

# African Swine Fever in Germany

SCoPAFF September 2024

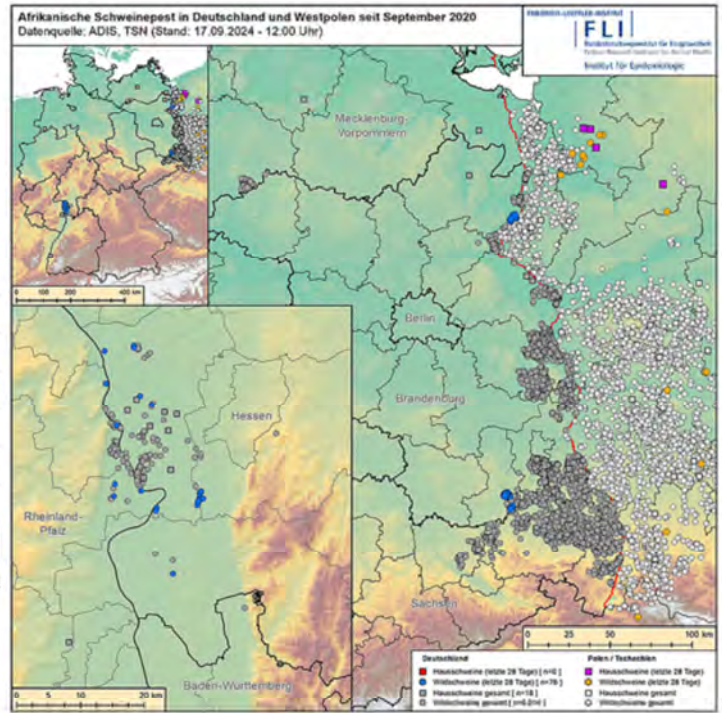

# ASF in Germany – overview

# ASF in wild boar in DEU in 2024

ASF cases in wild boar DEU 2024  
405 on 18.09.2024

ASF

– border triangle

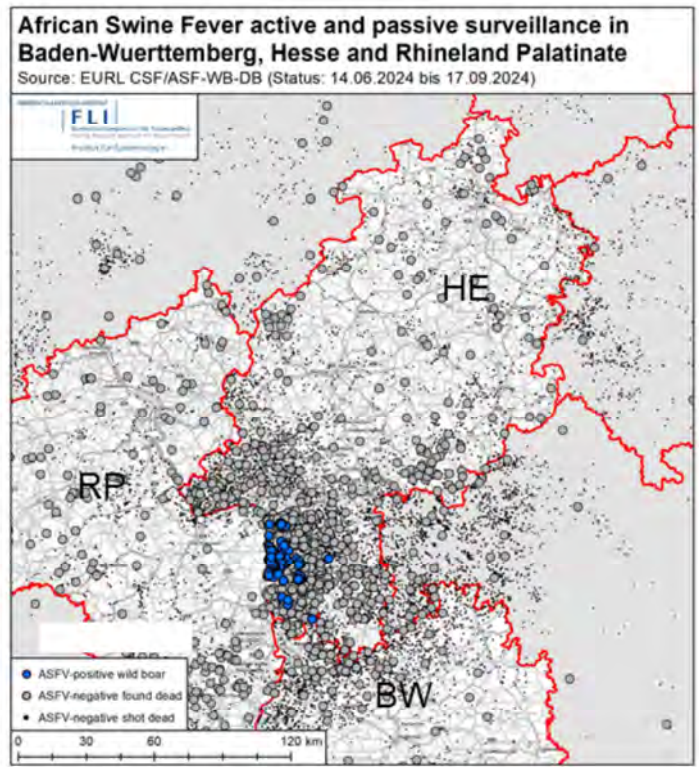

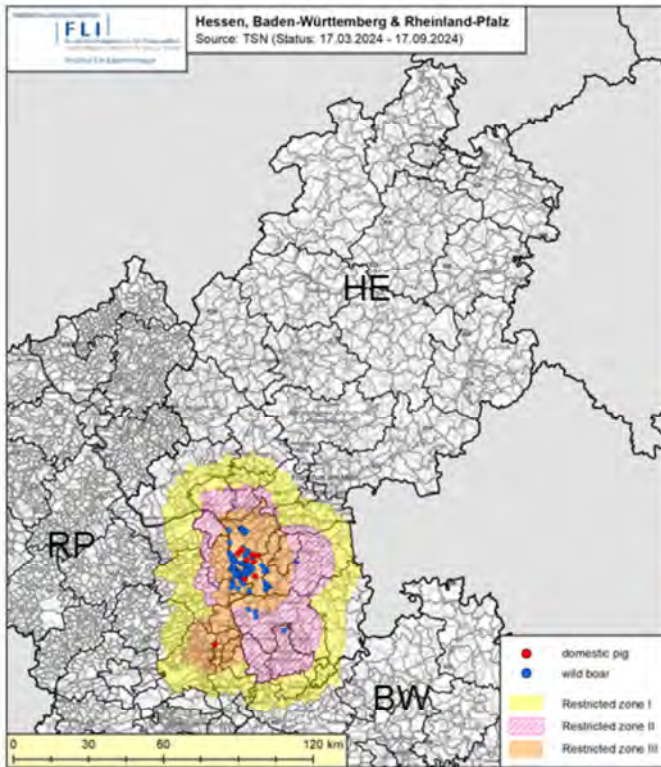

Hesse (HE) / Rhineland-Palatinate (RP) /

Baden-Wuerttemberg (BW)

## ASF in HE / RP / BW

- Movement restrictions
- Technical fencing - Many motorways surrounding
- preparations for trapping
