Summary

- East part of Slovakia infected by ASF virus in WB population
- 2 enlargements done from the last Paff committee (Prešov and Rimavska Sobota districts)
- Epizootological enquiry will be provided there in due course
- A lot of ADNS messages reported from the beginning of the year 2021 – in the infected area a lot of findings of dead WB reported , hunters are active in searching of dead WB
- Active and passive surveillance of WB in place- depending the localisation of hunting ground, its inclusion into the zone
- In new infected zones- measures newly ordered
- Following the data presented by SK competent authority – EC evaluated the situation and part III has been reduced significantly – thank you for your support to all of you ! (an update of zones presented)
- New methodological guidelines for financial support in relation to sampling as well as intensive hunting in free areas issued – applicable from 20/01/2021
- The meeting (remote) with the veterinary experts from infected districts organised on 3.02.2021 in order to evaluate the situation and highlight the main principles of measures and legislation in that matter

Thank you for your attention
