IPT–1483	43		

ASF outbreaks in 2017

29 outbreaks were confirmed:

- 2 in commercial farms
- 27 in non-commercial farms

Total population of pigs in Lithuania (data 01/09/2017)

The size of the farm	Number of herds	Number of pigs
1-10	16023	51257
11-100	392	8204
101-500	23	4688
501-1000	12	8552
Over 1000	50	518746
Total	16500	591447

Surveillance in domestic pigs in 2017

surveillance in domestic pigs

Testes carried out	Positive
PCR –4779	156
IFA –5307	2
IPT–718	7

Possible source of the outbreaks

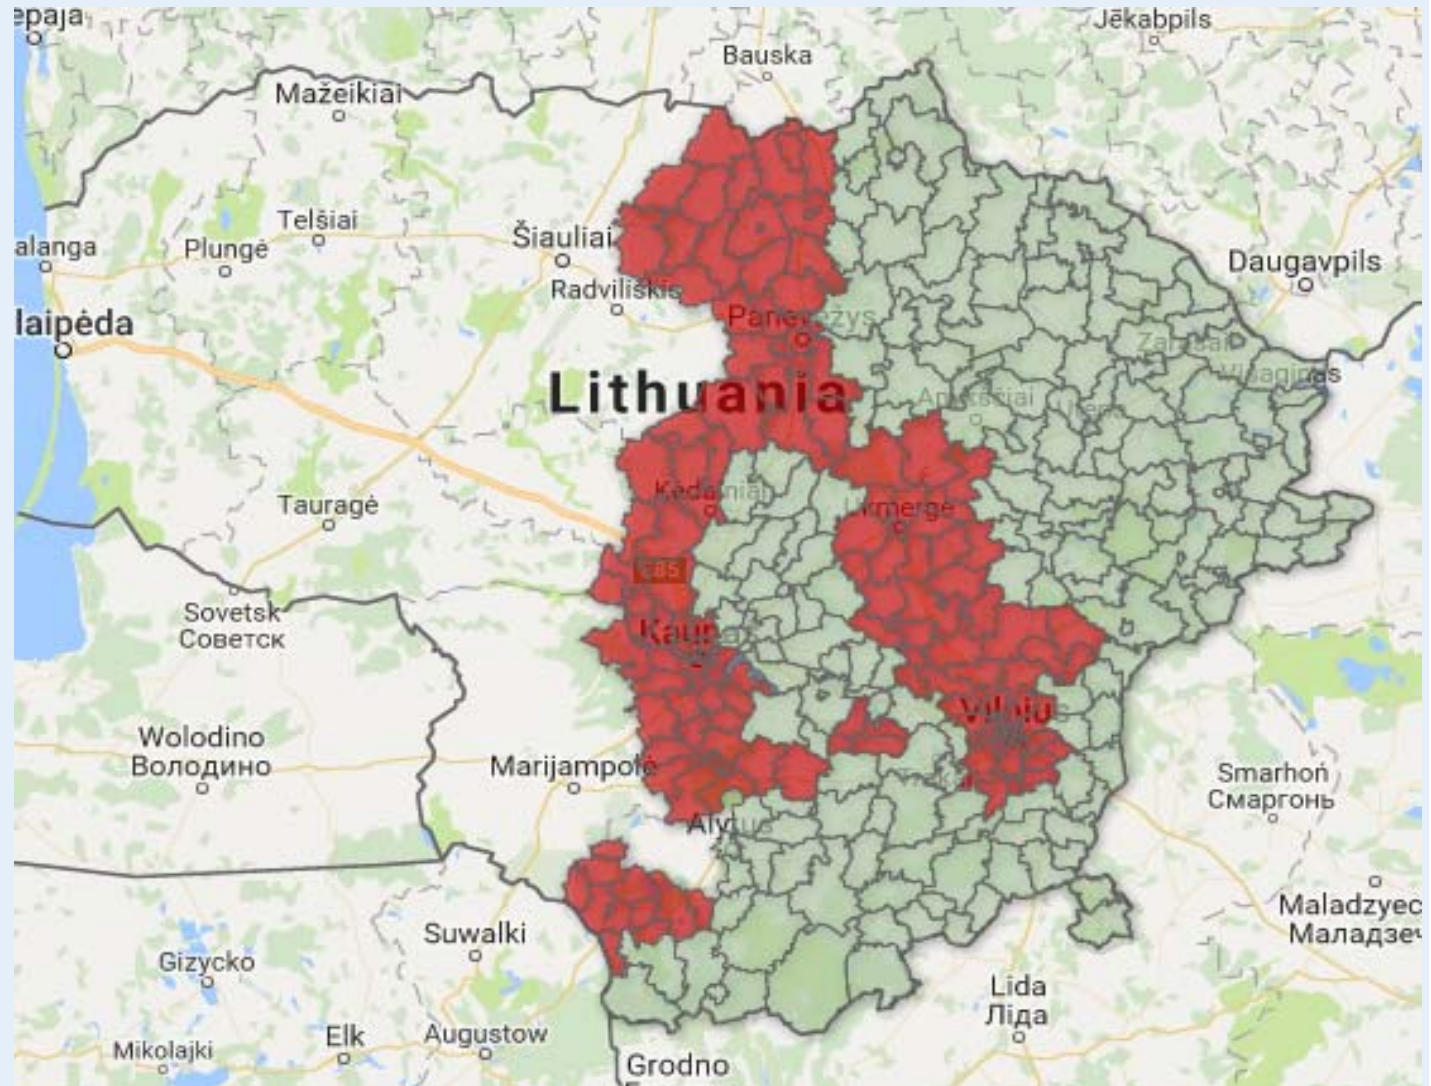

- Low biosecurity level in non-commercial farms;
- Direct or indirect contact with wild boars;
- Human factor;

New buffer zone was established (from 2017.05.26)

THE AIM → To check and eliminate farms with low biosecurity

- All farms are inspected by official control;
- Authorized veterinarians are involved;
- Farms which do not implemented biosecurity measures must slaughter pigs for own consumption (until 30 of September) and deliver samples for ASF testing.

Lithuania impose new changes for ASF control from October 2017 in order to motivate more hunters

New payment procedures:

- **for adult wild boar females only (older than 24 month) – 125 EUR (currently it is paid for 12-24 months – 50 EUR , for older than 24 months – 100 EUR);**
