Update on the epidemiological situation and the measures regarding African swine fever in Hungary

Meeting of the Standing Committee of Plants, Animals, Food and Feed
Brussels, 13 May 2019

ASF cases in Hungary in wild boar

Overview of ASF cases in Hungary in wild boar

County (in order of infection)	Frequency (number)	Percentage (%)
Heves	914	67.5
Szabolcs- Szatmár- Bereg	52	3.8
Borsod-Abaúj-Zemplén	233	17.2
Nógrád	153	11.3
Hajdú	3	0.2
TOTAL	1355	100

ASF cases in Heves and Nógrád counties

- The majority of the new cases in Heves was within the exceptionally controlled area
- No cases on the south side of highway M3 (artificial barrier)
- No further cases around Hangony (case in January 2019 next to the Slovakian border)

ASF cases in Heves county

Case ADNS 2019/490 was confirmed close to the border of Part II on the 1st of April. Since that more than 150 active surv. samples have been PCR tested with negative result.

GMU	Samples	Wild boar density
652300	18	1.112
652400	7	2.449
652800	38	2.835
653403	14	1.78
700650	47	2.959
700750	32	2.058

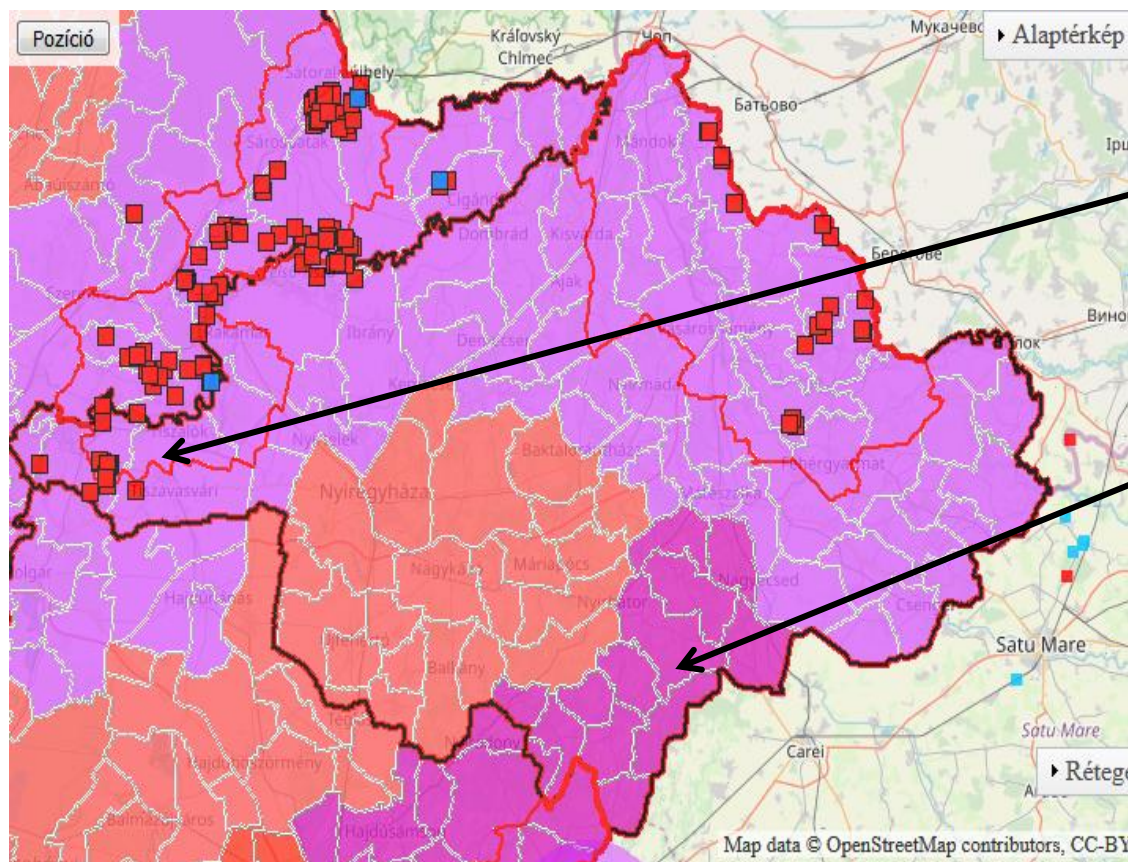

ASF cases in Borsod-Abaúj-Zemplén county

- Cases in Borsod-Abaúj-Zemplén county (started 2018.10.02), spreading direction: north-east, along the river Bodrog
- To date 160 dead wild boar cases around Sárospatak - Sátoraljaújhely

