

# Extraordinary programme for the eradication of ASF in Sardinia

Current epidemiological situation and data 2020

PAFF Committee – Animal health and Welfare  
19 June 2020

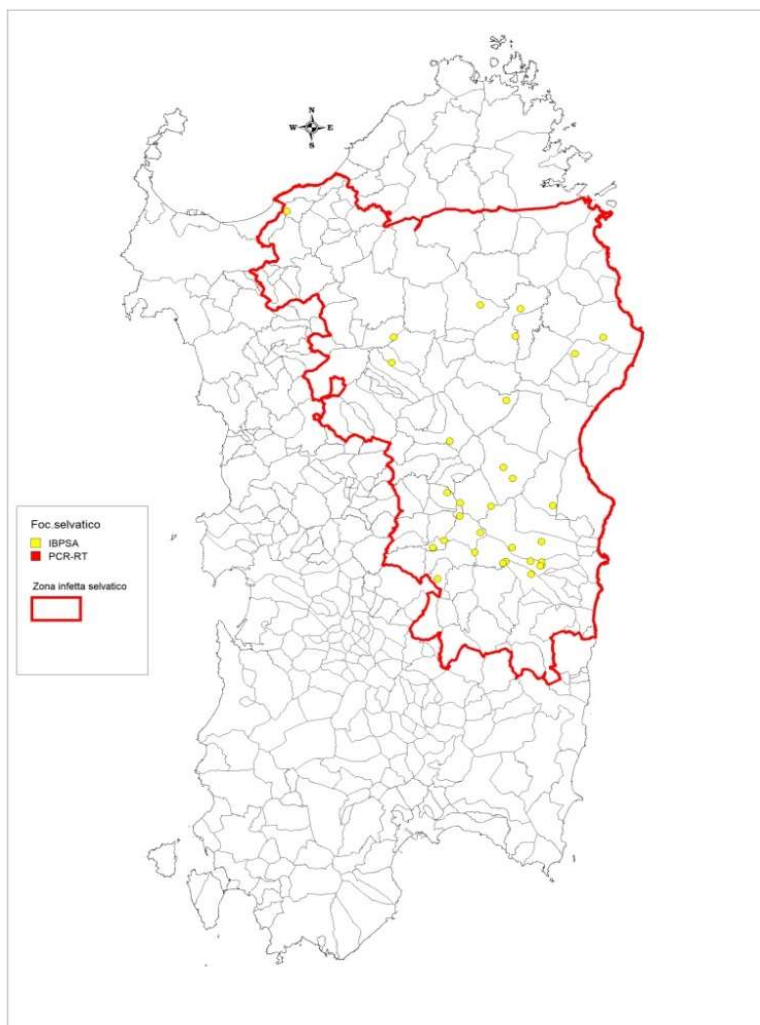

## Principal activities to fight ASF in Sardinia

The initiatives in line with the Eradication Plan 2020 focus on preventing new outbreaks in domestic pigs, the control of the disease in the wild and directed towards the total elimination of the disease. In particular, the objectives are:

- Raising the compliance levels of pig farms;
- Keep fighting against illegal free ranging farming;
- Increase in supervision of traceability across the entire production chain (animal handling, derived products and by-products);
- Checks on ports and airports;
- Control on wild population, through active and passive surveillance, in particular in areas at high risk;

## Cases and outbreaks 2020

	N	Virus +	Sero +
Domestics	0	0	0
Wild boars	32	0	32

# Passive surveillance in domestics and wild boars - 2020

Domestics		
heads	Controlled	Positives
Controlled in sero	34	0
Controlled in virus	159	0

	Wild boars	
	heads	Controlled
controlled in sero	65	0
controlled in virus	118	0

# Active surveillance in domestics and wild boars - 2020

Domestics		
Type of control	Holdings controlled	Heads
Slaughter for selfconsumption	8.280	22664
Movement to slaughterhouses	3.939	71580
Movement to live	299	1400
Serological controls	5636	12622
Official controls	831	

Wild boars		
	Controlled	Positives
controls in sero	2.737	32
controls in virus	2.293	0

## Official controls including biosecurity checks in 2020

The **controls** include:

- 1) the clinical visit;
- 2) verification of compliance with the I&R obligations;
- 3) verification of compliance with the rules on animal welfare;
- 4) verification of biosecurity requirements;
- 5) verification of the expected reproductive parameters;
- 6) verification of the disposal of by-products of porcine origin;
- 7) blood sampling for ASF

Following **official controls**, the Veterinary Service attribute or confirm to the pig farms one of the following two health qualifications: **controlled or certified**.