- River Rhein inbetween, with low wild boar density westward and high density eastward
- Active search for carcasses (in HE >89.000 ha, RP xx.000 ha, BW 3.500ha)
- Eradication in affected pig establishments
- Check of pig establishments (no pig industry area)
- Epidemiological investigations including FLI

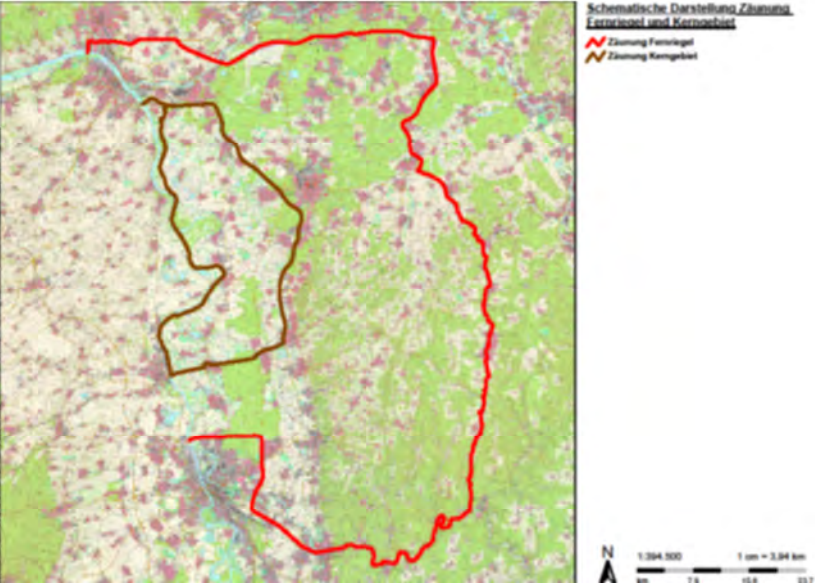

# ASF in domestic pigs in DEU in 2024 - 18.09.2024

# Fences – cross border (HE + BW) cooperation - *Fernriegel*

## ASF in wild boar in HE – measures in pig establishments

zone III:

