1.1 Description and evaluation of the evolution of the epidemiological situation, the technical implementation of the activities foreseen under the programme and the cost-effectiveness of the programme.

The epidemiological situation on TSE remains the same and the programme have not been changed.

The programme covers:

All bovine animals over 48 months, which were emergency slaughtered in accordance with point 1 of Chapter VI of Section I of Annex III to Regulation (EC) No 853/2004 , or during the ante mortem inspection were observed concerning accidents, or serious physiological and functional problems, or signs in accordance with point 2 of Part B of Chapter II of Section I of Annex I to Regulation (EC) No 854/2004
The BSE bovine animals over 48 months of age which have died or been killed but which were not:

- killed for destruction pursuant to Commission Regulation (EC) No 716/96 (2),
- killed in the framework of an epidemic, such as foot-and-mouth disease,
- slaughtered for human consumption.

All ovine and caprine animals over 18 months, which have died or have been killed, but not for human consumption.

Also, testing of cervids, both wild and kept in captivities for CWD have been carried out in accordance with Regulation 999/2001.

No BSE or Scrapie and CWD positive animals have been detected.

1.2 Details on the level of achievement of the targets set in the approved programme and technical difficulties.

The targets bet TSE testing of bovine, ovine and caprine animals and cervids have been achieved.

1.3 Epidemiological maps for infection and other relevant data on the disease/activities (information on serotypes involved,...) (Please attach files of data using the PDF attachment feature) Use the textbox below to provide clarifications for the maps you attach, if needed.

No cases of TSEs and CWD have been detected in Lithuania so far.

2. Tables for TSE monitoring outcome of the year
