Building upon existing networks

- Valuable platforms & networks on food loss and waste reduction
- Focus on policy makers, sector organisations, NGO's and academia
- Practitioners are not necessarily (often not) part of these networks

[EU Food Loss and Waste Prevention Hub](#)
[EU Platform on Food Losses and Food Waste](#)

Cross border practitioner exchange

- Dedicated space for sharing & learning amongst practitioners across EU countries
- In-person exchange focussed on practical implementation of monitoring, multi actor collaboration and consumer behavior change
- Adaptation, replication, acceleration action towards impact

We look forward to (re)connecting
to your practitioners!
