

# African swine fever in Poland

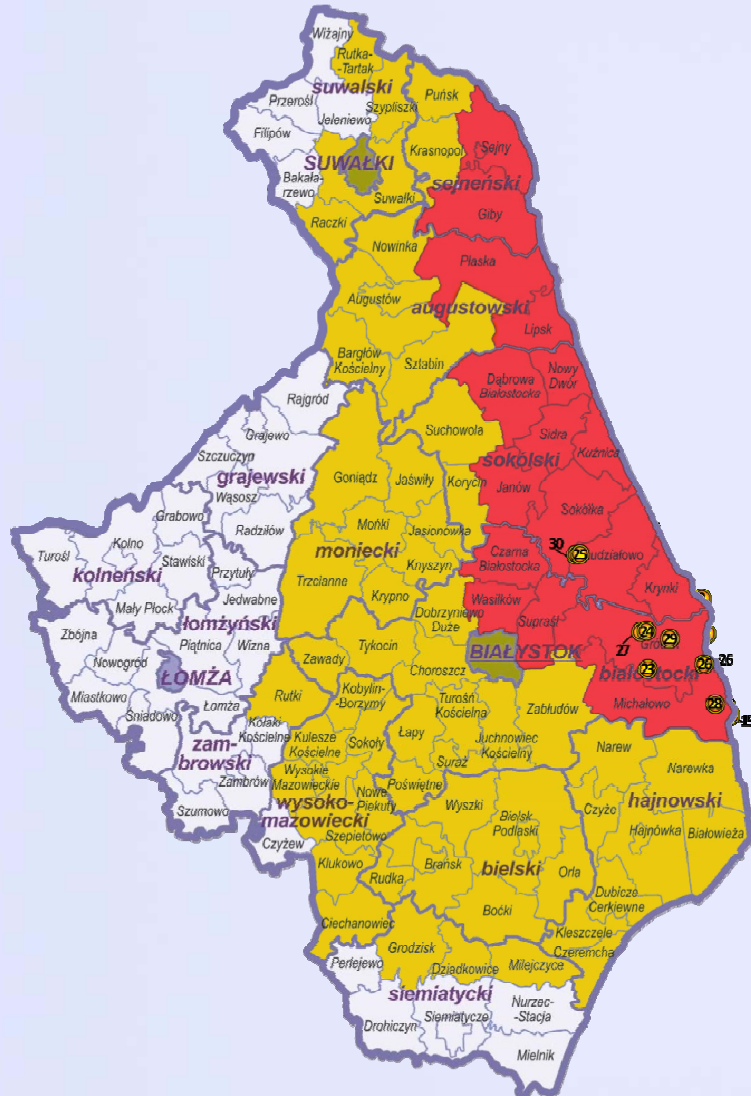

Update on epidemiological situation and implemented  
actions

# ASF cases and outbreaks in Poland

Measures in accordance with Directive 2002/60/EC, Decision 2014/709/EU and the ASF eradication strategy (Vilnius, October 2014) are continued to be implemented in the areas in the Annex to Decision 2014/709/EU

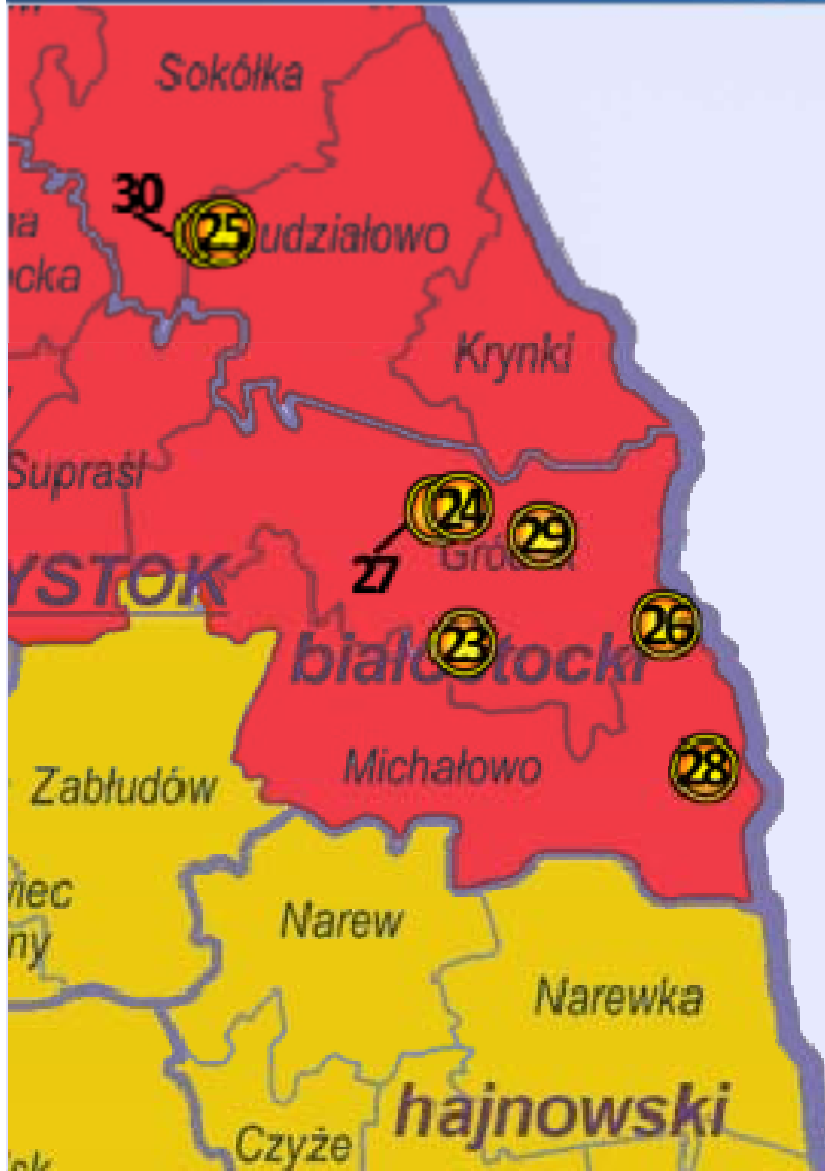

Since the previous SCPAFF report further cases (23<sup>rd</sup> - 30<sup>th</sup>) of ASF in wild boar have been detected in Poland

