

Highly pathogenic avian influenza in Germany

Current Situation

SCoPAFF-meeting on 6.4.2022

Content

Current situation in:

1. Wild birds
2. Poultry and captive birds
3. Summary

Situation in wild birds

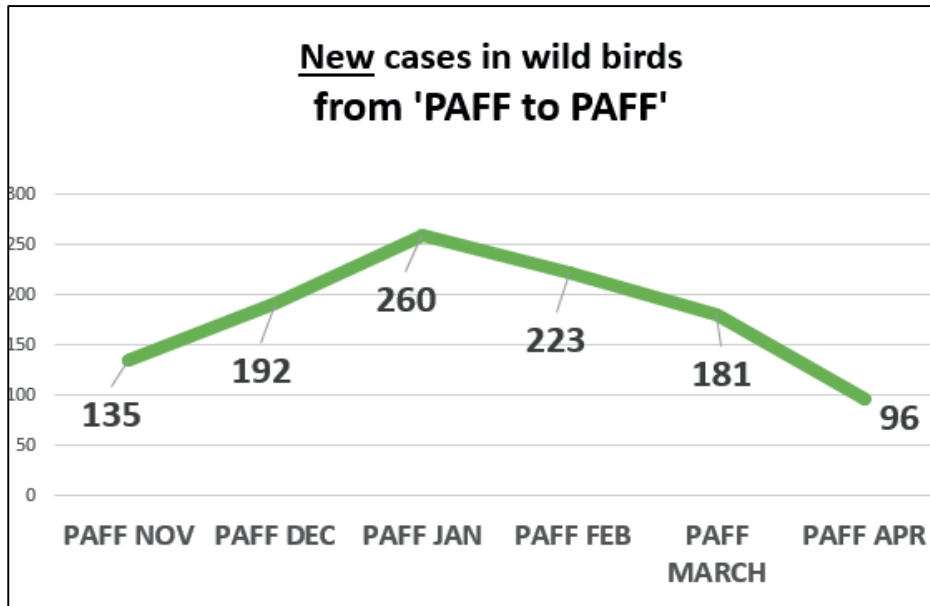

1.189 HPAI outbreaks confirmed
from 15.10.2021 up to 5.4.2022

20 HPAI outbreaks 28.03.-5.3.2022.

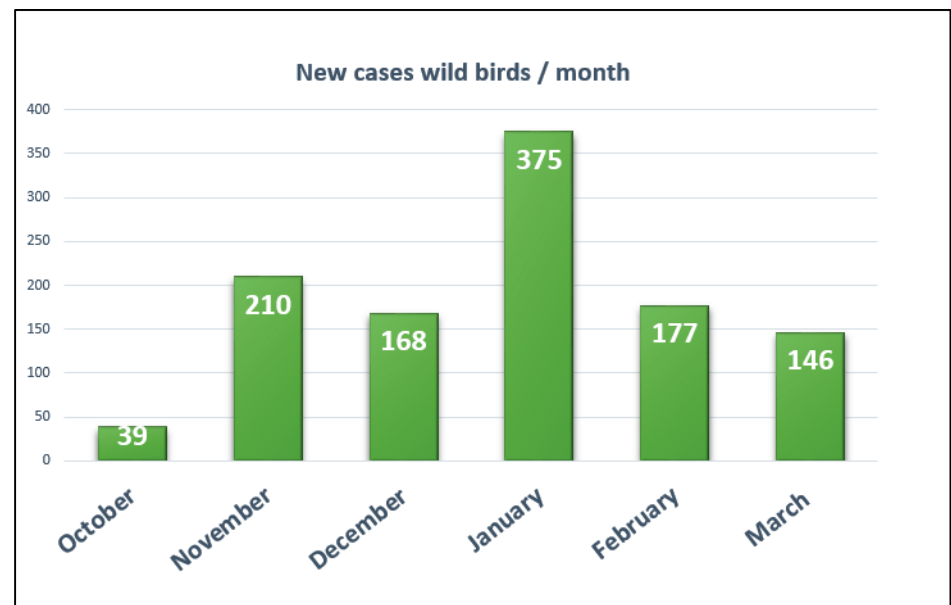

Mainly: middle and northern part of the country

Situation in **wild birds** - dynamic

Decreasing number of outbreaks in wild birds in February and March.

