ASF-SK .- status 19.11.2020

SK regionalisation – valid 18.11.2020

First place of finding- new affected area

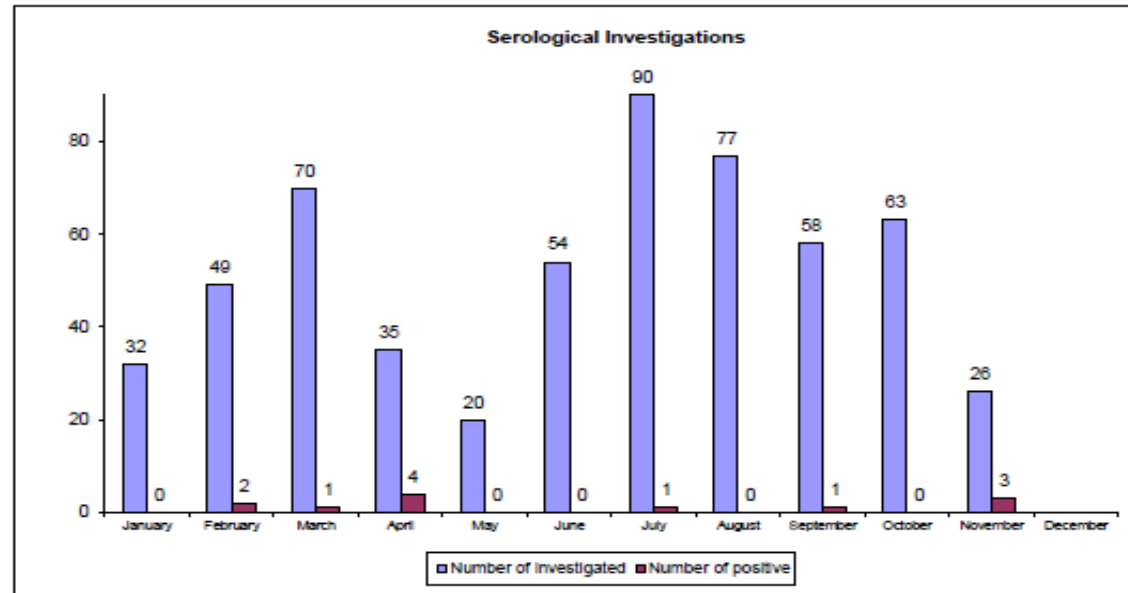

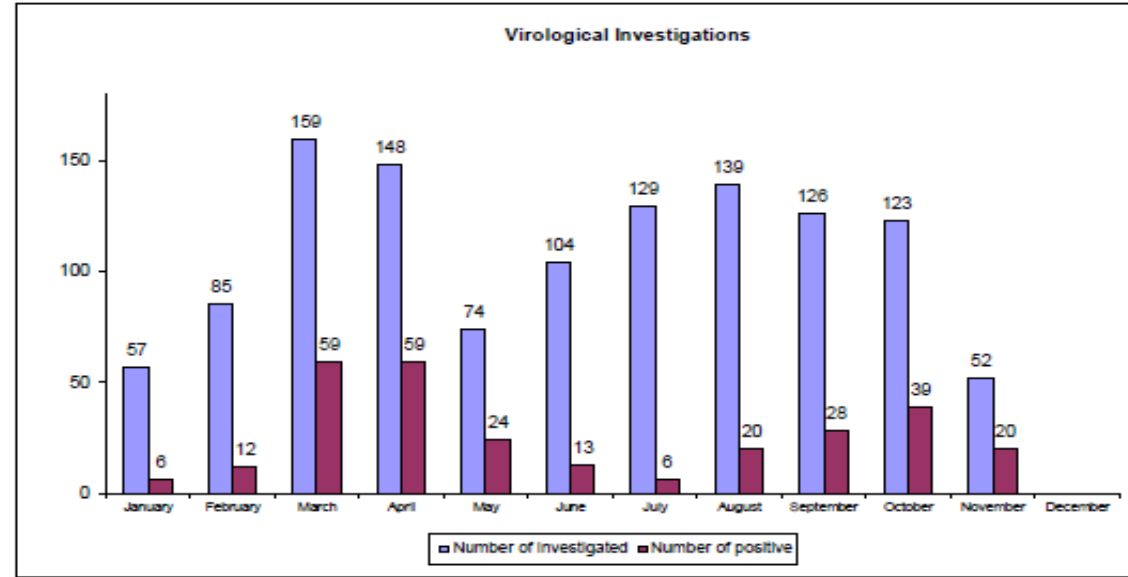

WB found dead – 16.11.2020 ...
new infected area

Measures in relation to new infected area

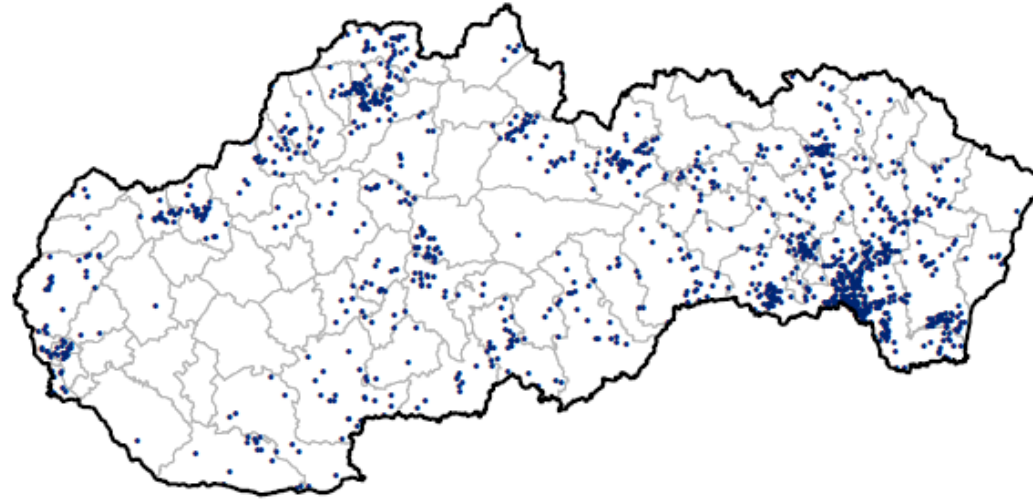

- Zones established
- In the HG – new measures ordered by DVFAs- in accordance with EC/SK legislation and national SK eradication ASF plan
- Including ban of hunting – and – intensive WB searching to determine the area with positive WB in that region