# ASF cases and outbreaks in Poland

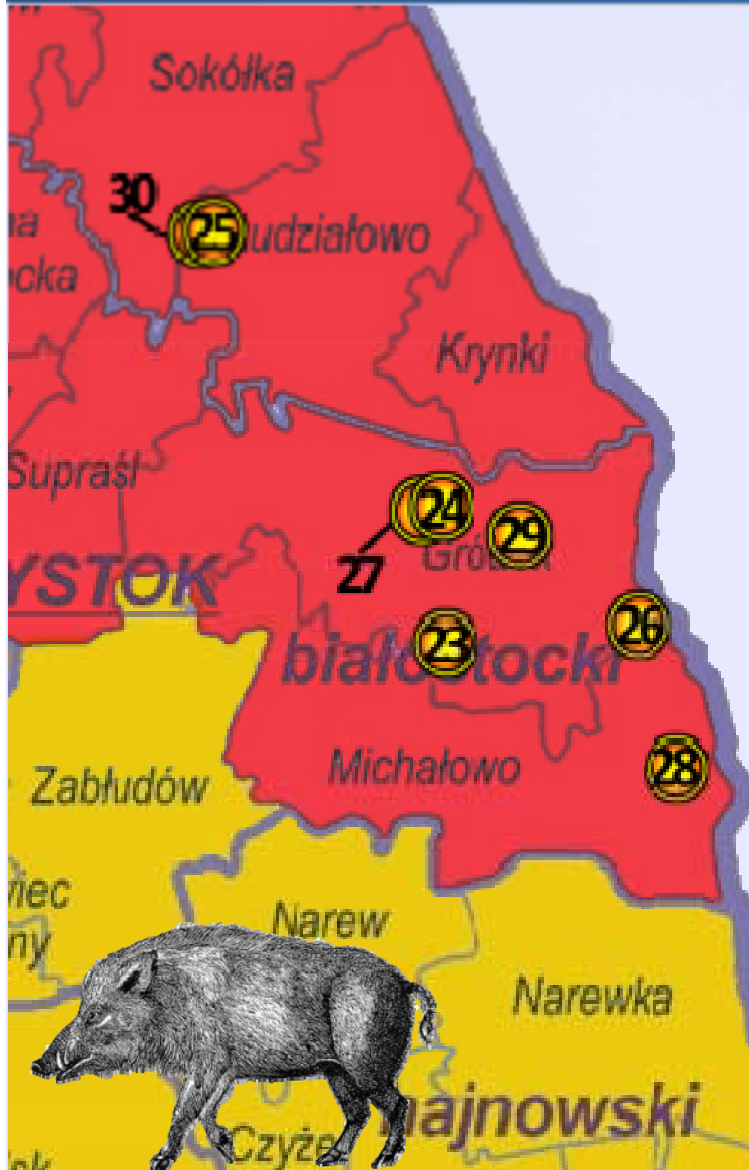

**The ASF cases are occurring in the same area (parts of 2 districts in Podlaskie region)**

**No case occurred outside the area listed in Part II of Annex to decision 2014/709/EU**

# ASF cases and outbreaks in Poland

## Cases in wild boar

No.	Shot/found dead	Date of confirmation	No. of WB in a case	Distance from the border
23	Shot	3 <sup>rd</sup> December 2014	1	14 km
24	Shot	5 <sup>th</sup> December 2014	1	14 km
25	Found dead	5 <sup>th</sup> December 2014	2	18 km
26	Shot	12 <sup>th</sup> December 2014 (additional test results –17 <sup>th</sup> )	1	1 km
27	Shot	15 <sup>th</sup> December 2014	1	14 km
28	Shot	15 <sup>th</sup> December 2014	1	3 km
29	Shot	15 <sup>th</sup> December 2014	1	7,5 km
30	Found dead	24 <sup>th</sup> December 2014	1	19 km

# ASF surveillance

## Results of surveillance activities in November 2014

Results of surveillance activities in November 2014						
Number of	Species

# ASF surveillance

## Results of surveillance activities in the whole country for 2014

Results of surveillance activities in 2014 (1.01. - 31.12.2014)									
Number of	Species								
	Domestic pig result			Wild boar result			Pig/WB hybrid result		
	No.	+	-	No.	+	-	No.	+	-
Animals tested	23629	6	23623	15881	57	15824	1	0	1
Of animals tested in total	<b>39511</b>								
Of tests performed in total	<b>48074</b>								

# Development of strategy

For 2015 it is planned to reduce the number of wild boar tested in the buffer zone:

- Currently all the WB found dead and shot in the buffer zone are tested
- The plan is to test:
  - Passive: All the WB found dead;
  - Active: All the WB, carcasses of which are to be moved outside the buffer zone
  - Active#2: The number of above mentioned WB must meet a threshold set for each area (based on a risk assessment); if not enough wild boar carcasses would be tested for movement purposes, a number of additional shot WB is going to be tested to meet the

threshold

**Thank you for your attention**
