

SUMMARY RECORD OF THE APPEAL COMMITTEE

Genetically Modified Food and Feed

9 JUNE 2021

Chair: Claire Bury

1. Adoption of the Agenda

The agenda was adopted without amendments.

2. Exchange of views and possible opinion of the Committee on a draft Commission Implementing Decision authorising the placing on the market of products containing, consisting of, or produced from genetically modified oilseed rapes Ms8 × Rf3 × GT73, Ms8 × GT73 and Rf3 × GT73, pursuant to Regulation (EC) No 1829/2003 of the European parliament and of the Council

The Chair introduced the draft Decision authorising the placing on the market of products containing, consisting of or produced from genetically modified oilseed rapes Ms8 × Rf3 × GT73, Ms8 × GT73 and Rf3 × GT73, which was the same as that presented to the Standing Committee on 19 April 2021.

The Chair established whether any Member States had any further comments.

No Member State raised questions.

The Committee agreed to vote in written procedure in accordance with Article 3(5) of Regulation (EC) No 182/2011.

Vote taken by written procedure: no opinion

Reasons for the negative vote or abstention:

- No agreed national position
- Negative public opinion
- Political reasons
- Precautionary principle
- Scientific reasons

Written statement issued by Sweden:

“The authorization of placing on the market of products containing, consisting of, or produced from genetically modified rape-seed is on the agenda on the meeting mentioned above. The authorization does not include cultivation. GM-rape-seed Ms8 × Rf3 ×

GT73, Ms8 × GT73 och Rf3 × GT73 is tolerant to glufosinate-ammonium-based herbicides.

The Swedish Board of Agriculture and the National Food Agency make the same conclusion as stated by Efsa i.e. this product is safe for human and animal health as well as for the environment. Sweden therefore votes in favour of granting the product authorization according to the Commission proposal.

*This does not preclude the Swedish vote on a possible future granting of authorization of **cultivation** of seeds that are tolerant to glufosinate-ammonium.*

Glufosinate-ammonium has very serious properties and is classified as a substance toxic for reproduction in category 1B which means that it does not fulfil the approval criteria for active substances according to the Regulation (EC) No 1107/2009.

In our view, potential use and cultivation of genetically modified organisms in Sweden should not have a negative effect on biodiversity and, as far as possible, not lead to an increased use of pesticides.”

3. Exchange of views and possible opinion of the Committee on a draft Commission Implementing Decision renewing the authorisation for the placing on the market of feed and products other than food and feed containing or consisting of genetically modified oilseed rape GT73 (MON-ØØØ73-7) pursuant to Regulation (EC) No 1829/2003 of the European Parliament and of the Council

The Chair introduced the draft Decision authorising the placing on the market of feed and products other than food and feed containing or consisting of genetically modified oilseed rape GT73 (MON-ØØØ73-7), which was the same as that presented to the Standing Committee on 19 April 2021.

The Chair established whether any Member States had any further comments.

No Member State raised questions.

The Committee agreed to vote in written procedure in accordance with Article 3(5) of Regulation (EC) No 182/2011.

Vote taken by written procedure: no opinion

Reasons for the negative vote or abstention:
