Summary

- East part of Slovakia infected by ASF virus in WB population
- **No ASF outbreaks in domestic pigs since September 2020-** at present part III only in one SK district (Trebišov)
- 2 enlargements of part II in pipeline (Roznava and Humenne districts)
- In the period February- March 2021– from the last PAFF committee 159 ADNS messages sent (WB)
- **Active and passive surveillance of WB in place in whole Slovakia** - depending the localisation of hunting ground, its inclusion into the zone
- **In new infected zones- measures newly ordered- as valid for part II in accordance with the legislation**
- An audit concerning ASF (remote) of DG Sante services (Grange) took place from 22.2.-9.3.2021 to check slovak implementation of the legislation, practices and orders in that matter- a lot of comprehensive discussions within audit provided – the preliminary report expected in April 2021

Thank you for your attention