- Epidemiological investigation done – also from central level – „usual“ spread of disease questionable – human transmission probably
- Expert group met on 16/11 to evaluate the situation and to align further steps amongst infected districts as well as surroundings districts

Laboratory Investigations of ASF in wild boars in Slovakia during 2020 (January - 11 November) - passive surveillance

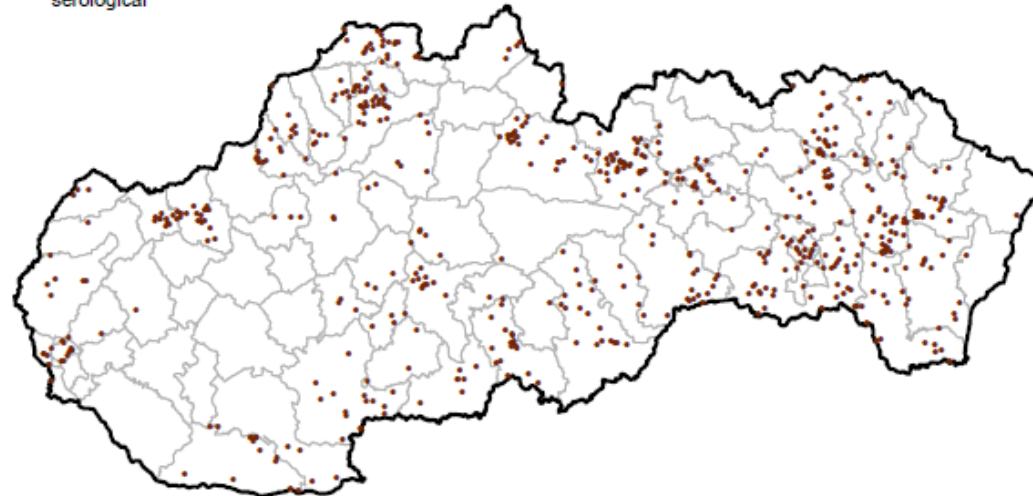

Geographical distribution of samples submitted for ASFV investigation in wild boars in Slovakia during 2020 (January - 11 November) - passive surveillance

