

## Standard requirements for the submission of programmes of eradication and monitoring of TSE

Member States seeking a financial contribution from the Community for national programmes for the control and monitoring of transmissible spongiform encephalopathies (TSEs), shall submit applications containing at least the information set out in this form.

The central data base keeps all submissions. However only the information in the last submission is shown when viewing and used when processing the data.

If encountering difficulties, please contact [SANCO-VET-PROG@ec.europa.eu](mailto:SANCO-VET-PROG@ec.europa.eu), describe the issue and mention the version of this document: 2014 PROD 1.32

Instructions to complete the form:

Your current version of Acrobat is: 10.104

- 1) Be informed that you need to have at least the Adobe Reader version 8.1.3 or higher to fill and submit this form.
- 2) To verify your data entry while filling your form, you can use the "verify form" button at the top of each page.
- 3) When you have finished filling the form, verify that your internet connection is active and then click on the submit notification button below. If the form is properly filled, the notification will be submitted to the server and a Submission number will appear in the corresponding field.
- 4) **IMPORTANT: Once you have received the Submission number, save the form on your computer.**
- 5) If the form is not properly filled, an alert box will appear indicating the number of incorrect fields. Please check your form again and try to re-submit it according to steps 3), 4) and 5). Should you still have any difficulties, please contact [SANCO-BO@ec.europa.eu](mailto:SANCO-BO@ec.europa.eu).
- 6) For simplification purposes you are invited to submit multi annual programmes
- 7) As mentioned during the Plenary Task Force of 28/2/2014, you are invited to submit your programmes in English.

**IMPORTANT: AFTER SUBMITTING THE FORM DO NOT FORGET TO SAVE IT ON YOUR COMPUTER FOR YOUR RECORDS!**

Submission date

Monday, August 25, 2014 13:29:40

Submission number

1408965778993-3603

# Standard requirements for the submission of programmes of eradication and monitoring of TSE

## 1. Identification of the programme

Member state: BELGIQUE-BELGIE

Disease: Transmissible spongiform encephalopathies (TSEs)

This program is multi annual:

Type of submission:

Request of Union co-financing from beginning of:

To end of:

# Standard requirements for the submission of programmes of eradication and monitoring of TSE

## 1.1 Contact

Name : Bénédicte Verhoeven

Phone : +32 (0)2 211 85 84

Fax. : +32 (0)2 211 86 30

Email : benedicte.verhoeven@favv.be

## 2. Description of the programme

(max. 32000 chars) :

See programmes of the previous years.

There has been no publication of new regulatory texts, instructions, circulars, etc. since the demand for co-financing 2014.

- As of 1 January 2013, testing of healthy bovine animals for slaughter has been stopped (with the exception of bovine animals for slaughter born in Croatia, Romania and Bulgaria which are tested from the age of 30 months).
- Emergency slaughtered bovine animals and fallen stock are tested from the age of 48 months (with the exception of bovine animals born in Croatia, Romania and Bulgaria, which are tested from the age of 24 months).
- TSE testing in ovine and caprine animals consists of an at random sampling of 1500 dead sheep and of 500 dead goats.
- All bovine animals, ovine and caprine animals which are suspected of being affected by TSE, are subjected to analysis using different confirmation tests.
- In Belgium a voluntary breeding programme of sheep for selecting TSE resistant genotypes has been installed.

## 3. Description of the epidemiological situation of the disease

(max. 32000 chars) :

Every year the Federal Agency for the Safety of the Food Chain (FASFC) sends a report on the epidemiological monitoring of TSE to the European Commission, in accordance to the provisions of article 6, point 4 of Regulation (EC) n° 999/2001. In 2013 the epidemiological situation in Belgium has

# Standard requirements for the submission of programmes of eradication and monitoring of TSE

not changed : no cases of BSE have been observed in bovine animals and no cases of TSE in ovine or caprine animals. The last 2 cases of BSE in Belgium go back to 2006.  
Annex 1 represents the number of ruminants in Belgium for 2013, based on the SANITEL database (see point 4.3).

## 4. Measures included in the programme

### 4.1 Designation of the central authority in charge of supervising and coordinating the departments responsible for implementing the programme

(max. 32000 chars) :

The FASFC is competent for the programmes concerning BSE and Scrapie.

### 4.2 Description and delimitation of the geographical and administrative areas in which the programme is to be applied

(max. 32000 chars) :

The TSE (BSE and Scrapie) monitoring programme and the breeding programme for selecting TSE resistance in sheep is to be applied on the Belgian territory as a whole.

