7. OTHER COMMENTS

7.1 Further written comments on the seeds and propagating material review:

Our organisation is very concerned about availability of seed and plant material of healthy and qualitative varieties adapted to our climate and suitable for our members of amateur gardeners. We are also concerned about a great diversity of varieties as conditions vary a lot even in our

country. Even the demands of amateur gardeners differ from them of commercial growers. Many of varieties for amateur gardeners are sold in small quantities and therefore the administrative burden for suppliers of these varieties must not be an obstacle
