

African swine fever – situation/control/surveillance measures applied in Slovakia

Martin Chudy, DVM. Acting HoU
Animal health and animal welfare
State Veterinary and Food Administration
of the Slovak republic

PAFF Committee meeting, Brussels 19.9.2017

Aim of the presentation

- **ASF epidemiological situation**
- **ASF Surveillance /**
- **ASF control programme**
- **Recommendations of FVO missions/
Preparedness measures**
- **Public awareness**

ASF epidemiological situation – 18.9.2017

- **no virologically positive results in wild boars and domestic pigs**
 - **ASF has never been detected in Slovakia**

Monitoring of ASF in wild boars

- all perished wild boars on the whole territory;
- all sick and suspicious wild boars on the whole territory;
- all hunted wild boars in the ASF buffer zones

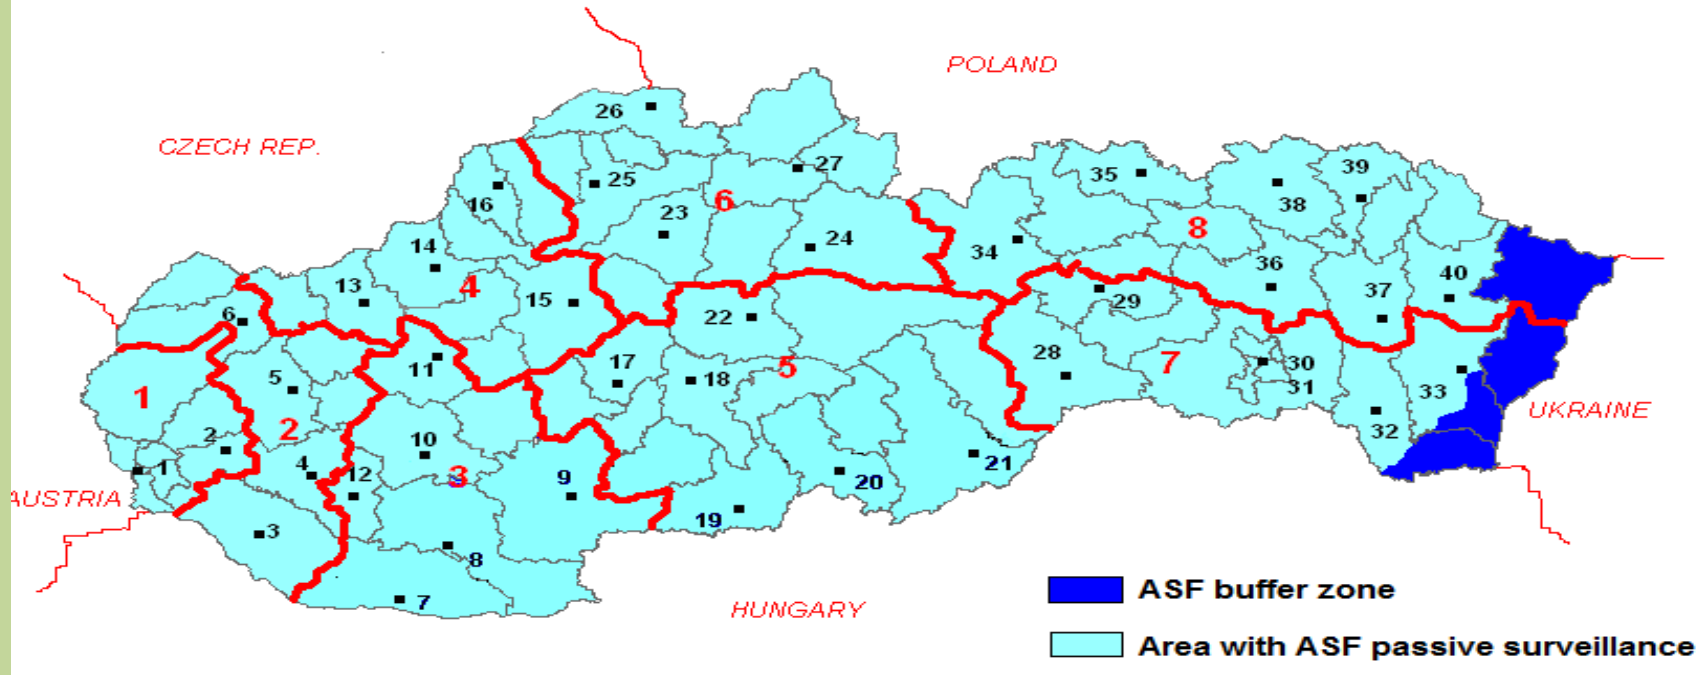

ASF control programme

the year 2017 (January-Jun 2017)

