## African Swine Fever in the Czech Republic – update

SCOPAFF meeting, 25. – 26. 6. 2024

# ASF in the Czech Republic – current situation (21.6.2024)

In total 81 cases of African swine fever in wild boar population

- •The total number of positive cases found in dead wild boars: 59
- •The total number of positive cases in hunted wild boars: 22

**NO OUTBREAK IN DOMESTIC PIGS** 

#### Total number of ASF tested wild boar

- Restricted zone II: found dead 122 / 59 positive
  - hunted 1 123 / 19 positive
- Restricted zone I: found dead 15

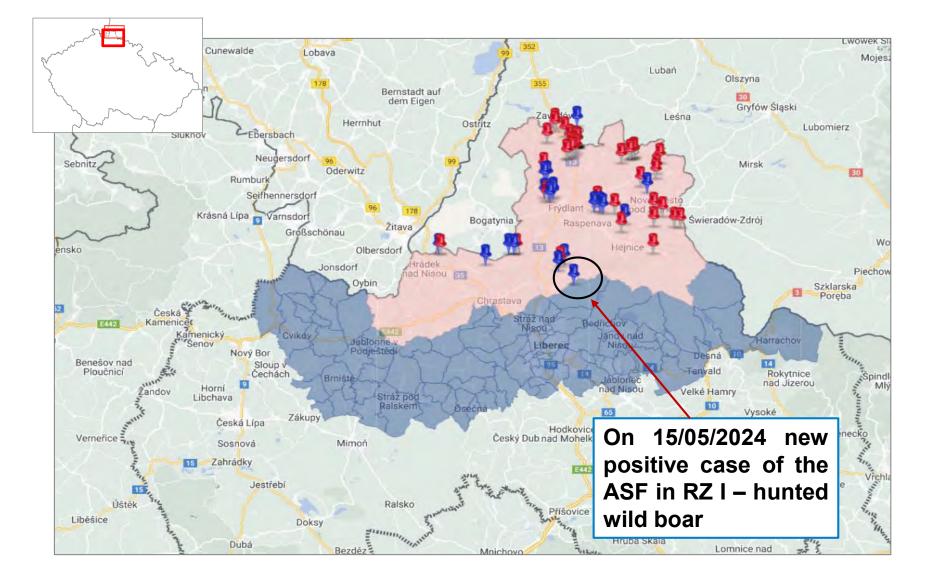

hunted

151 / no positive 4 508 / **3 positive** 

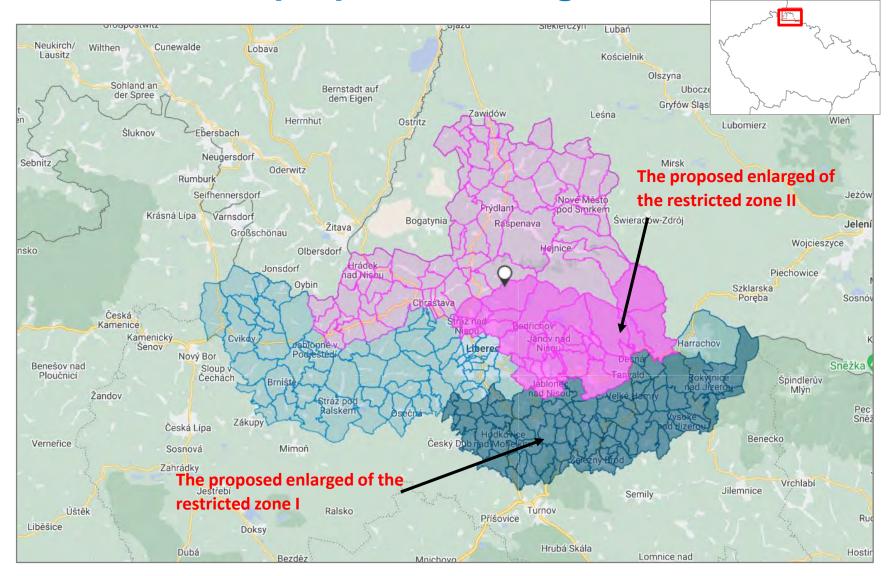

## **ASF - Situation in wild boar**

# Restricted zone I and II update proposal - enlargement

## Restricted zone I and II update proposal enlargement – surveillance of wild boars

#### Passive surveillance:

- in 2023 seven found dead wild boars were tested in the laboratory with negative results of the ASF
- in 2024 one found dead was tested in the laboratory with negative results of the ASF

#### Active surveillance:

- in 2024 79 hunted wild boars were tested in the laboratory with negative results of the ASF
- in 2024 55 hunted wild boars were tested so far, one of them with a positive result.

