficient majority in favour of the draft regulation in the technical vote that followed.

**Vote Technical agreement**
