AHW.A.05.(IDC).(GERMANY)-HPAI in Germany

# Highly pathogenic avian influenza Germany - current situation

SCoPAFF – 14-15 December 2023

Dr. Rudolf Span – BMEL

[bmel.de](https://www.bmel.de)  

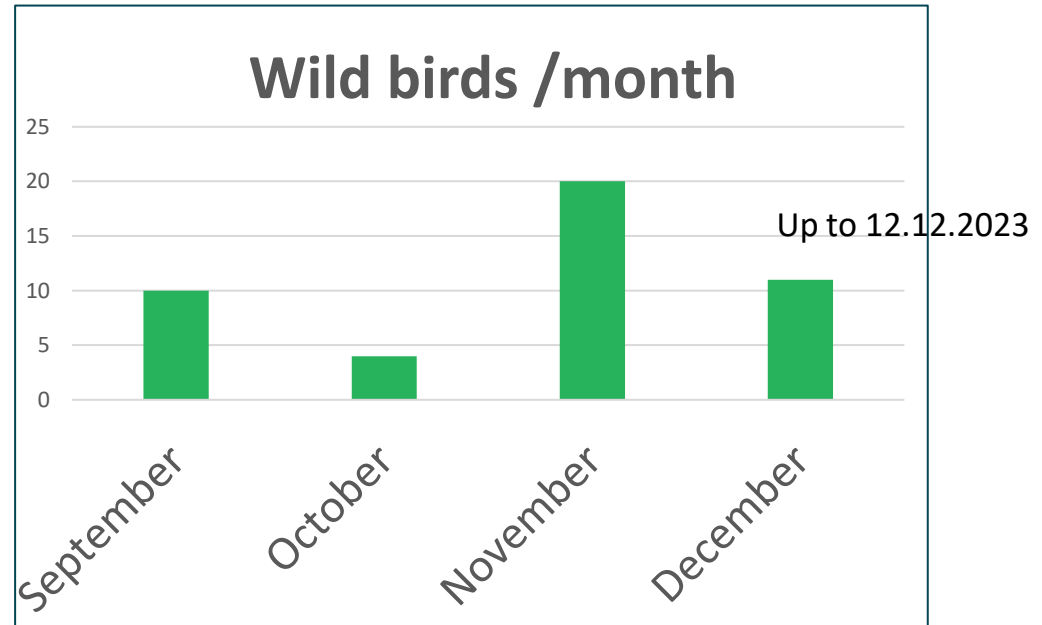

# HPAI in Poultry

- **10 outbreaks** in the new season from October until 12 December 2023).
- 6 of them in turkeys for fattening.
- **Control measures including stamping out and zoning** have been carried out.

# HPAI in Wild birds

- **11 outbreaks in December 2023**  
(up to 12th December 2023)

# Conclusions

- Awareness and preparedness very important.
- No cluster occurred by now: Has to be prevented!
- Biosecurity measures in poultry, captive birds and trade establishments.

# Thank you for your attention!