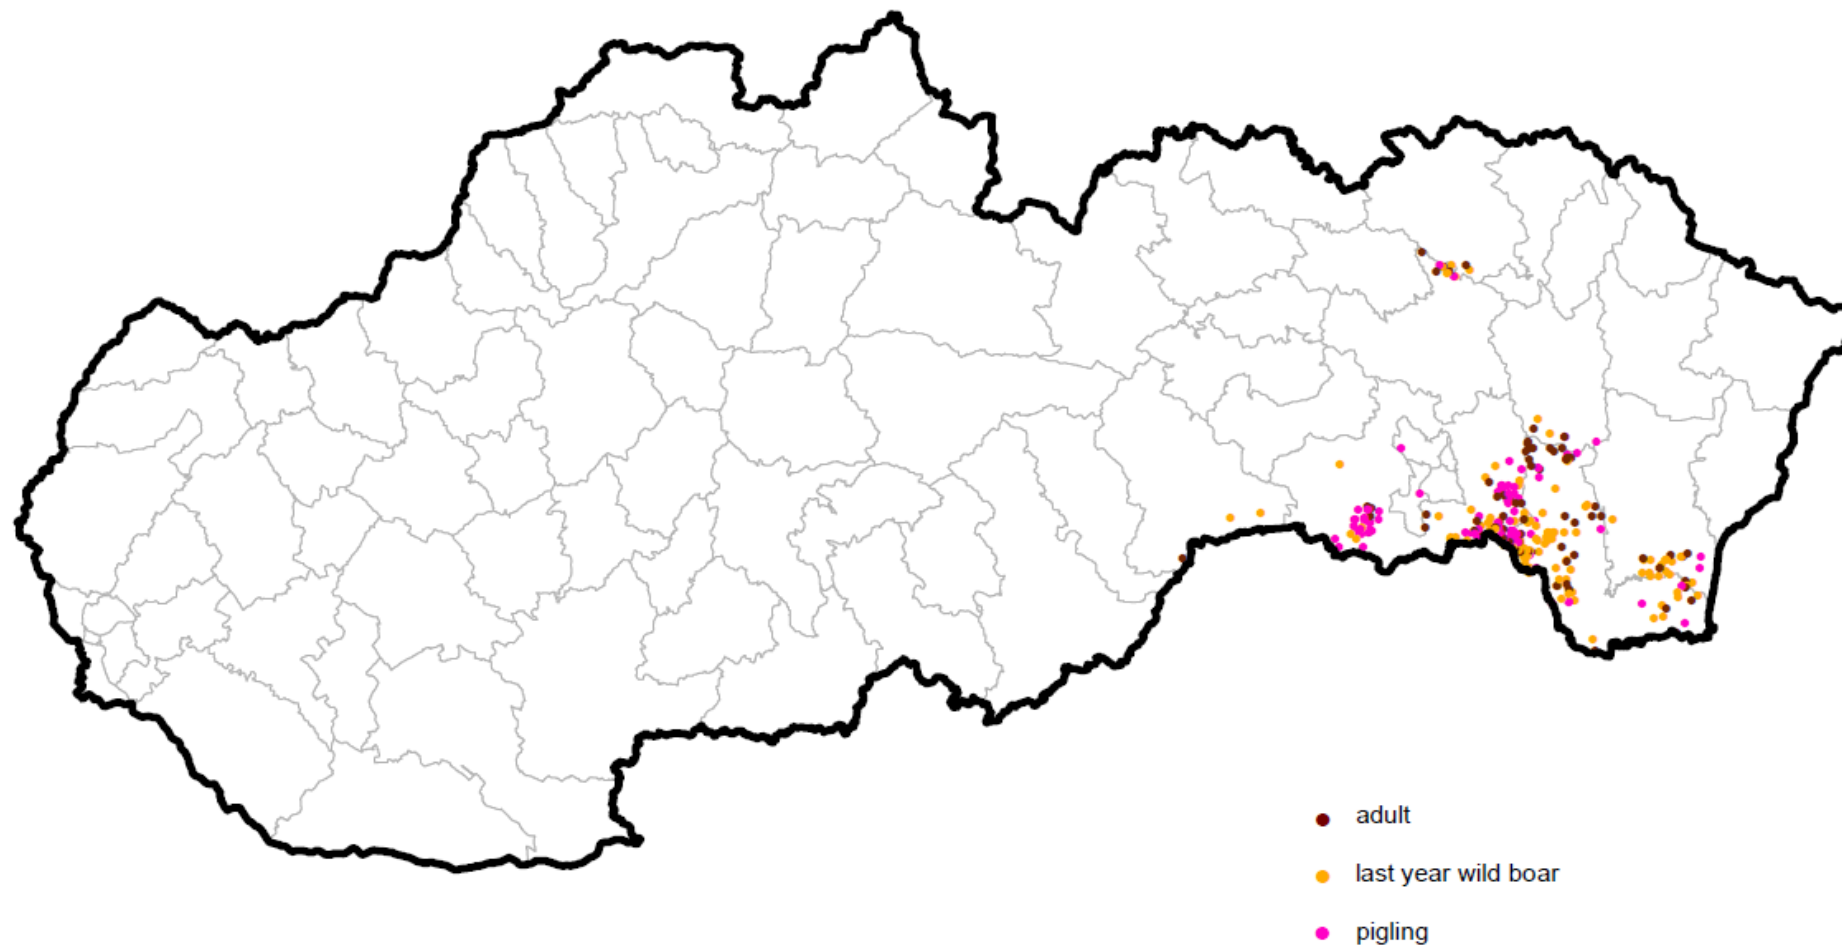

virological

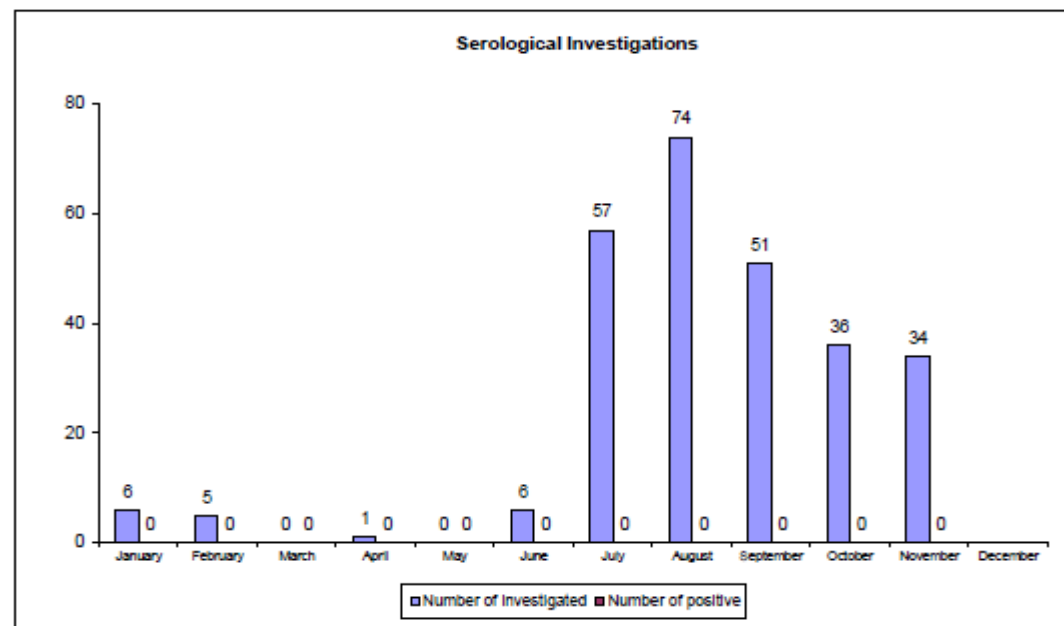

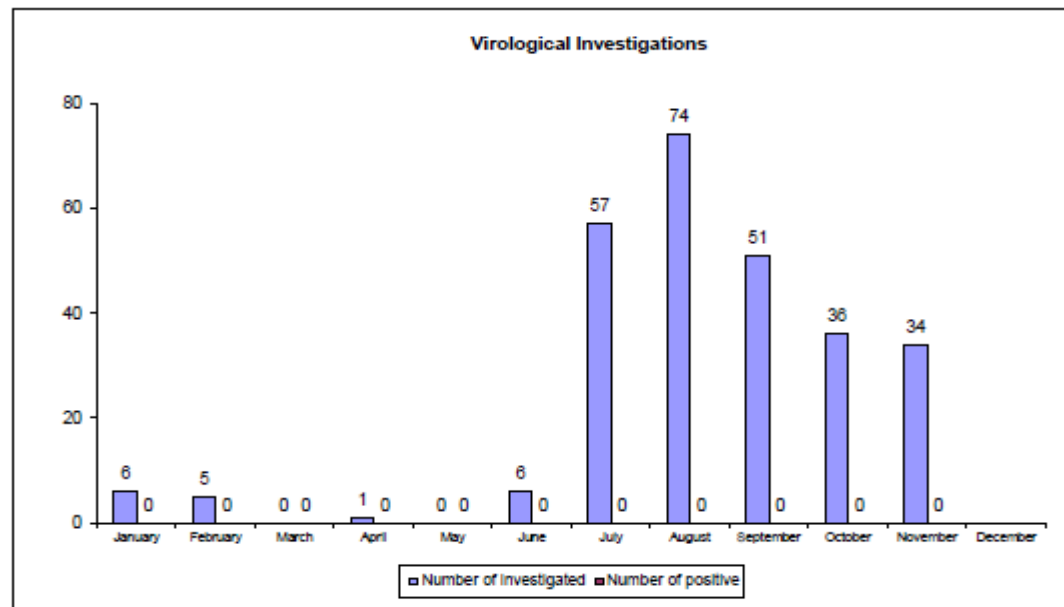

