

TREASoURcE & KiertoaSuomesta.fi -marketplace

Nora Berglund Project Manager MTK – The Central Union of Agricultural Producers and Forest Owners 14.10.2024

TREASoURcE (2022-2026)

The project aims to promote the circular economy through regional circular economy pilots, involving **3 value chains**:

Plastic recycling

Reuse ofBiobased sideEV batteriesand waste streams

Stakeholder engagement

Funded by the Horizon Europe -program

Project partners

- 16 organizations
- 6 European countries
- Coordinator: VTT
- Budget: 10,9M€

Biobased side and waste streams

The aim is to find utilization possibilities for currently unused biobased side and waste streams:

- Digital marketplace
- Rural-urban symbiosis tool
- Local bioeconomy models
- Policy framework analysis

Users of the site get multiple benefits

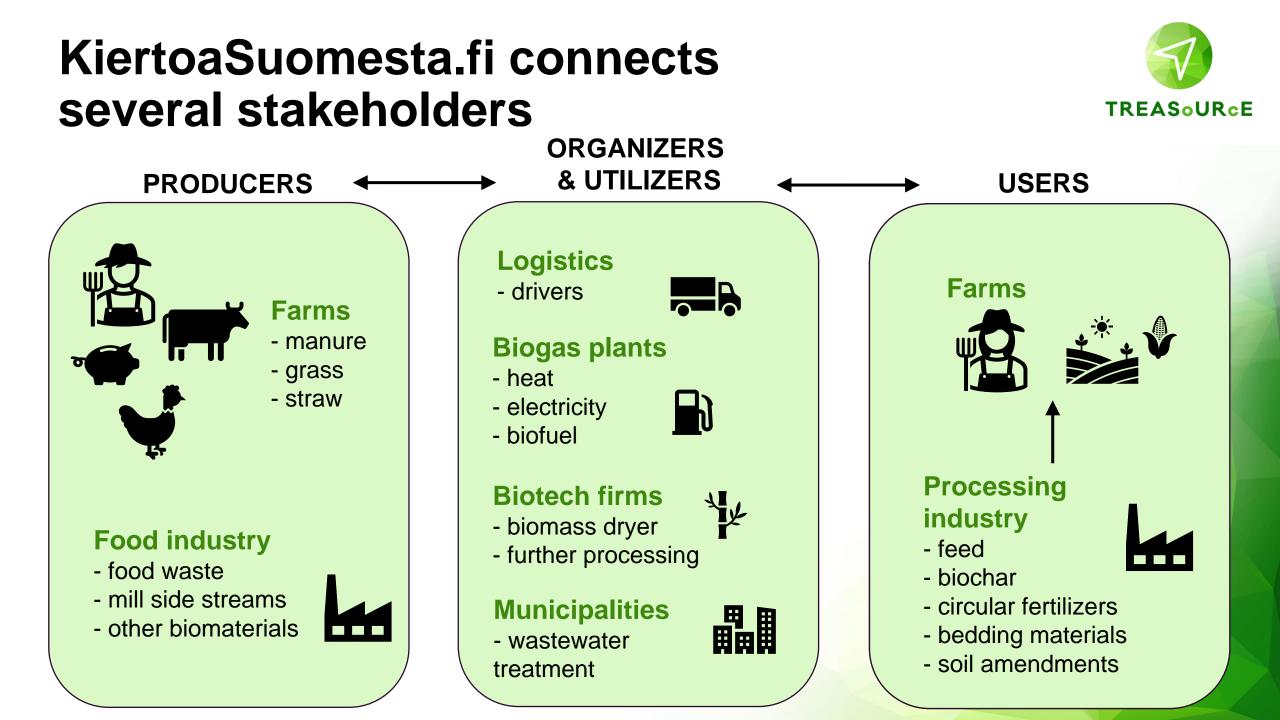

- Economic benefits
- Business diversification
- Getting rid of waste -> cleaning benefits
- Promoting sustainability
- New customers and partners

MTK's aim is to create favourable conditions for the utilization of side streams through the marketplace: create new business opportunities and promote cooperation.

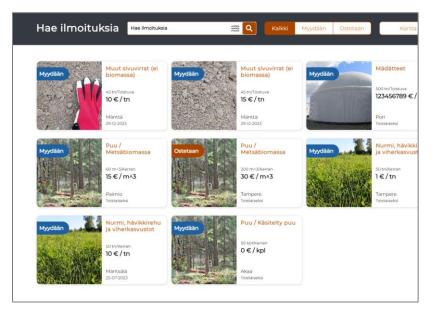

Continuous development for KiertoaSuomesta.fi platform

What next

- Active communication
- Continuous development for the site
- Replication of the marketplace
 - Baltic Sea region
- Huge potential to enhance nutrient recycling

Replication Handbook

Ideas are recyclable.

Research and replicate. This Handbook will guide you in making the right decisions and provide advice from your perspective.

Please note! The site is in early development phase and we like to receive your <u>feedback</u>.

Circular plastics

Capture the value: create added value from noncirculated plastic by optimising recycling technologies and collection.

EV battery reuse

Evaluate possibilities and potential for use of second life electric vehicle (EV) batteries as building blocks for energy storage systems.

Bio streams

Power the local economies through new circula bio-economy investments and new business possibilities for rural producers.