### 4.3 System in place for the registration of holdings

(max. 32000 chars) :

The coordinates of all herds and of the person responsible for the animals (keeper or owner) is saved in the databases for the registration of bovine animals (SANITEL-R) and of ovine, caprine and cervid animals (SANITEL-SGH).

\* The SANITEL-R database is fully operational since 1 July 1999 in accordance to Decision 1999/377/EC.

\* The SANITEL-SGH database is operational since 1996.

### 4.4 System in place for the identification of animals

# Standard requirements for the submission of programmes of eradication and monitoring of TSE

(max. 32000 chars) :

\* Bovine animals are identified by two earmarks according to the provisions of Regulation (EC) N° 1760/2000. In addition, an individual identification document (passport) is drawn up for each bovine animal. The data of each bovine animal are managed in the SANITEL-R database. The date of birth of each bovine animal is also registered in this database.

(Royal Decree of 23 March 2011 concerning the identification and registration of bovine animals.

\* Ovine, caprine and farmed cervid animals are identified by two earmarks according to the provisions of Regulation (EC) N° 21/2004. The data concerning each acquisition of earmarks shall be entered in the SANITEL-SGH database. No central registration concerning the age is mandatory for ovine, caprine and cervid animals.

Data concerning ovine animals registered in breeding books are maintained by the approved breed societies (KHV and SLE) in a specific database, and they are active in the framework of the TSE breeding programme.

## 4.5 Measures in place as regards the notification of the disease

(max. 32000 chars) :

In accordance to the animal health law of 24 March 1987 and to the Royal Decree of 3 February 2014 indicating animal diseases in application of Chapter III of the animal health law (cf annex 2) and regulating the notification obligation, BSE and scrapie are notifiable animal diseases since 18 September 1990.

The measures to be taken in case of a suspicion or confirmation of TSE are described in the Royal Decree of 17 March 1997 organizing the epidemiological surveillance of transmissible spongiform encephalopathies in ruminants (cf annex 1 of the request of cofinancing 2007).

## 4.6 Testing

### 4.6.1 Rapid tests in bovine animals

Targets for year **2015**

	Age (in months) above which animals are tested	Estimated number of animals to be tested	Estimated number of rapid tests, including rapid tests used for confirmation	
Animals referred to in Annex III, Chapter A, Part I, point 2.1, 3 and 4 of Regulation (EC) No 999/2001 of the European Parliament and of the Council	48	27 000	27 000	
Animals referred to in Annex III, Chapter A, Part I, point 2.2 of Regulation (EC) No 999/2001	30	300	300	
Bovines belonging to the cohort of a positive animal	24	50	50	<b>X</b>
Passive surveillance - clinical suspects	12	50	50	<b>X</b>
		<b>Add a new row</b>		

# Standard requirements for the submission of programmes of eradication and monitoring of TSE

## Targets for year **2016**

	Age (in months) above which animals are tested	Estimated number of animals to be tested	Estimated number of rapid tests, including rapid tests used for confirmation	
Animals referred to in Annex III, Chapter A, Part I, point 2.1, 3 and 4 of Regulation (EC) No 999/2001 of the European Parliament and of the Council	48	27 000	27 000	
Animals referred to in Annex III, Chapter A, Part I, point 2.2 of Regulation (EC) No 999/2001	30	300	300	
Bovines belonging to the cohort of a positive animal	24	50	50	<b>X</b>
Passive surveillance - clinical suspects	12	50	50	<b>X</b>
		<b>Add a new row</b>		

## Targets for year **2017**

	Age (in months) above which animals are tested	Estimated number of animals to be tested	Estimated number of rapid tests, including rapid tests used for confirmation	
Animals referred to in Annex III, Chapter A, Part I, point 2.1, 3 and 4 of Regulation (EC) No 999/2001 of the European Parliament and of the Council	48	27 000	27 000	
Animals referred to in Annex III, Chapter A, Part I, point 2.2 of Regulation (EC) No 999/2001	30	300	300	
Bovines belonging to the cohort of a positive animal	24	50	50	<b>X</b>
Passive surveillance - clinical suspects	12	50	50	<b>X</b>
		<b>Add a new row</b>		

## Targets for year **2018**

	Age (in months) above which animals are tested	Estimated number of animals to be tested	Estimated number of rapid tests, including rapid tests used for confirmation	
Animals referred to in Annex III, Chapter A, Part I, point 2.1, 3 and 4 of Regulation (EC) No 999/2001 of the European Parliament and of the Council	48	27 000	27 000	
Animals referred to in Annex III, Chapter A, Part I, point 2.2 of Regulation (EC) No 999/2001	30	300	300

## 4.7 Eradication

### 4.7.1 Measures following confirmation of a BSE case

#### 4.7.1.1 Description

(max. 32000 chars):

Article 2 of the Ministerial Decree of 13 March 2009 laying down certain measures for eradicating transmissible spongiform encephalopathies (cf annex 4 of the request of cofinancing 2010) allows to limit the eradication measures to animals belonging tot the cohort of the BSE positive animal and the progeny of a BSE confirmed female animal, depending on the epidemiological situation and traceability of the animals of the establishment concerned.