ca. 50 holdings with ca. 5.870 pigs

– 67 controls

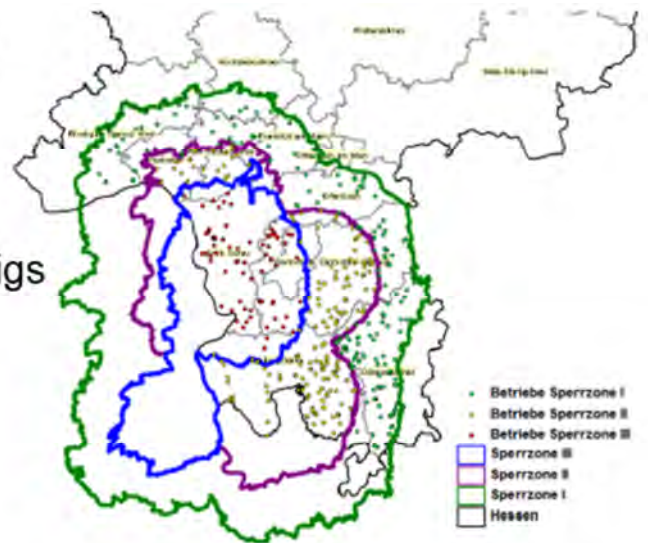

zone II: ca. 150 holdings with ca. 19.700 pigs

– 136 controls

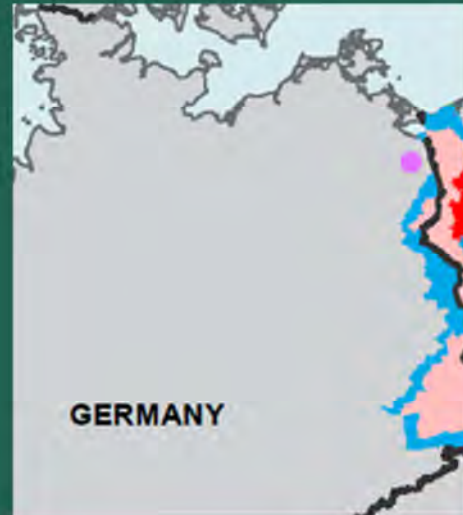

zone I: ca. 140 holdings with 12.100 pigs

– 203 controls

as of 16-09-24

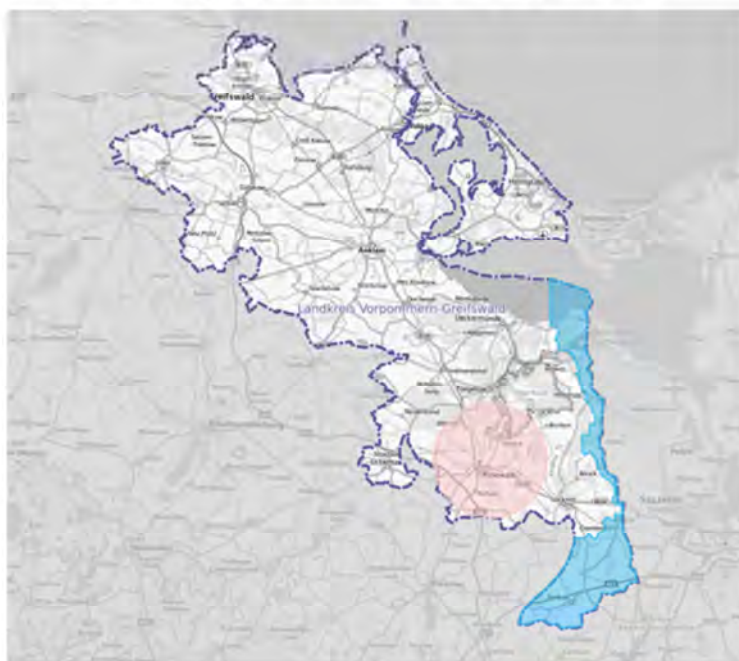

ASF – Mecklenburg  
-Western Pomerania

# ASF in MV – outbreak in domestic pig on June 5<sup>th</sup>, 2024

## district Vorpommern-Greifswald

	Protection zone	Surveillance zone
<b>No of establishments</b>	2 (one empty)	63 (37 empty)
<b>No of pigs</b>	1	91
<b>Veterinary checks</b>	1, animal healthy, biosecurity ok	26, animals healthy, biosecurity ok