**Demarcation of ASF buffer zone –
20-30km from Slovak–Ukraine border**

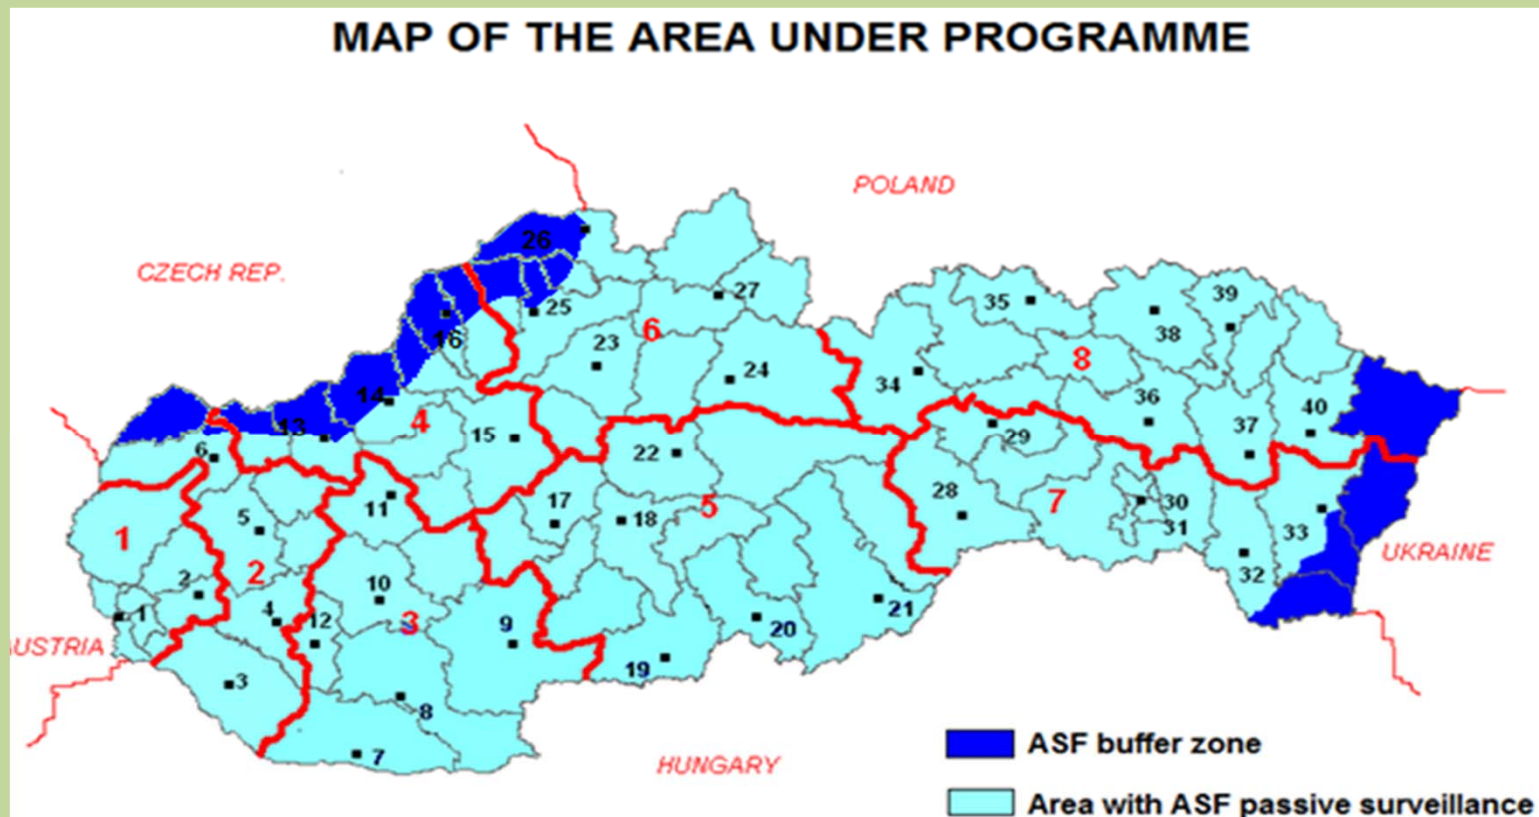

MAP OF THE AREA UNDER PROGRAMME

Updated ASF control programme in the year 2017 (July 2017)

