Eradication: Final report for Avian Influenza 2019

For each approved annual or multi-annual programme Member States shall submit to the Commission by the 30 April each year an annual detailed technical and financial report covering the previous year. That report shall include the results achieved and a detailed account of eligible costs incurred (Art 14 of Regulation (EU) No 652/2014).

This form is for information only, no submission possible.

ID: 20200421-WB5VZT8S

Country code: PL

Reporting period

From: 2019

To: 2019

Year of implementation: 2019

1. Technical implementation of the programme

1.1 Description and evaluation of the evolution of the epidemiological situation, the technical implementation of the activities foreseen under the programme and the cost-effectiveness of the programme.

On the territory of the Republic of Poland the competent authority with regard to the implementation of the programme are the Veterinary Inspection bodies, i.e. The Chief Veterinary Officer, voivodeship veterinary officers, powiat veterinary officers.

The direct supervision over the programme in a district is exercised by the powiat veterinary officer, who is also responsible for the performance of any official activities under the programme.

In connection with the fact that across the territory of the Republic of Poland the density of the various species and production categories of poultry holdings is substantial, the programme was conducted across the territory of the state.

The sampling of the following poultry species and production categories were included in the surveillance programme in 2019:

- 1) laying hens;
- 2) free range laying hens;
- 3) chicken breeders;
- 4) turkey breeders;
- 5) duck breeders;
- 6) geese breeders;

- 7) fattening turkeys;
- 8) fattening ducks;
- 9) fattening geese;
- 10) farm game birds (e.g. pheasants, quails);
- 11) ratites (ostriches).

Number of holdings sampled in 2019:

- Chicken breeders: 59;
- Laying hens: 60;
- Free range laying hens: 54;
- Turkey breeders: 18;
- Fattening turkeys: 60;
- Ostriches: 22;
- Game birds: 35;
- Fattening ducks: 91;
- Duck breeders: 29;
- Fattening geese: 91;
- Geese breeders: 77.

The number of wild birds tested in passive surveillance was 31.

On territory of the Republic of Poland in 2019, there were no outbreaks of avian influenza in poultry and wild birds within the program. The testing of samples was carried out at the Laboratory of the Department of Poultry Diseases in the State Veterinary Institute - the State Research Institute in Puławy, which is the national reference laboratory.

All predicted action in frameworks of the programme was implemented on territory of Poland, in particular included kinds and production categories of the poultry determined in the program mentioned above became examinations.

Throughout the whole territory of Republic of Poland sampling for serological testing was stratified for avian influenza virus, so that samples can be considered as representative for the whole country.

1.2 Details on the level of achievement of the targets set in the approved programme and technical difficulties.

Within the passive surveillance, it was planned to examine approximately 50 wild birds found dead from the whole country. In 2019, 31 wild birds were tested under passive surveillance.

Purpose determined in the approved programme in relation to the number of holdings, which one should test samples up in serologic was achieved towards laying hens, turkey breeders, fattening turkeys, fattening ducks, free range laying hens, fattening geese holdings. Towards remaining kinds and production types of the poultry determined in the approved programme, number of farms, in which samples were taken, is smaller due to the number changing within one year of registered holdings and to the lack of the cast in some holdings.

1.3 Epidemiological maps for infection and other relevant data on the disease/activities (information on serotypes involved,...) (Please attach files of data using the PDF attachment feature) Use the textbox below to provide clarifications for the maps you attach, if needed.

n/a

2. TECHNICAL IMPLEMENTATION OF THE PROGRAMME ON AVIAN INFLUENZA

VERY IMPORTANT: Please fill out the following tables with figures corresponding to measures performed during the implementing period (1/1 to 31/12).

In the column "Total number of samples taken", please put 0 if the same samples have already been counted for another laboratory analysis (example : for HI-H5 and HI-H7 test, only 1 sample should be counted).

Table A - POULTRY HOLDINGS SAMPLED : SEROLOGICAL INVESTIGATION ACCORDING TO ANNEX I TO COMMISSION DECISION 2010/367/EU

Poultry category	NUTS2 Code	Total number of holdings	Total number of holdings sampled	Number of samples per holding	Total number of samples taken	Methods of laboratory analysis	Total number of tests performed per method