## 4.7.2 Measures following confirmation of a scrapie case

### 4.7.2.1 Description

(max. 32000 chars) :

The measures to be taken in case of a suspicion and confirmation of TSE are described in the above mentioned Royal Decree of 17 March 1997.

Belgian legislation provides no mandatory slaughtering instead of killing and destroying animals in positive holdings, the progeny of positive animals, etc.

Article 3 of the above mentioned Ministerial Decree of 13 March 2009 allows that some animals having a specific well known genotype are protected from eradication measures.

Namely :

Art. 3. § 1. In case of a TSE confirmation, other than BSE, in an ovine or caprine animal, the following animals are killed and destroyed :

## Standard requirements for the submission of programmes of eradication and monitoring of TSE

1° insofar as they are identifiable, the parents, and in the case of females all embryos, ova and the last progeny of the female animal in which the disease was confirmed;

2° all other ovine and caprine animals on the holding of the animal in which the disease was confirmed.

§ 2. At the request of the person in charge and without prejudice to the above mentioned Regulation (EC) N° 999/2001, the provisions of §1 are not applied :

1° to the following ovine animals, unless it concerns classic scrapie confirmed in a sheep having a resistant genotype :

a) breeding rams with the ARR/ARR genotype;

b) breeding ewes carrying at least one ARR allele and no VRQ allele and, where such breeding ewes are pregnant at the time of the inquiry, the lambs subsequently born, representing the same genotypical characterizations;

c) ovine animals carrying at least one ARR allele which are intended solely for slaughter;

2° lambs and kids less than three months old which are intended solely for slaughter;

3° for all ovine and caprine animals present in the holding to which the animal in which the disease has been confirmed belongs, in case of a confirmation of an atypical scrapie in an ovine or caprine animal.

§ 3. In the holdings where a derogation from the eradication measures is allowed in accordance to § 2, 3°, the following conditions are applied during a period of two years following the last confirmation of a TSE :

1° all ovine and caprine animals are identified;

2° on the holding there is an intensified TSE monitoring, including a TSE analysis on ovine and caprine animals over 18 months of age which have more than two permanent incisors erupted through the gum, and which are either slaughtered for human consumption at the end of their productive life or have died or been killed on the holding and which have not been killed in the framework of an animal disease eradication campaign.

3° ovine and caprine animals are only allowed to leave the holding when they are directly slaughtered for human consumption or killed for destruction. However, by derogation lambs and kids may be moved to one other holding solely for the purposes of fattening prior to slaughter on the condition of having obtained the approval of the Agency, stipulating that the holding of destination does not contain any ovine or caprine animals other than those being fattened prior to slaughter and that the holding does not ship any living ovine or caprine animals to other holdings, except for direct slaughter;

4° on the holding it shall be prohibited to ship or export ova and embryos of ovine and caprine animals to other holdings or to other member states;

5° on the holding it shall be prohibited to ship or export living ovine and caprine animals to other member states;

§ 4. Transporting ovine and caprine animals, as referred to in § 3, to a slaughter-house or a destruction company, where in the framework of intensified TSE monitoring, these animals have to be subjected to a TSE analysis, is solely allowed when the animals are accompanied by a transport document issued by the veterinary inspector or his representative.

§ 5. If the infected animal has been introduced from another holding than the holding referred to in § 1, 2°, eradication measures, based on the history of the infected animal, are applied to the holding of origin in addition to, or instead of, the holding in which the infection was confirmed. In the case of land used for common grazing by more than one flock, these measures may be limited to a single flock based on a reasoned consideration of all the epidemiological factors.

Where more than one flock is kept on a single holding, these measures may be limited to the flock in which scrapie has been confirmed.

### 4.7.3 Breeding programme for resistance to TSEs in sheep

#### 4.7.3.1 General description

*Description of the programme according to the minimum requirements set out in Annex VII, Chapter B of Regulation (EC) No 999/2001*

*(max. 32000 chars) :*

The implementation of the breeding programmes, in accordance with Annex VII of Regulation (EC) N° 999/2001, is supervised by 2 approved breeding associations namely "Kleine Herkauwers Vlaanderen (KHV)" and "Stichting Levend Erfgoed (SLE)", both report to the FASFC.