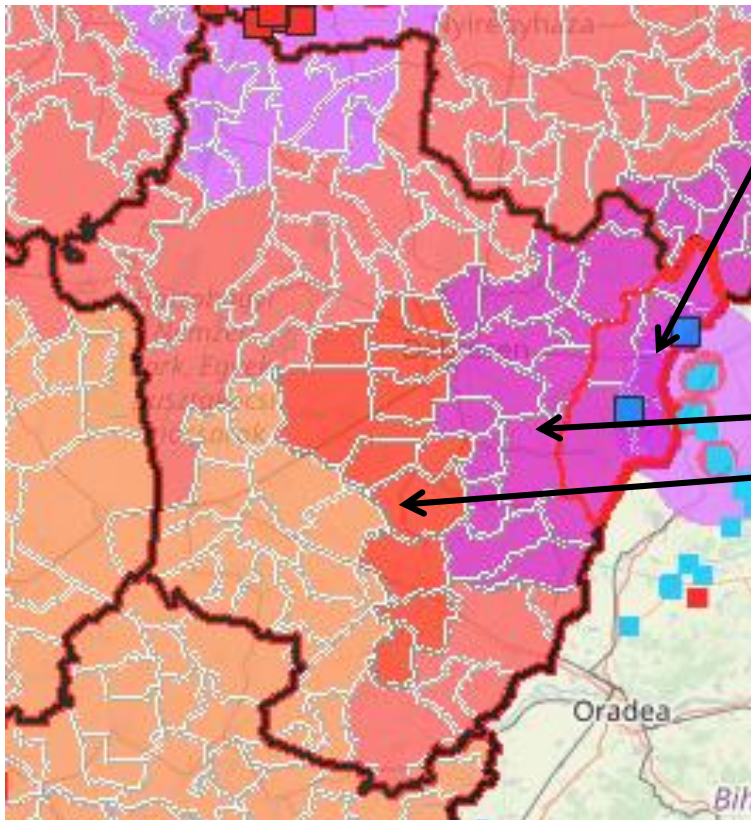

ASF cases in Szabolcs-Szatmár-Bereg county

- New cases of Szabolcs are only occurring near Borsod county (see previous slide);
- Temporary increased infected territory due to new cases in Hajdú-Bihar
- No changes at the border region with Ukraine

ASF cases in Hajdú-Bihar county

- 3 wild boars were found dead (29.04.2019) in the area that was in the surveillance zone due to domestic pig outbreaks in Romania
- Infected area (dark lilac) and high risk zone (dark orange) has been temporary enlarged
- The wild boar density is 0 or 0-0.5 in the Part I and II areas of Hajdú-Bihar