#### Part of the area was in the restricted zone I, the following measures were applied to this area:

- wild boar hunting is authorized, but solely by trained hunters adhering to specified biosecurity rules,
- all hunted wild boars must be tested for the ASF,
- active search of wild boar carcasses is ordered finder reward in the ASF RZ I is 2 000, -CZK/carcass,
- each wild boar found dead must be tested for the ASF,
- store the whole body of a wild boar intended for human consumption in a suitable place,
- determination of conditions for handling products of animal origin obtained from wild boars hunted in the RZ I.

### Restricted zone I and II update proposal enlargement – surveillance of domestic pigs

#### Passive surveillance:

- in 2023 one animal was tested in the laboratory with negative results of the ASF
  - in 2024 no animal was tested in the laboratory

## Part of the area was in the restricted zone I, the following measures were applied to this area:

- ban on movement of pigs from/to holdings without the RVA approval, with the approval being granted only if specified veterinary conditions are met
- housing of domestic pigs so that they could not come into contact with wild boars; wild boars may not have access to any materials with which domestic pigs could subsequently come into contact, especially feeds, bedding and water
- to use specially designated work clothes and footwear when tending pigs
- ban on using cereals as feed for pigs if they were harvested in the infected zone, at least for 30 days from the harvest (quarantine of cereals)
- ban on using green fodder for pigs and on using straw as bedding for pigs from areas listed in Regulation (EU) 2023/594
- obligation of keepers to report dead or sick pigs (laboratory testing for the ASF)
- determination of conditions for handling products of animal origin obtained from domestic pigs kept in the restricted zone I

### Restricted zone I and II update proposal enlargement – farms and food establishments

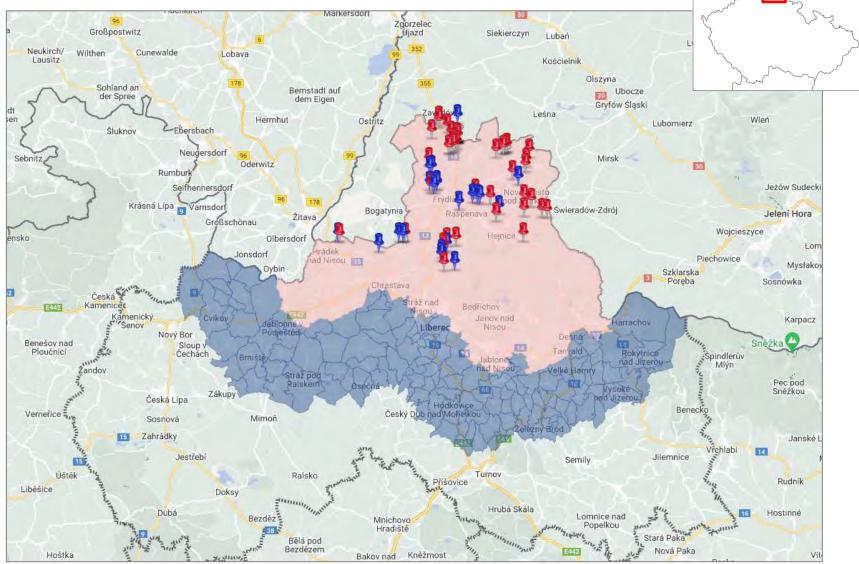

•

- one game handling establishments
- two slaughterhouses

.

in **15** farms official visits on biosecurity – 13 control OK and in 2 farms were fail to comply with legislation

## **ASF – planned measures**

- Placement of camera traps in selected areas in the Region of Liberec for more detailed monitoring of the wild boar population.
- Drone flights in selected areas for more detailed monitoring of the wild boar population.
- Increase hunting of wild boars using trapping devices.
- Reduce the population of wild boars in selected areas in cooperation with snipers of the Police of the Czech Republic.