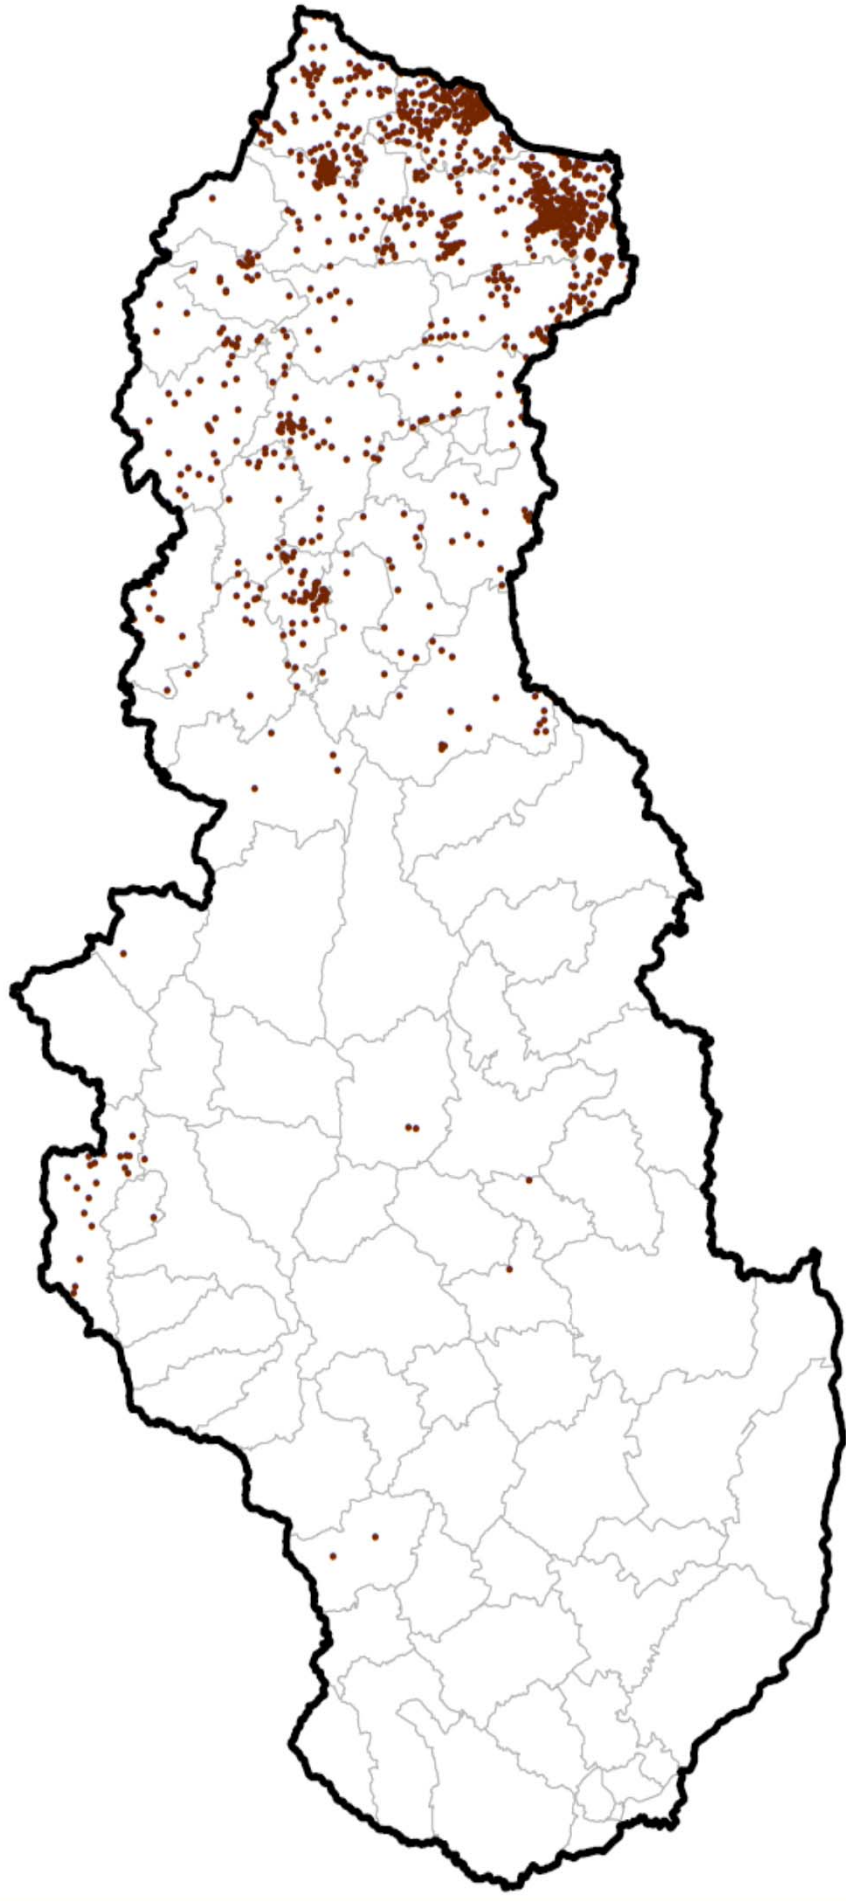

Demarcation of new ASF buffer zone –
20-30km from Slovak–Czech border

