Eradication: Final report for Transmissible Spongiform Encephalopathies 2019

For each approved annual or multi-annual programme Member States shall submit to the Commission by the 30 April each year an annual detailed technical and financial report covering the previous year. That report shall include the results achieved and a detailed account of eligible costs incurred (Art 14 of Regulation (EU) No 652/2014).

This form is for information only, no submission possible.

ID: 20200310-B9NVEJXY

Country code: AT

Reporting period

From: 2019 To: 2019 Year of implementation: 2019

1. Technical implementation of the programme

1.1 Description and evaluation of the evolution of the epidemiological situation, the technical implementation of the activities foreseen under the programme and the cost-effectiveness of the programme.

In Austria the epidemiological situation of BSE and Scrapie is stable.

There was neither a case of BSE nor a case of classical or of atypical Scrapie in the year 2019.

The number of suspected cases placed under official movement restrictions in accordance with Article 12(1), per animal species in the year 2019:

B o v i n e s: in total 21 suspect cases in 2019: 19 clinical and 2 laboratory suspect cases. One clinical suspect case which was culled on December, 30., 2018 is counted here but not for compensation (see also table G and comment box).

She epandgoats: No suspect cases were noticed neither in sheep nor in goats in the year 2019.

1.2 Details on the level of achievement of the targets set in the approved programme and technical difficulties.

The targets of the programme were reached: since the year 2011 until December, 31, 2019 the incidence rate* is zero. According to Resolution No. 19 (87th General Session of World Assembly, May 2019) OIE, the negligible BSE risk status was confirmed for 2019.

*) Number of indigenous cases per million bovines aged over 24 months during the year.

1.3 Epidemiological maps for infection and other relevant data on the disease/activities (information on serotypes involved,...) (Please attach files of data using the PDF attachement feature) Use the textbox below to provide clarifications for the maps you attach, if needed.

No maps (please see text boxes 1.1. and. 1.2.).

2. Tables for TSE monitoring outcome of the year

VERY IMPORTANT: Please fill out the following tables with figures corresponding to measures performed during the implementing period (1/1 to 31/12).

NB: the Regulation (EC) No 999/2001 is thereafter quoted as the TSE Regulation.

Table A

	Total positive cases detected during the implementing period		
	Classical cases	Atypical cases	Unknown
TSE	0	0	0
Scrapie (ovine animals)	0	0	0
Scrapie (caprine animals)	0	0	0

Table B

RAPID TESTS ON BOVINE ANIMALS		
	Age limit applied (in months)	Number of tests cases
Risk bovine animals from MSs listed in Annex to Decision 2009/719/EC	24	19,006
Risk bovine animals from MSs NOT listed in Annex to Decision 2009/719/EC	24	8
Healthy slaughtered bovine animals from MSs listed in Annex to Decision 2009/719/EC	72	1
Healthy slaughtered bovine animals from MSs NOT listed in Annex to Decision 2009/719/EC	30	60
Suspect animals and confirmatory tests		0
Total		19,075

Table C

Population of ewes and ewe lambs put to the ram in the Member State

RAPID TESTS ON OVINE ANIMALS	
	Number of tests
Healthy slaughtered ovine animals	166
Dead ovine animals	2,922
In the context of measures of control/eradication on holdings affected by TSE as described in Annexes III and VII of the TSE regulation	
Ovine animals from holdings affected by classical scrapie	
Ovine animals from holdings affected by atypical scrapie	17
Ovine animals from holdings affected by BSE	0
Suspect animals	0
Total number of tests	3,105

Table D

Population of goats which have already kidded and goats mated in the Member State

60334	
RAPID TESTS ON CAPRINE ANIMALS	
	Number of tests
Healthy slaughtered caprine animals	33
Dead caprine animals	994
In the context of measures of control/eradication on holdings affected by TSE as described in Annexes III and VII of the TSE regulation	
Caprine animals from holdings affected by classical scrapie	0

242102

Caprine animals from holdings affected by atypical scrapie	0
Caprine animals from holdings affected by BSE	0
Suspect animals	0
Total number of tests	1,027

Table E

Confirmatory and discriminatory tests	
	Number of tests
Confirmatory tests other than rapid tests on bovine animals	21
Confirmatory tests on ovine and caprine animals	0
Discriminatory tests on bovine animals	0
Discriminatory tests on ovine and caprine animals	0
Total number of confirmatory tests	21
Total number of discriminatory tests	0

Table F

Genotyping tests	
	Number of tests
Positive TSE case	0
Randomly selected ovine animals	0
Animals in scraple infected flocks	0
Breeding programme - ewes	0
Breeding programme - rams	0
Total of number of tests	0

Table G

COMPENSATION FOR ANIMALS In the context of suspicion, control and eradication of TSEs	
Animals culled and destroyed	Number of animals compensated
Bovine animals	18
Ovine animals	0
Caprine animals	0
Animals slaughtered	Number of animals compensated
Ovine animals	0
Caprine animals	0
Total Bovine	18
Total Ovine + Caprine	0

COMMENT / ADDITIONAL CLARIFICATION

Comment to table B:

There were tested 3 more animals of category "Healthy slaughtered bovine animals (b) from MSs listed in Annex to Decision 2009/719/EC", but upon request on the owner, because the animals were younger than 30 months.

Comment to table G:

19 clinical suspect cases and thus culled upon official order and compensated, but application for funding 18 animals only, because one animal was culled on December, 30, 2018.