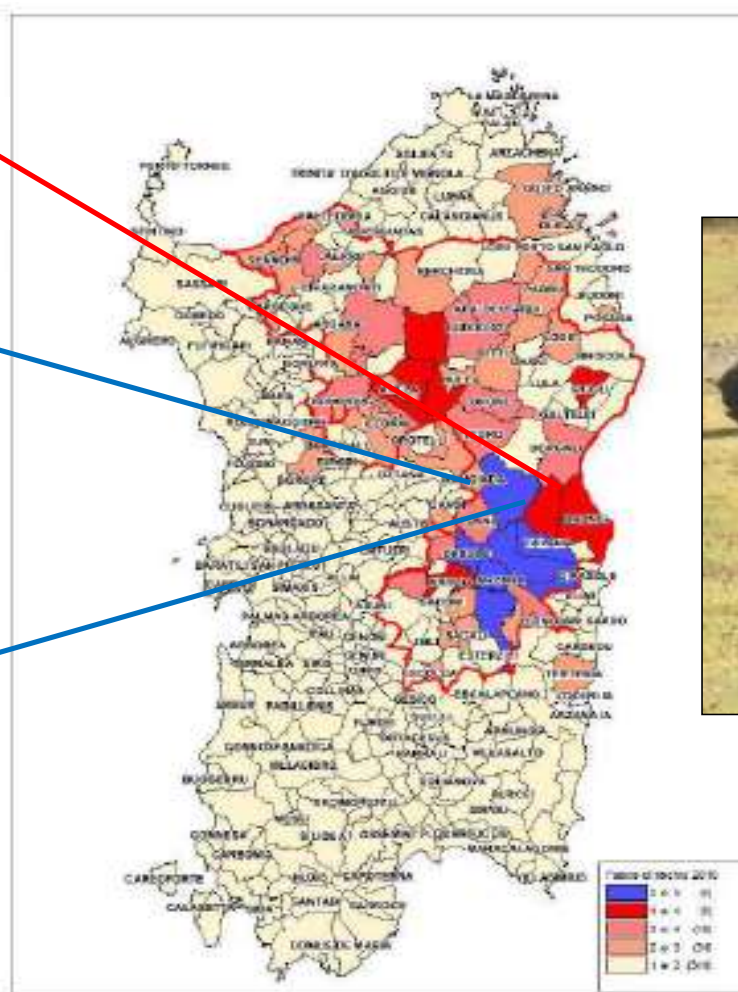

a) "**Holding controlled for ASF**": the overall outcome has been unfavorable but the holding results compliant with the clinical and serological parameters.

b) "**Holding certified for ASF**": the outcome of the check was favorable for all the parameters considered.

# Programme for depopulation of illegal free-ranging pigs

date	killed	Municipality
29/01/2020	100	BAUNEI
29/01/2020	7	BAUNEI
14/02/2020	50	ORGOSOLO
14/02/2020	2	ORGOSOLO
14/02/2020	18	ORGOSOLO
14/02/2020	1	ORGOSOLO
14/02/2020	15	ORGOSOLO
28/02/2020	12	DESULO
28/02/2020	10	DESULO
28/02/2020	41	DESULO
28/02/2020	22	DESULO
28/02/2020	25	DESULO

Tot 2020: 303

# Overall results

Depopulation of free ranging pigs			
2015/2016	2017/2018	2018/2019	2019/2020
478	2408	1429	665

Virus + wild boars			
2016	2017	2018	2019
3	4	0	2

Outbreaks in registered holdings			
2016	2017	2018	2019
23	17	5	0