# ASF in MV - Surveillance figures wild boar

01.01.-31.08.2024

district Vorpommern-Greifswald

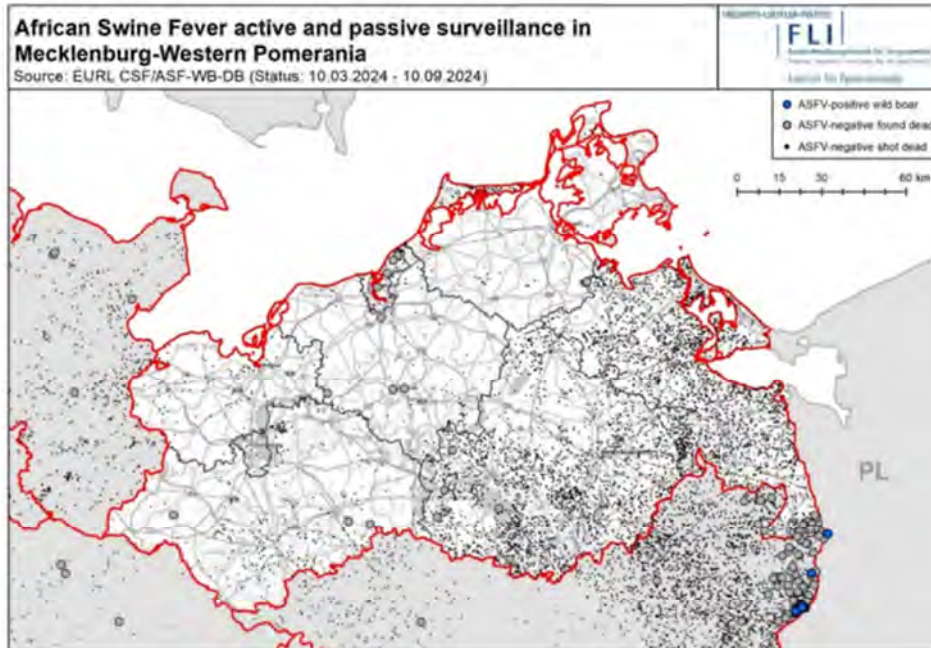

total number 2024: 5.054 (2023: 7.049)

total number 2024: 610 (2023: 629)