serological

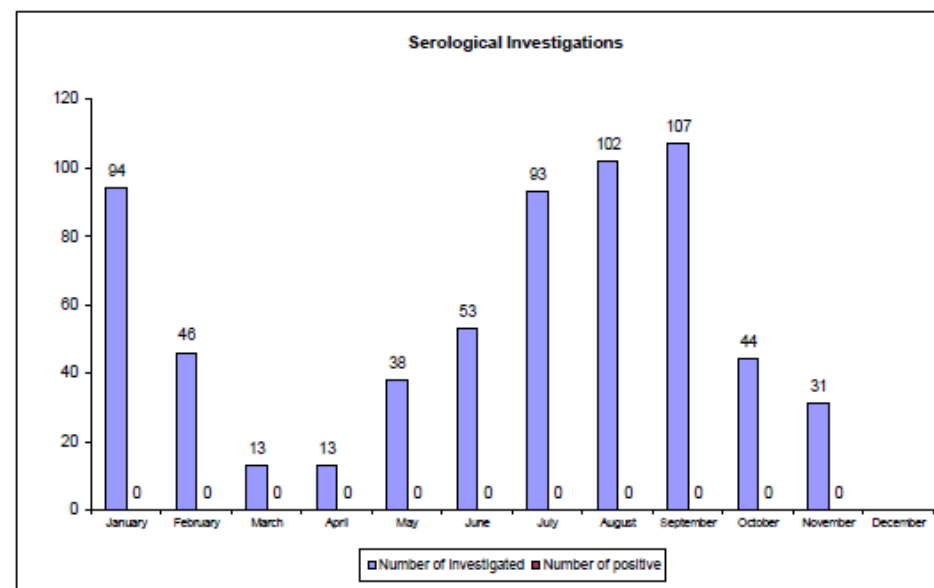

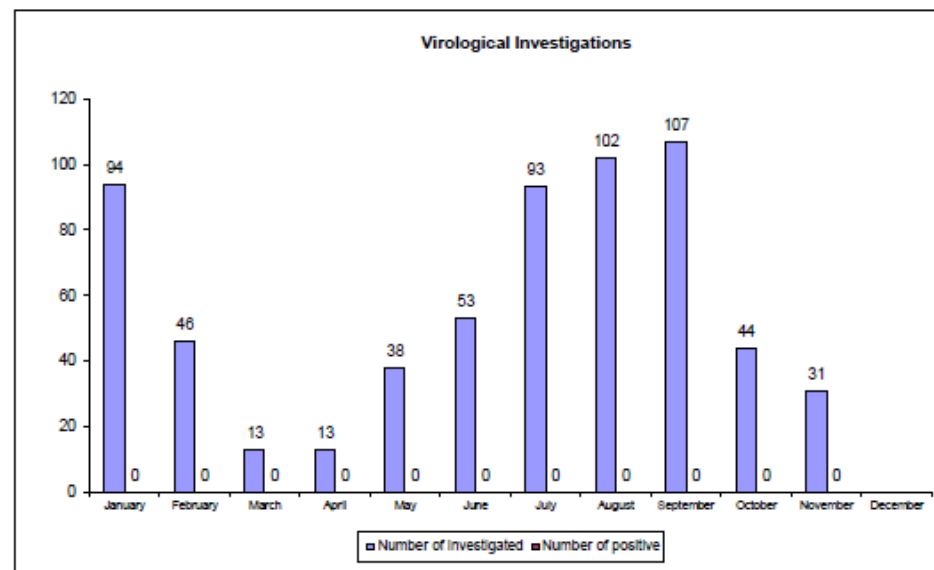

Geographical distribution of wild boars samples positive for ASF virus in Slovakia during 2020 (January - 11 November) - passive surveillance