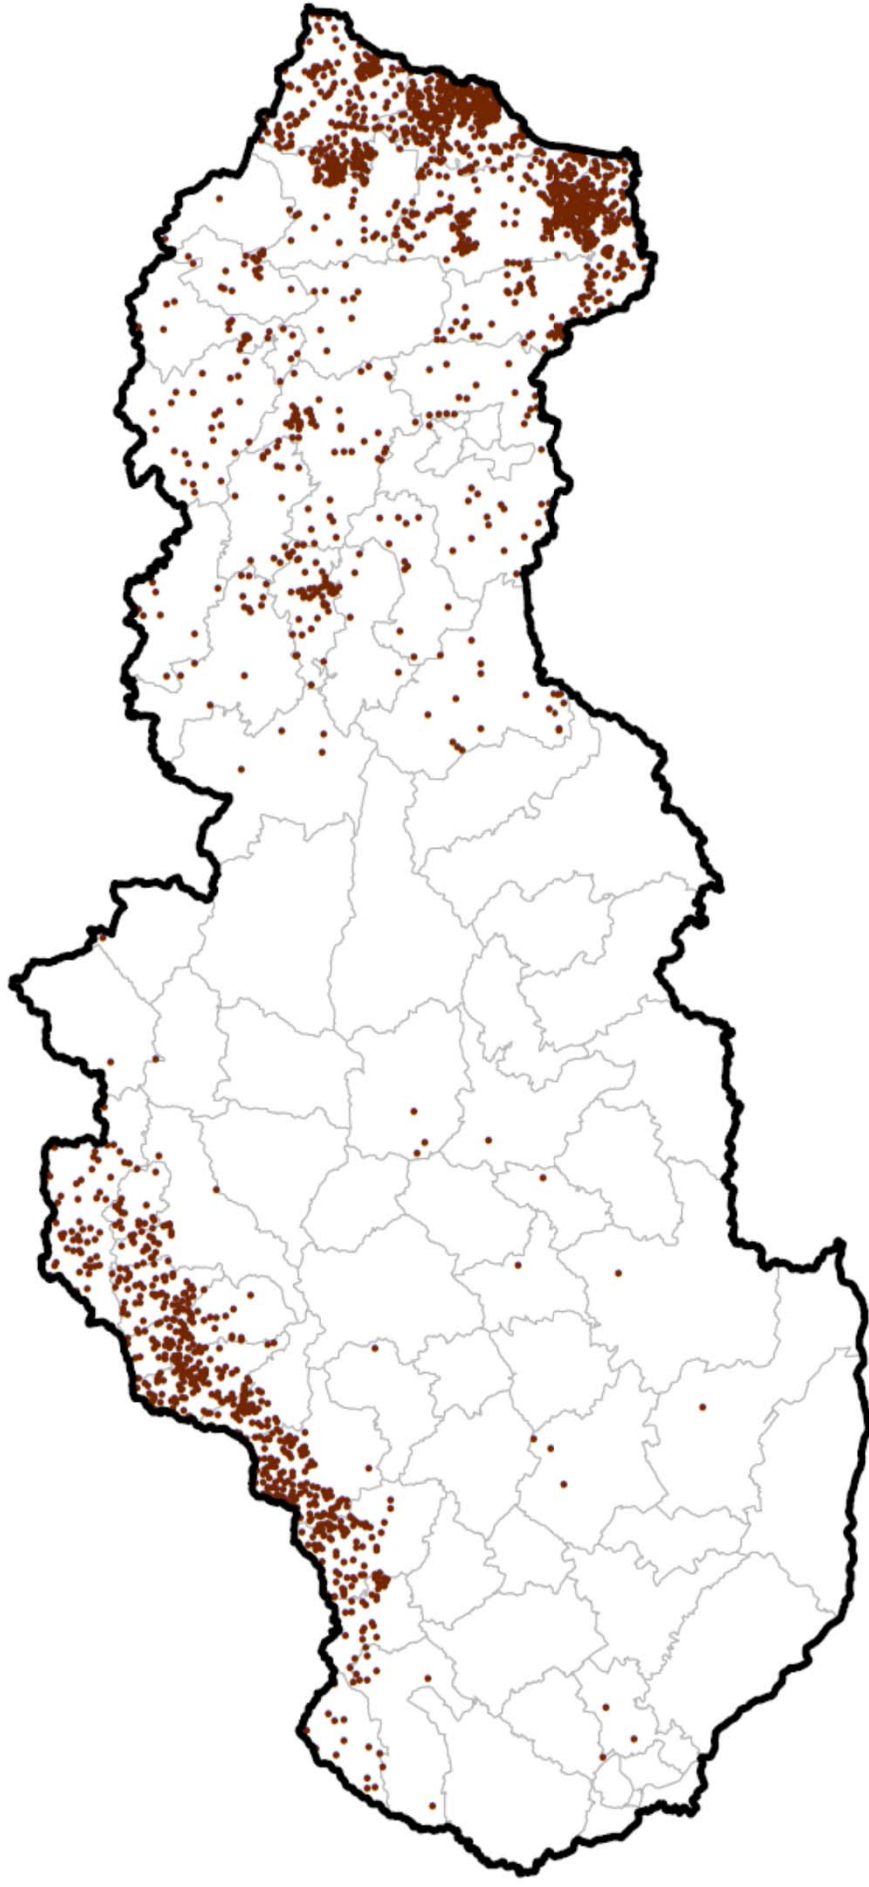

Laboratory Investigations of ASF in hunted wild boars **in Slovakia (January – June 2017)**

Laboratory investigations of ASF in wild boars in Slovakia in 2017 (January - June) - active surveillance