# ASF in MV - Surveillance figures wild boar – 6 months

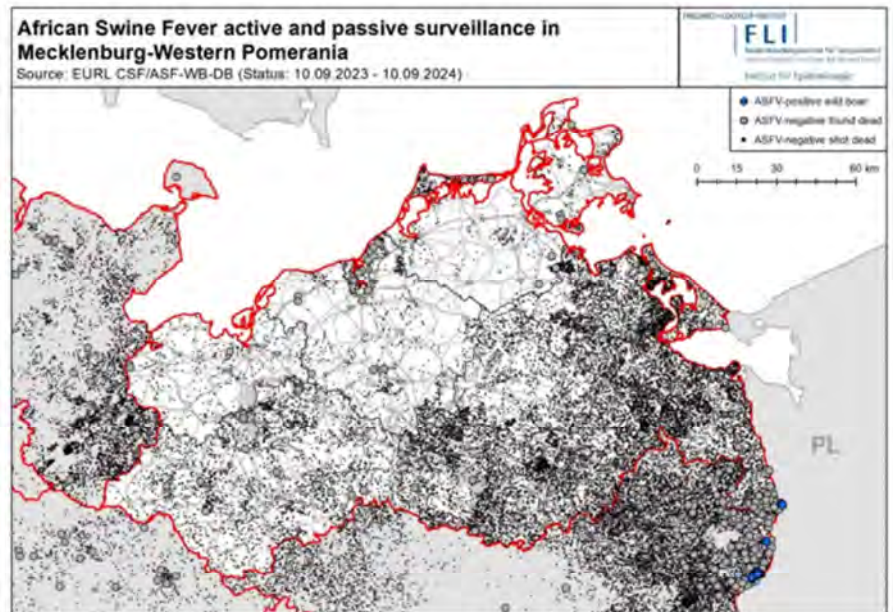

10.03.-10.09.2024

# ASF in MV - Surveillance figures wild boar - 12 months

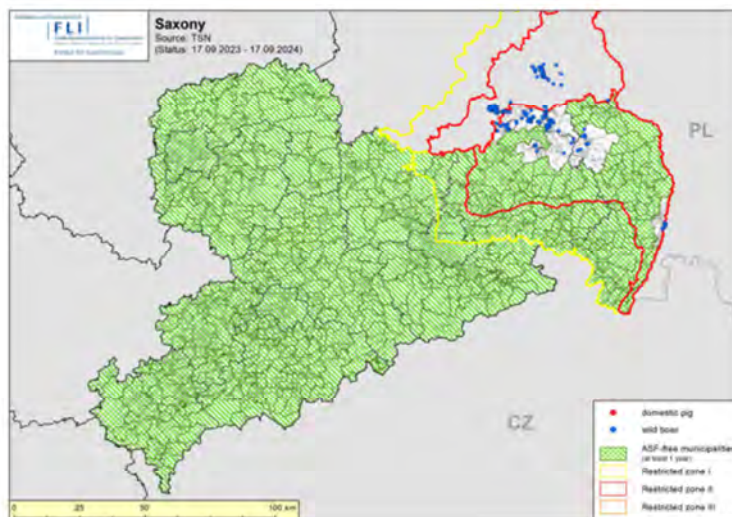

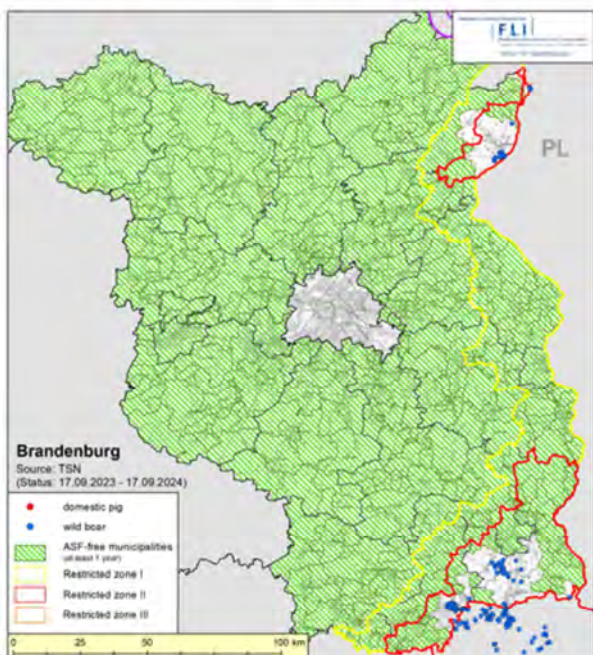

10.09.2023-10.09.2024

Jahr	ASP-Untersuchungen bei Wildschweinen		
	MV gesamt	LK VG gesamt	Gemeinden in VG* in der Sperrzone
2024 (01.01.-31.08.)	11.313	4.696	452
2023	25.816	7.077	561