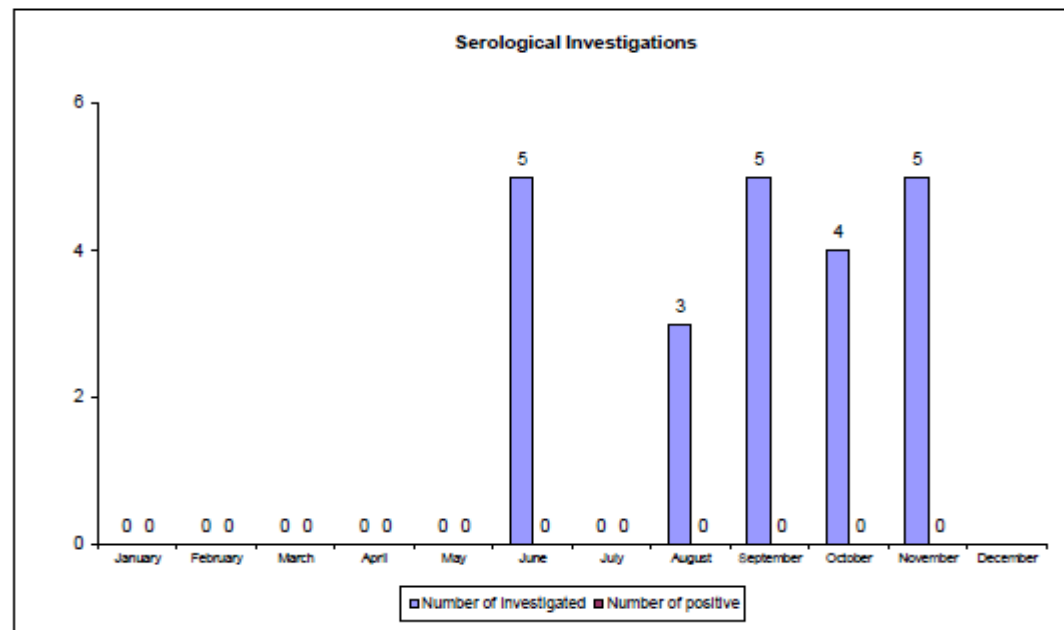

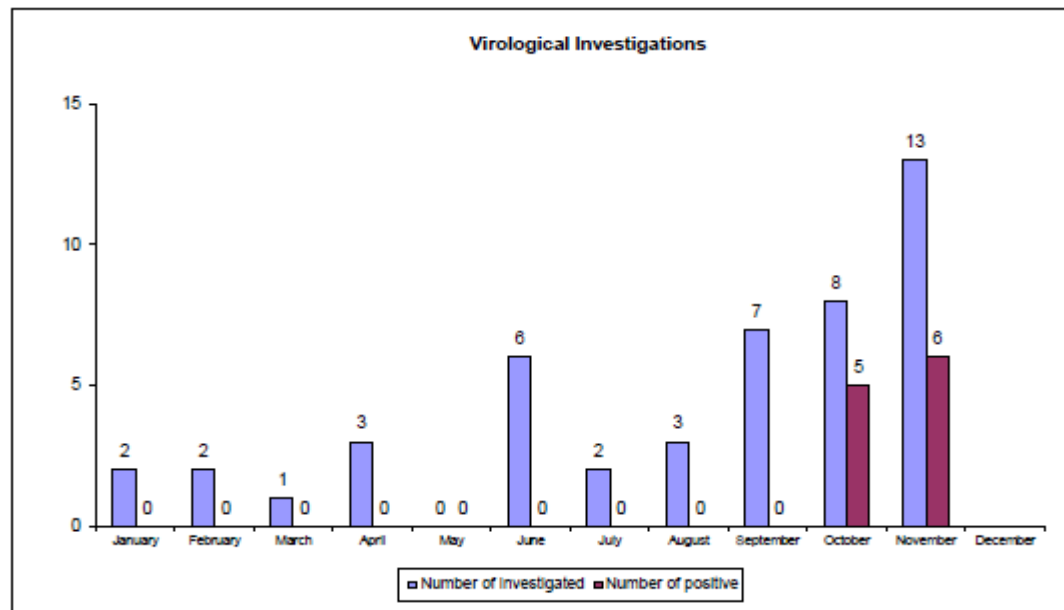

Laboratory Investigations of ASF in wild boars in Slovakia during 2020 (January - 11 November) - active surveillance - district Prešov