- **for information and destruction of wild boar carcass (for hunting clubs) – 60 EUR (currently it is paid for information regarding found dead wild boar – 30 EUR and veterinary service perform sampling and destruction of carcass).**

DĖMESIO!

NEPLATINKITE AFRIKINIO KIAULIŲ MARO VIRUSO!

- Nepalikite maisto atliekų poilsio aikštelėse.
- Maisto likučius būtina išmesti į uždromus šiukšlių konteinerius.

Maisto produktuose gali būti afrikinio kiaulių maro virusas. Tai žmogui nepavojinga, tačiau kiaulėms ir šernams mirtina infekcinė liga.

ATTENTION!

BE CAREFUL NOT TO SPREAD THE VIRUS OF AFRICAN SWINE FEVER!

- Do not leave any food waste in the rest area.
- Food waste must be discarded into closed waste containers.

The virus of African swine fever may be present in food. This is not hazardous for humans but for pigs and wild boars this is a deadly infectious disease.

For more details please see www.vmv.lt or call the phone +370 800 40 403

ВНИМАНИЕ!

НЕ РАСПРОСТРАНЯЙТЕ ВИРУС АФРИКАНСКОЙ ЧУМЫ СВИНЕЙ!

- Не оставляйте пищевые отходы на площадке отдыха.
- Остатки пищи обязательно выбросьте в закрытые мусорные контейнеры.

Вirus африканской чумы свиней может быть найден в пищевых продуктах. Вirus не вызывает никакой опасности для людей, но это смертельно опасная инфекционная болезнь для свиней и диких кабанов.
