Control measures

in accordance with Council Directive 2005/94/EC

Additional measures:

- Enlargement of the restrictive zones
- In the whole territory of the affected counties: transport of poultry can only take place based on negative PCR result
- Preventive killing/slaughter has been carried out – based on risk assessment – in protection zones, but in certain parts of the surveillance zones also
- No stocking can take place in the restricted zones

Other measures

CVO order 3/2017 is still in force – poultry should be able to be closed if ordered

CVO order 1/2020 on ordering closed keeping of poultry