KHV and SLE are in charge of the central database in which all information (flock identification, animal identification and genotypes) is registered and of the delivery of the certificates. All genotyping tests must be performed in an approved laboratory (ARSIA, CODA-CERVA, Progenus, ULg).

Since April 1st 2005, the breeding programme is obligatory for all KHV members who breed purebred sheep. Other breeders can participate to the programme on a voluntary basis.

All animals participating to the breeding programme should be individually identified.

All breeding rams belonging to a herd participating to the breeding programme, have to be genotyped before they are used for breeding purposes. Donor rams, of which the semen is used for artificial insemination, should meet the same conditions.

All breeding rams with a VRQ-allele have to be excluded from the studbook within 6 months after the receiving of the result of the genotyping test.

All ewes, that are registered in the central database, having a VRQ-allele, can't leave the herd, unless for slaughtering.

## Standard requirements for the submission of programmes of eradication and monitoring of TSE

### 5. Costs

#### 5.1 Detailed analysis of the costs

(max. 32000 chars) :

Costs for rapid tests, confirmation tests and discriminatory tests : see survey in point 5.2.

\* Costs for animal compensation :

- animals suspected of BSE and bovine animals killed for brain research : compensation equals the value of the bovine animal with a maximum of 2,500 € per animal (Royal Decree of 17/03/1997, art. 6 : cf annex 1 of the request of cofinancing 2007).
- Ruminants which have been killed in accordance to point 2 of annex VII of Regulation (CE) N° 999/2001: compensation equals the value of the bovine animal with a maximum of 2,500 € per animal (Royal Decree of 17/03/1997, art. 15 : cf annex 1 of the request of cofinancing 2007).
- Bovine animals slaughtered before BSE suspicion and of which the carcasses have been confiscated after epidemiological testing : compensation based on the classification of the carcass with a maximum of 2,500 € per animal (Royal Decree of 17/03/1997, art. 15, § 1 at a request of cofinancing 2007 - royal Decree of 10/06/2001 concerning compensation of animals which have been positive in the approved rapid BSE Test : cf annex 16 of the request of cofinancing 2005).
- Neighboring carcasses : the owner(s) of the confiscated carcass immediately preceding and the two confiscated carcasses immediately following the carcass that has reacted inconclusively on a rapid BSE test, shall be allowed a compensation charged to the Budgetary Fund for animal health and quality of animal products based on the classification of carcass according to the following formula :  
Compensation = weight X official price. This compensation shall be maximum 2,500 € per animal (Royal Decree of 17/03/1997, art. 15, § 4 : cf annex 1 of the request of cofinancing 2007).

6.2 Compensation for ovine and caprine animals to be culled and destroyed under the requirements of Annex VII, Chapter B, point 2.2.2 of Regulation (EC) No 999/2001 (as referred to in point 4722)	/	200	260	52000	yes	<b>X</b>
				<b>Add a new row</b>		
6.3 Compensation for ovine and caprine animals to be sent for compulsory slaughter in application of the provisions of Annex VII, Chapter B, point 2.2.2 (b) and (c) of Regulation (EC) No 999/2001 (as referred to in point 4722)	Not foreseen in Belgian legislation	0	0	0	no	<b>X</b>
				<b>Add a new row</b>		
<b>Total</b>				461 579,00 €		

## Standard requirements for the submission of programmes of eradication and monitoring of TSE

### 5.3 Co-financing rate:

*The maximum co-financing rate is in general fixed at 50%. However based on provisions of Article 5.2 and 5.3 of the Common Financial Framework, we request that the co-financing rate for the reimbursement of the eligible costs would be increased:*

- Up to 75% for the measures detailed below
- Up to 100% for the measures detailed below
- Not applicable

### 5.4 Source of national funding

*Please specify the source of the national funding:*

- public funds*
- food business operators participation*
- other*

## Standard requirements for the submission of programmes of eradication and monitoring of TSE

*Please provide details on the source of national funding (max 32000 characters)*

All tests (rapid, confirmatory, discriminatory and genotyping tests) performed are financed by the FASFC.  
The genotyping tests done in the framework of the breeding programme are financed by the Flemish Region.  
The compensation of culled animals is financed by the Sanitary Fund for bovine animals or by the Sanitary Fund for small ruminants.

## Standard requirements for the submission of programmes of eradication and monitoring of TSE
