HANDLING ANIMAL BY-PRODUCTS
INSIDE THE EUROPEAN UNION AND IN THIRD COUNTRIES**

In accordance with the Animal By-products Regulation (EC) No 1069/2009¹, Member States shall make available lists of approved or registered establishments, plants or operators which are handling animal by-products ("ABP"). The Regulation also provides that lists of establishments or plants approved or registered by the competent authority of a third country from where animal by-products or derived products are exported or sent in transit to the European Union, shall be communicated to the Commission and the Member States and shall be made available to the public.

The objective of this document is to provide for a format for the presentation of such lists.

It should be noted that the presentation of such lists should take full account of data protection legislation.

Annex I to this document sets up technical specifications for Member States:

Chapter I sets up the plant sections following the content of the Articles in Regulation (EC) No 1069/2009.

Chapter II lists, where necessary, the category of plants in each section. The lists of the categories of plants are non-exhaustive lists.

Chapter III provides a model layout for the listing of plants.

Chapter IV and V set out codes and legends to be used when completing a list of plants with regard to codes and legends of activities and of product types.

Annex II to this document sets up technical specifications for third countries from where animal by-products or derived products are exported or sent in transit to the European Union.
