Current situation concerning BHV-1 status of the German *Länder* II

- ✓ BHV-1 is a notifiable disease in all Germany since 1997 (Federal Ordinance)
- ✓ BHV-1 plan started on 1 March 2004 in all *Laender* (Article 9-regions)
- ✓ 7 *Laender* are listed in Annex I of the Decision 2004/558/EC (yellow in the slide above)
- ✓ 7 *Länder* are listed in Annex II of the Decision 2004/558/EC (green in the slide above)

Current situation concerning BHV-1 status of *Baden-Württemberg*

- ✓ Systematical eradication of BHV-1 started on a voluntary base in 1987
- ✓ Since 1997 compulsory eradication program (federal ordinance)
- ✓ Since 2000 BHV-1 investigation in all cattle compulsory, individual eartagging of „reagents“ (= virol. positive for wild type of virus, non-vaccinated but serol. positive for BHV-1 or detection of antibodies against gE-glycoprotein if vaccinated)
- ✓ BHV-1 vaccination prohibited since 1.3.2015
- ✓ Removal of all BHV-1 reagents until 31.3.2015
- ✓ Since 1.4.2015 entry into herds only for BHV-1 free, non-vaccinated animals from free herds

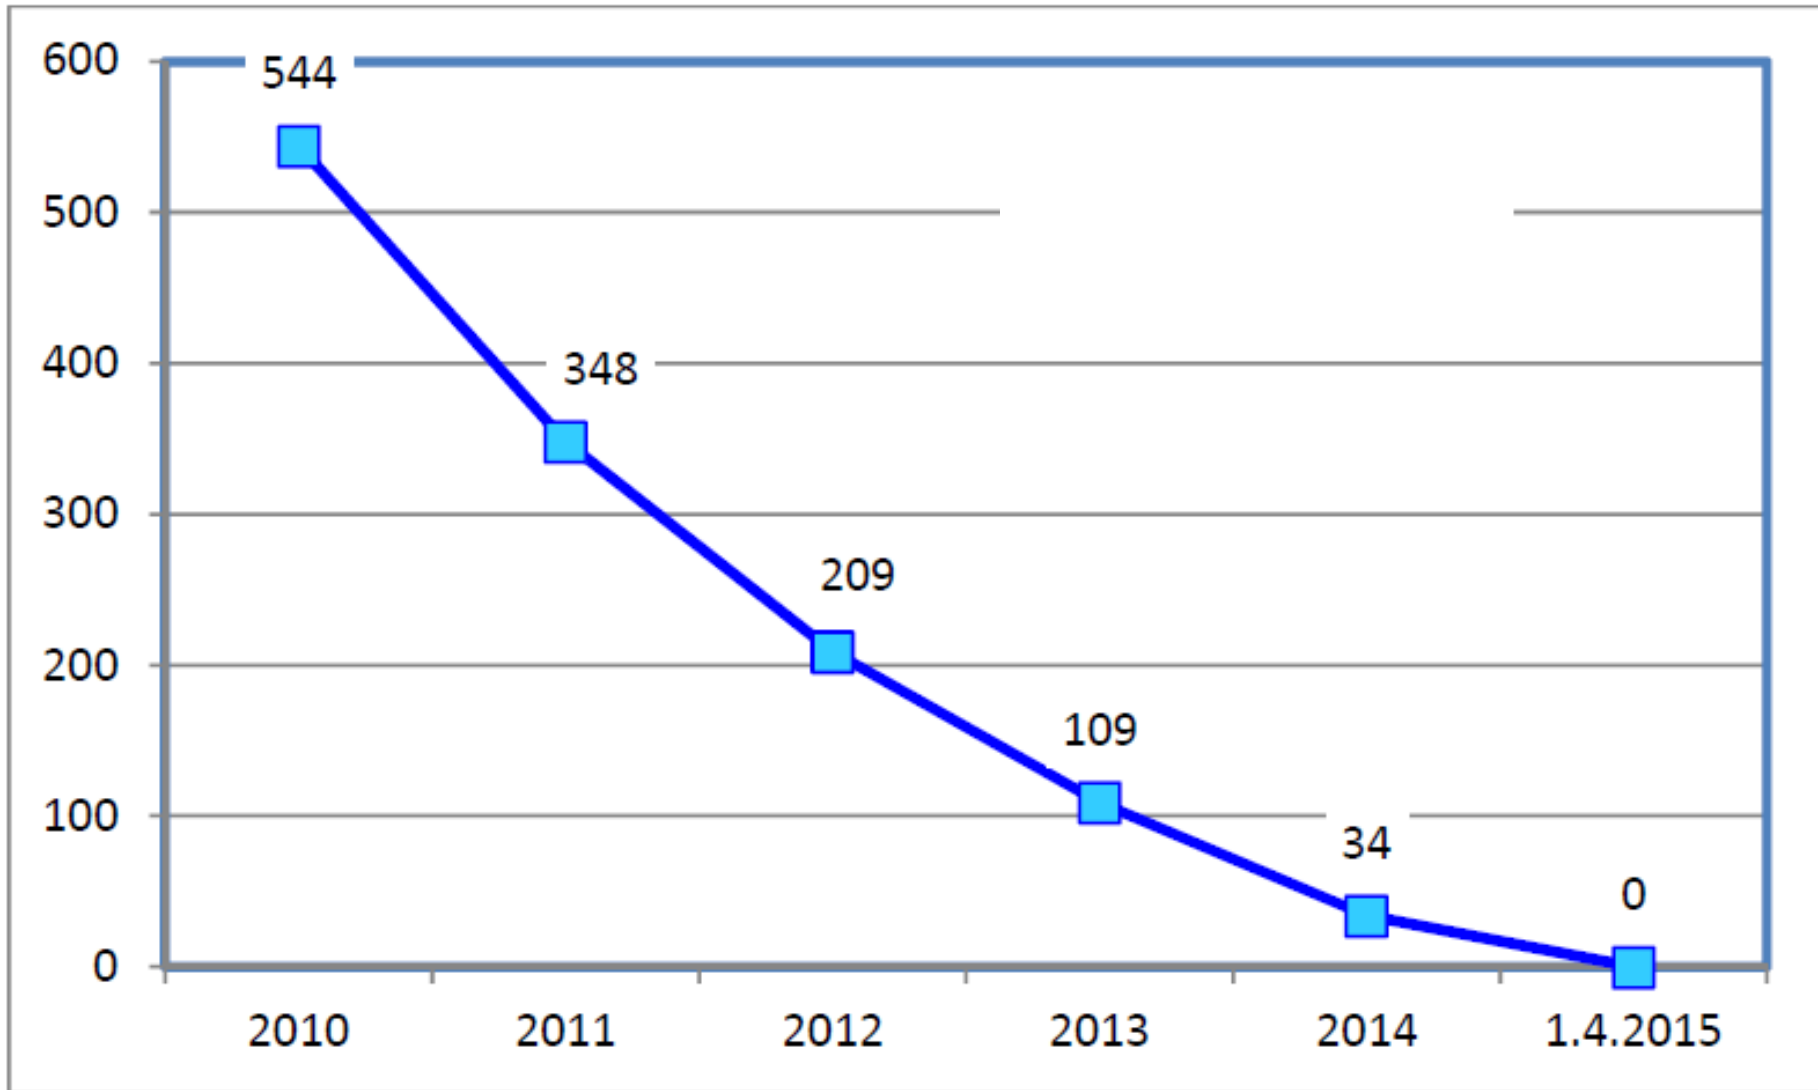

BHV-1 free herds in *Baden-Württemberg* from 2006 to 2014

Federal Ministry
of Food
and Agriculture

herds with reagents in *Baden-Württemberg* from 2010 to 2014

Ongoing measures

- ✓ serological control of all BHV-1 free holdings according to the BHV-1 Federal Ordinance (bovine animals >24 months of age, at least once every 12 months) by the competent authority
- ✓ Results of all serological tests are entered into the national database (Hi-Tier)
- ✓ Detected seropositive bovine animals are to be killed/slaughtered immediately (official order)
- ✓ Official control of the national and EU-trade of bovine animals by the competent authority (also with the help of HI-Tier)

Thank you for your attention!