Situation in **poultry** and **captive birds**

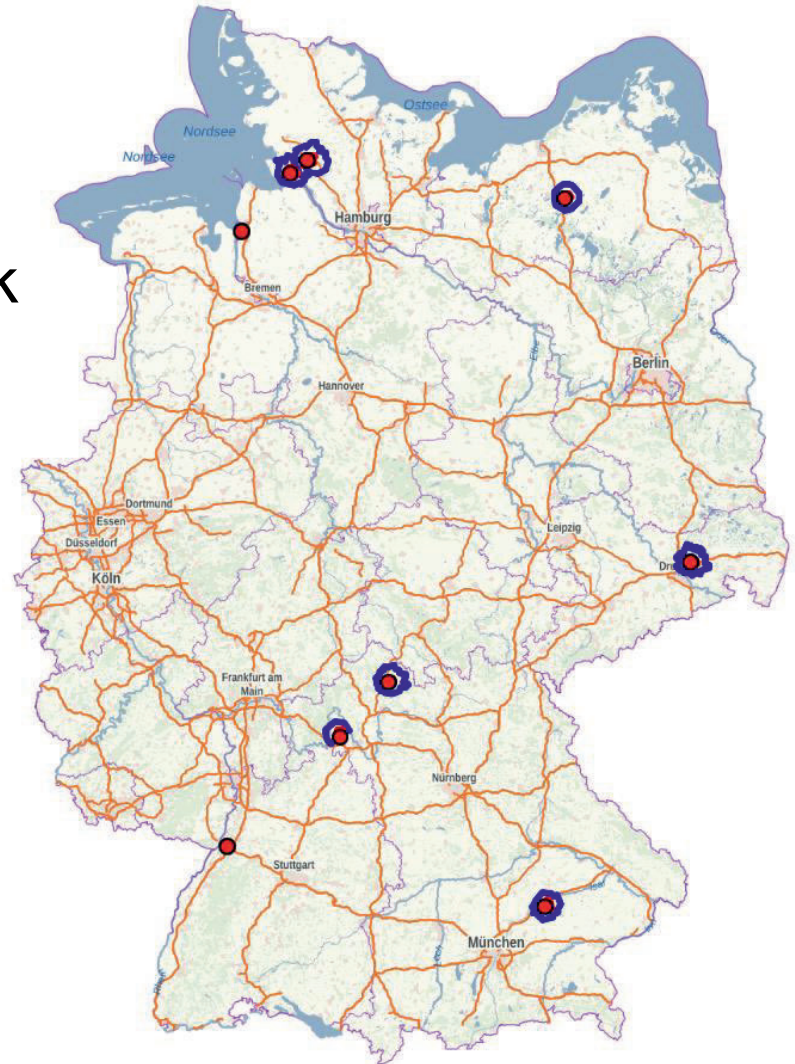

15.10.2021 up to **5.4.2022**

Poultry:

- **6 still active** outbreaks
- In **total** since 1.10.2021:
71 outbreaks including back yards

