Feedback:

Self sufficiency is one of the pillars of a solid SoHO supply in the European Union and the EU Member States. In respect of the evaluation we would like to suggest to take into account the complicated relationship between national and European self sufficiency.

You mention several reports to serve as source of input for the evaluation. We would like to draw your attention to the Informal Competent Authority Meeting 20th November 2012 Vienna making suggestions for items in de TC Directives to be revised. Attached you will find the minutes.