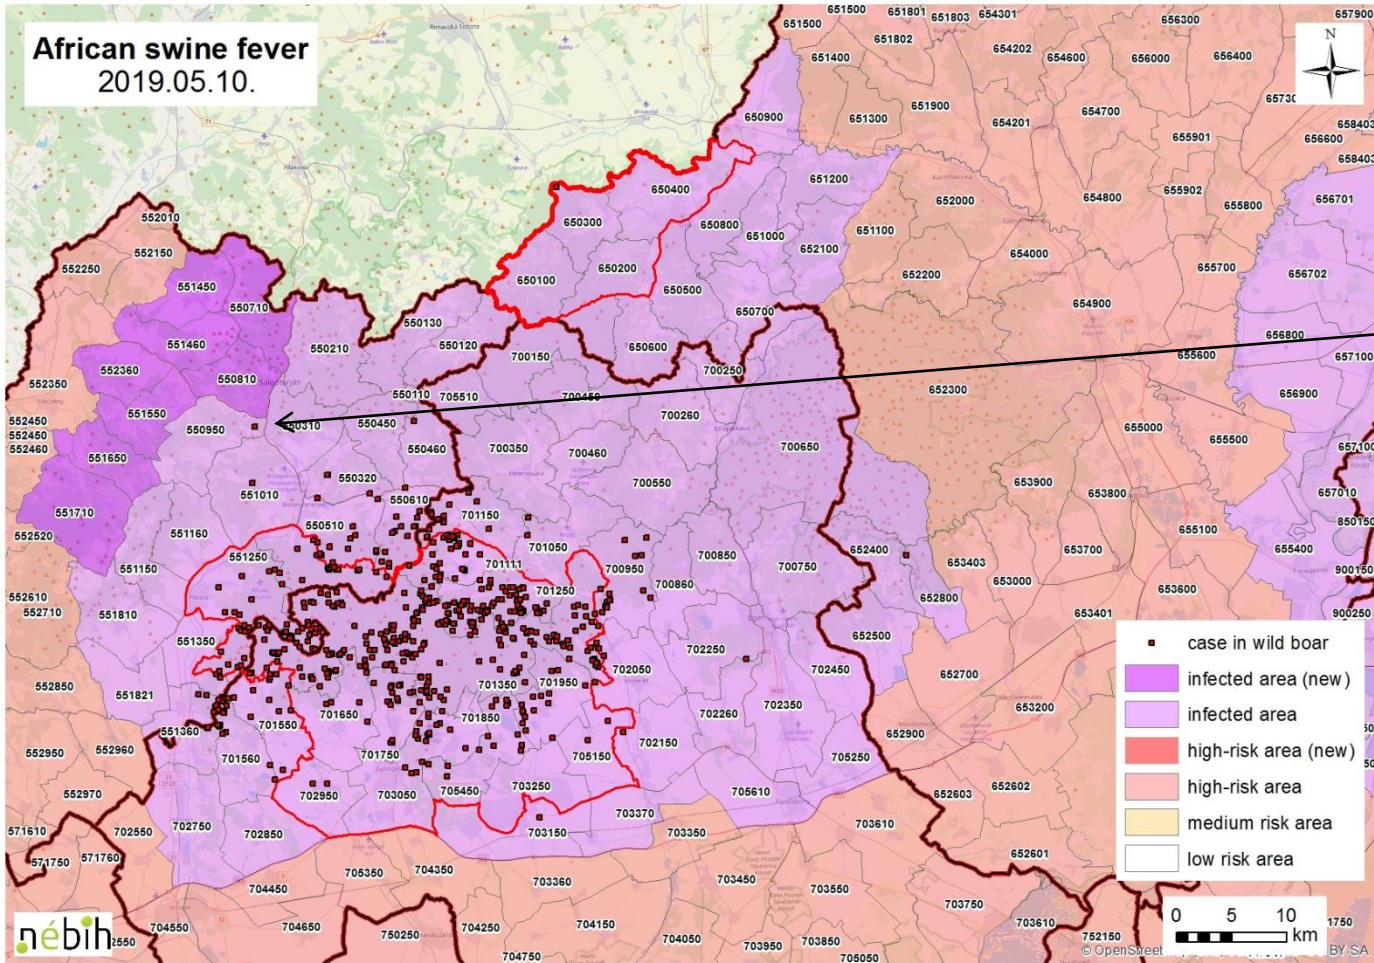

Proposed changes for (2014/709/EU)

Proposed areas
According to
temporary measures
of CVO

Proposed changes for (2014/709/EU)

New WB case
10.05.2019

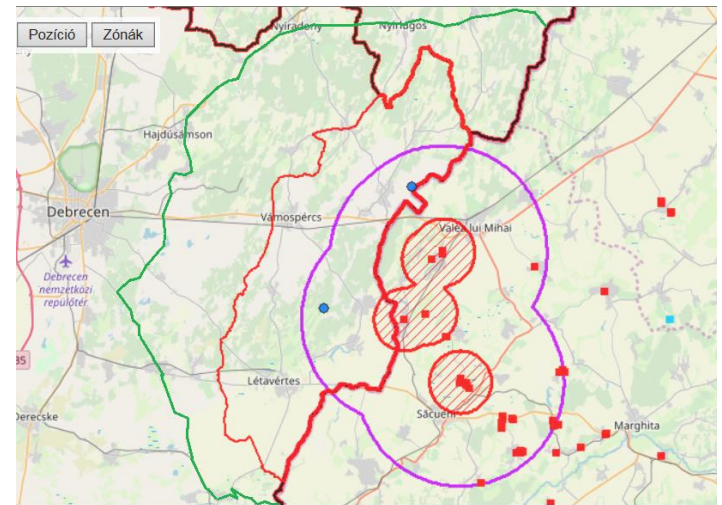

Other issues under consideration

Establishing a fence is being considered around the new infected area in Hajdú-Bihar county

- geographical conditions of this area
- in the north (Heves, Nógrád) – it is not feasible

Elimination of small scale farms in the infected area – restocking only if strict biosecurity measures are met – with compensation