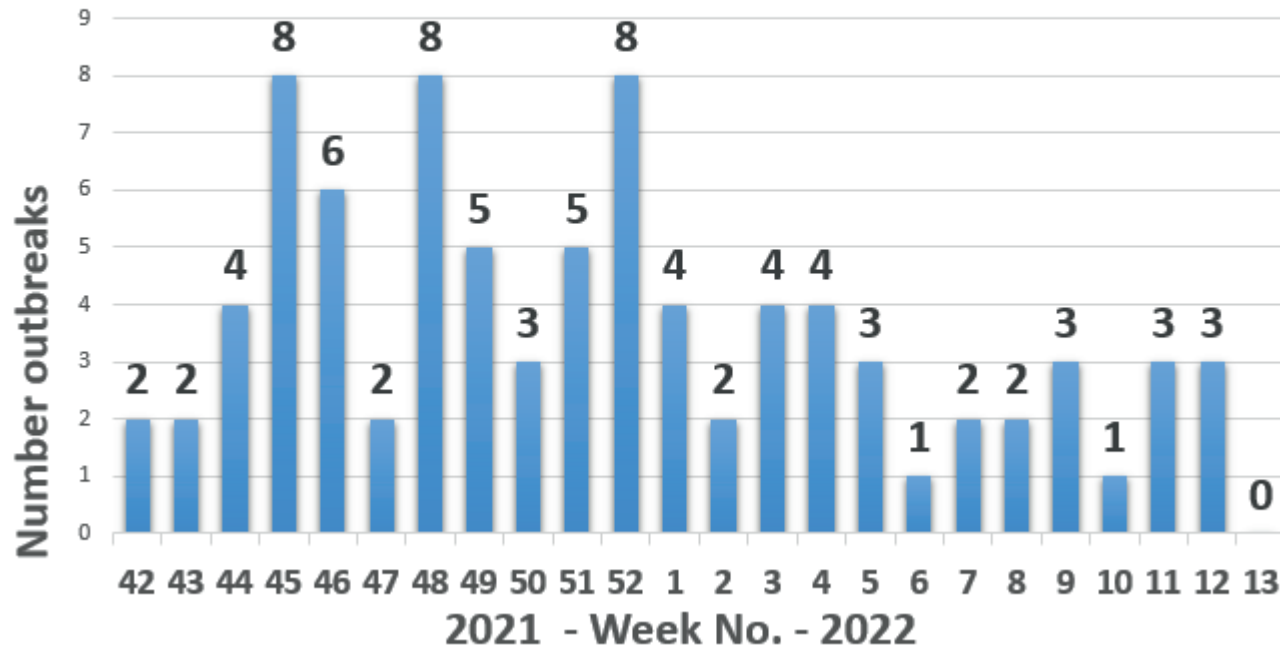

Captive birds (zoos):

- **4 still active** outbreaks
- In **total** since 1.10.2021
8 outbreaks.

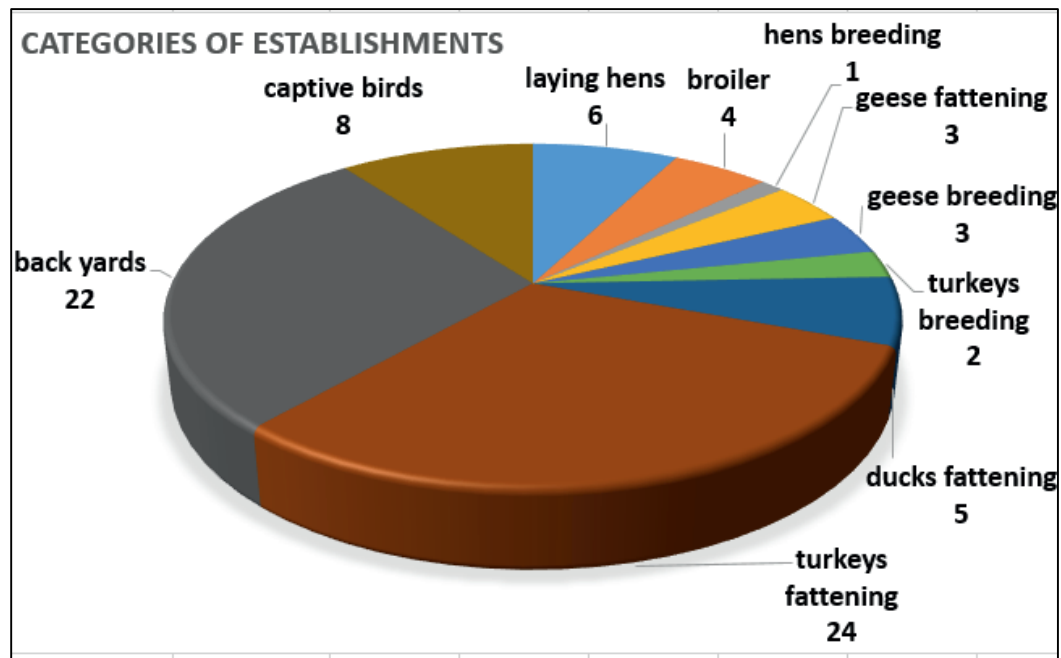

Situation in poultry - dynamic

HPAI outbreaks in poultry and captive birds

Categories of affected establishments 15.10.2021 – 5.4.2022

Summary

- The infection pressure posed by infected migratory wild birds is still present but decreasing in the last two months.
- The disease is still under control.
- The building of a cluster has been prevented effectively.
