### **Feedback:**

*On behalf of the consortium “Common representation of Substances of Human Origin's (SoHO)” we endorse the roadmap proposed by the EC for the evaluation of the EU blood and tissues and cells legislation.*

*Moreover, we reinforce the view of the EC that to define technical safety and quality requirements for all stages of the chain from donor to recipient (B1), and propose the involvement of the end users and clinicians, as a way to fully monitor the safety and efficacy of SoHO.*

*The consortium also would like to underline the relevance of the inclusion of following issues in the current evaluation:*

- *Avoidance of paid donation and financial gain associated with SoHO activities, based on the argument that economical motivation may have potential impact in the quality and safety;*
- *Promotion of mutual recognition of TEs and NCAs' activities within the different Member States.*