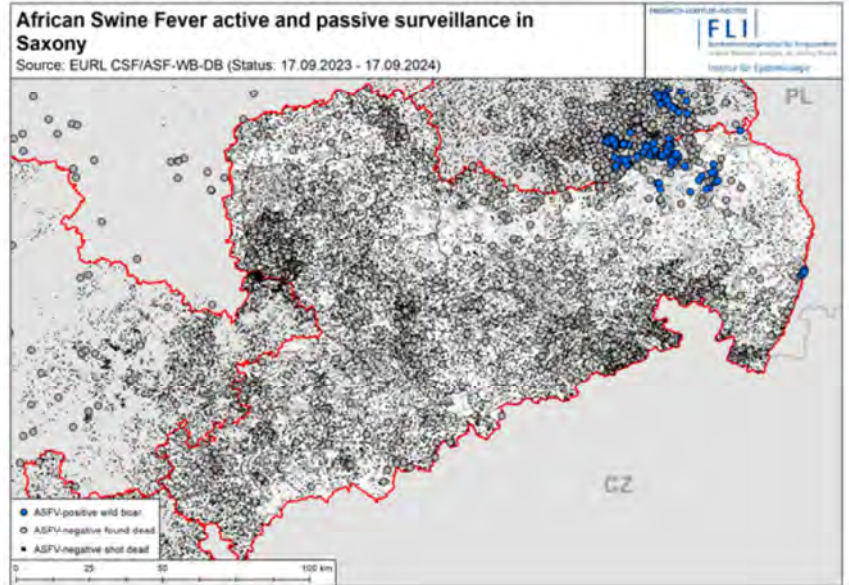

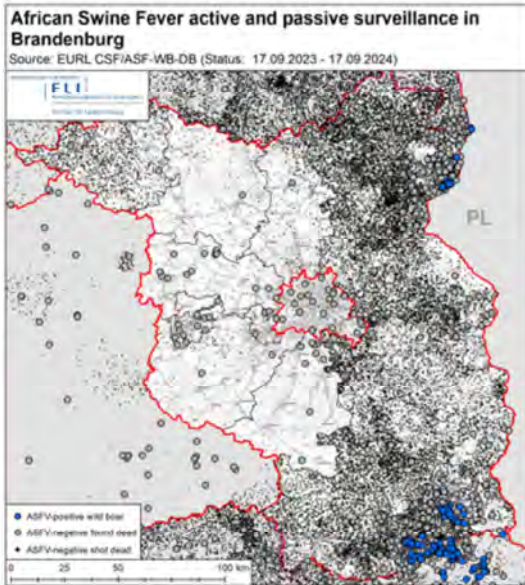

ASF – Brandenburg - Saxony

# ASF presence/ absence in wild boar in Brandenburg and Saxony

# ASF monitoring in wild boar in Brandenburg and Saxony

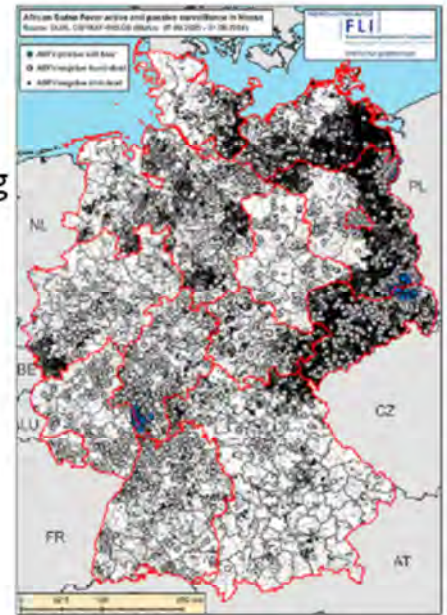

# Conclusions

- due to high effort and sustainable measures ASF was diminished in some areas
- sustaining limitation to small affected area after introduction via migrating wild boar in Eastern parts of DEU for years
- latest (June 2024) single introduction in a pig establishment in Mecklenburg-Western Pomerania resolved
- high risk area after new introduction by jump to HE demarkated
- implementation of white zones ongoing

## Conclusions II

- further epidemiological investigations regards introductions in pig establishments still ongoing
- surveillance and biosecurity in pig establishments / wild boar / hunting are in place
- awareness campaigns are ongoing
- intensive monitoring all over the country

# Thank you for your attention!
