Control measures

in accordance with Council Directive 2005/94/EC

Additional measures:

- Enlargement of the restrictive zones
- In the whole territory of the affected counties: transport of poultry can only take place based on negative PCR result
- Preventive killing/slaughter has been carried out – based on risk assessment – in protection zones, but in certain parts of the surveillance zones also
- No stocking can take place in the restricted zones
- Lifting of restricted zones: surveillance of holdings 95 % specificity and 10 % prevalence/zone

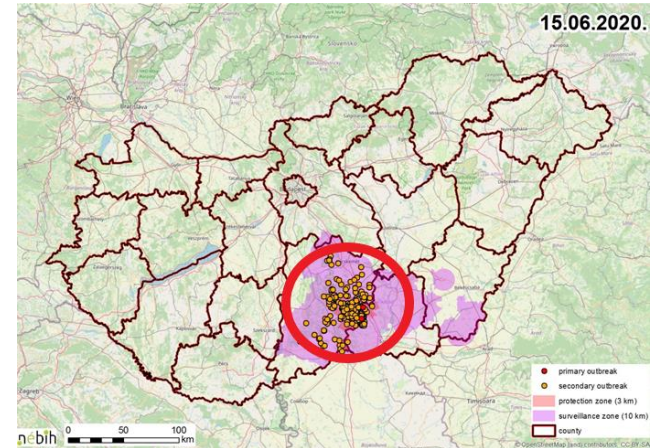

CID - Amending the Annex to Decision(EU) 2020/47

Following a high-level meeting

Annex 2 – the „coherent” restrictive zone

Additional measures:

- further limitations on movements
- movement of poultry and day-old chicks from and to holdings and within zone
- derogations only for: poultry and day-old chicks from free areas, poultry within zone, direct transport for immediate slaughter, day-old chicks to outside

Lifting of the protection zones

15th June

- Csongrád-Csanád county – 17 protection zones
- Békés county – 5 (all) protection zones

30th June

- all remaining protection zones in Bács-Kiskun and Csongrád-Csanád county

Bács-Kiskun county

Census: 1 144 910 animals

Surveillance: 15 350 swabs in 199 holdings

Surveillance in whole country 01.01.2020-12.06.2020

County	Virology	Serology
Affected counties	89 873	2 717