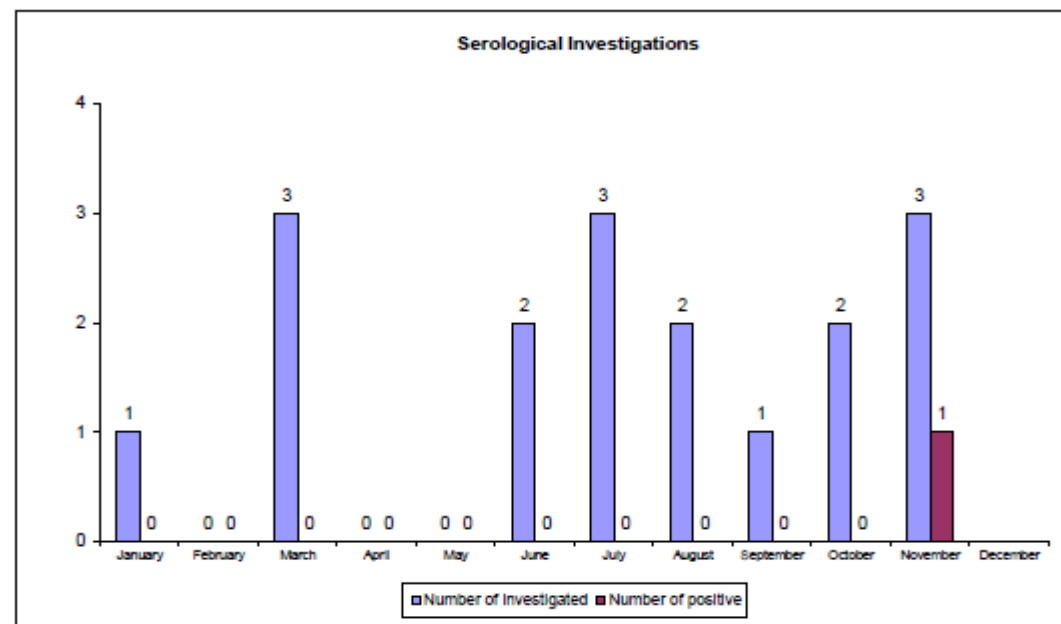

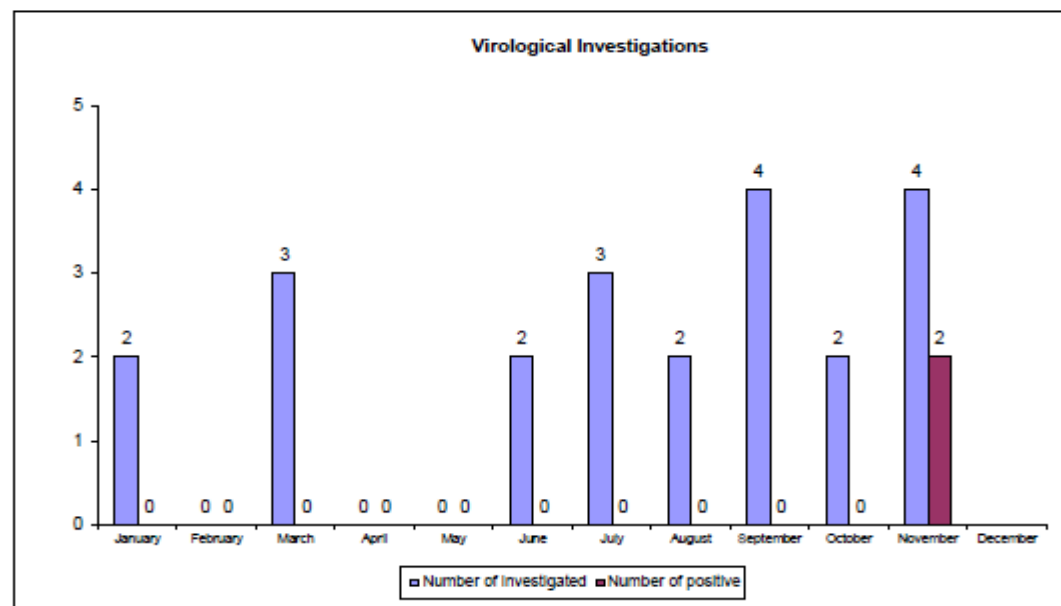

Laboratory Investigations of ASF in wild boars in Slovakia during 2020 (January - 11 November) - active surveillance - district Bardejov

Laboratory Investigations of ASF in wild boars in Slovakia during 2020 (January - 11 November) - passive surveillance - district Prešov

Laboratory Investigations of ASF in wild boars in Slovakia during 2020 (January - 11 November) - passive surveillance - district Bardejov

Long term WB management

- Intensive hunting of to decrease density WB – to slow spreading the disease in new areas
- Feeding of WB – not permitted – to intensify the controls of HGs – the percentage of HR to be checked in „free“ areas – under consideration
- To promote individual hunting on baiting places
- Detailed conditions /possibilities to hunt WB (1. hunting using night visions devices which do not have their own intentional „outline“, artificial lighting 2. hunting WB at a distance of less than 100 m from the border of the hunting ground 3. hunting of WB on hunting grounds on which agricultural work is carried out at the same time 4. to hunt WB by hunters even if they do not have an approved WB rearing and hunting plan
- Distribution of colling boxes for shot WB also in north part Slovakia (close to PL border)- planned to be perform in the near future
- To continue in financial motivation to perform hunting/searching activities in order to reduce the population

Summary

- WB positivity confirmed in the area currently determined in the legislation as well as in 2 new regions- jump of positivity around 40 km
- The adjustment of zones (part II as well as part I) done
- Check of holdings in the areas with confirmed ASF in domestic pigs – ongoing
- The campaign regarding further registration of pigs holding- in progress – a lot of citizens have used so called „registration amnesty“ (registration till now non registered holding without further sanction for the breeders related to the obligation to have the holding registered)
- Epidemiological investigation of the situation with the aim to determine the source of infection in new infected area – under evaluation

Check the situation in the hunting ground on the spot...