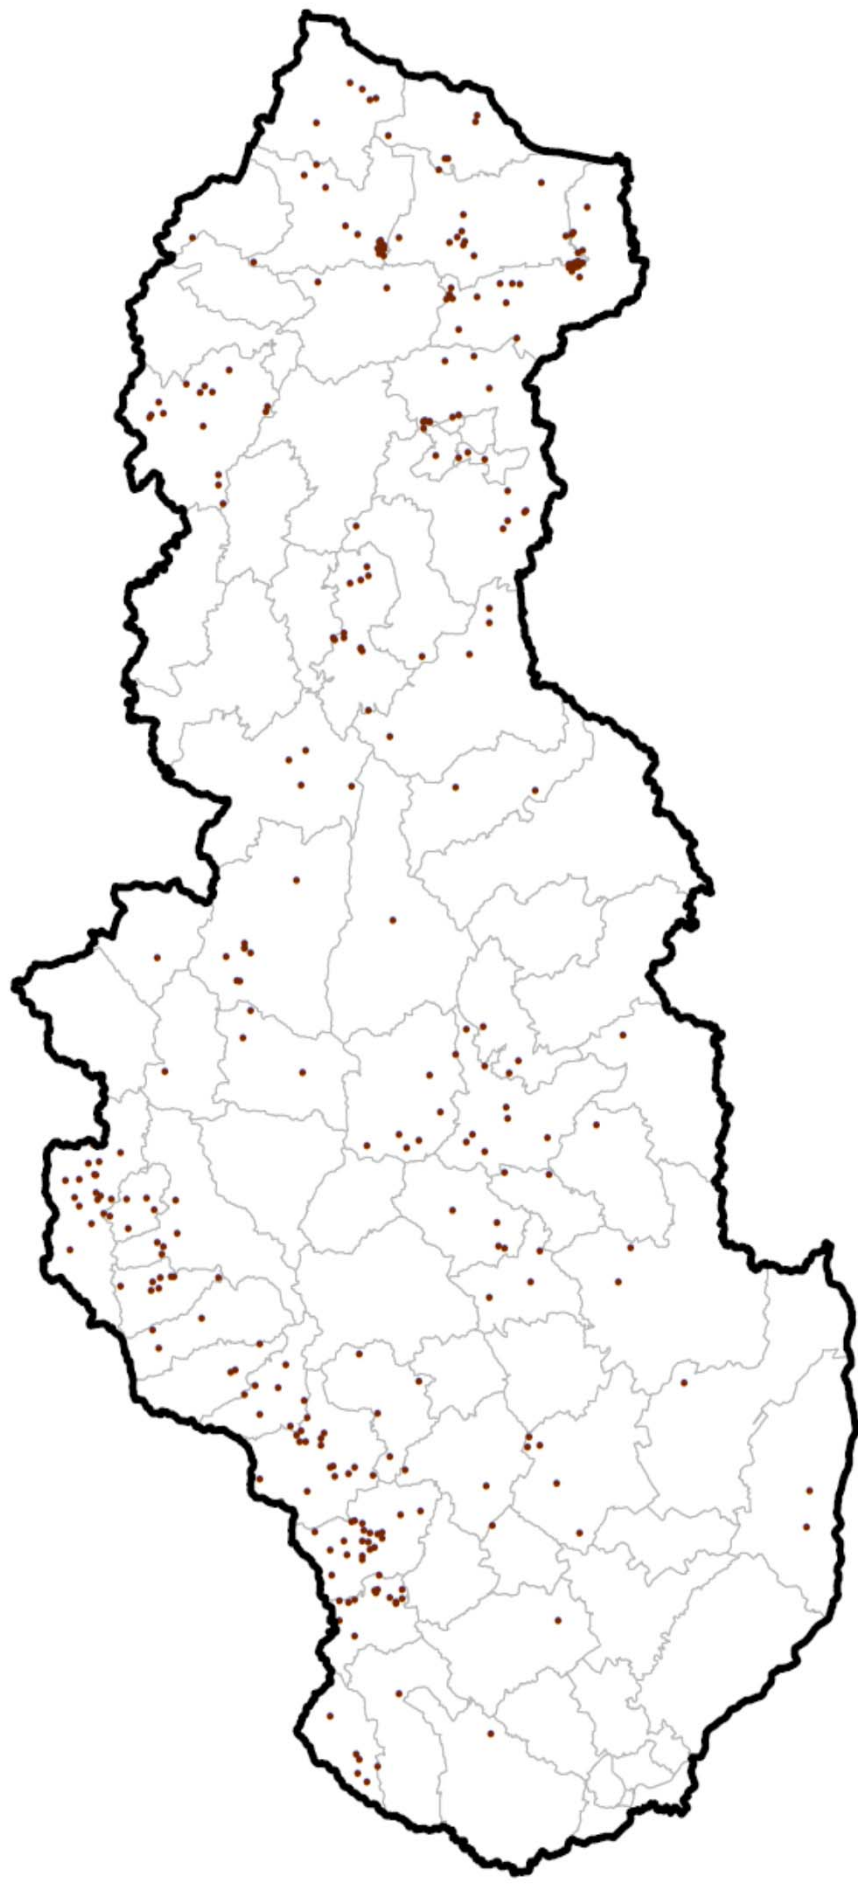

Laboratory Investigations of ASF in hunted wild boars **in Slovakia (January – August 2017)**

Laboratory investigations of ASF in wild boars in Slovakia in 2017 (January - August) - active surveillance

Laboratory Investigations of ASF in perished wild boars in Slovakia (January – August 2017)

Laboratory investigations of ASF in wild boars in Slovakia in 2017 (January - August) - passive surveillance

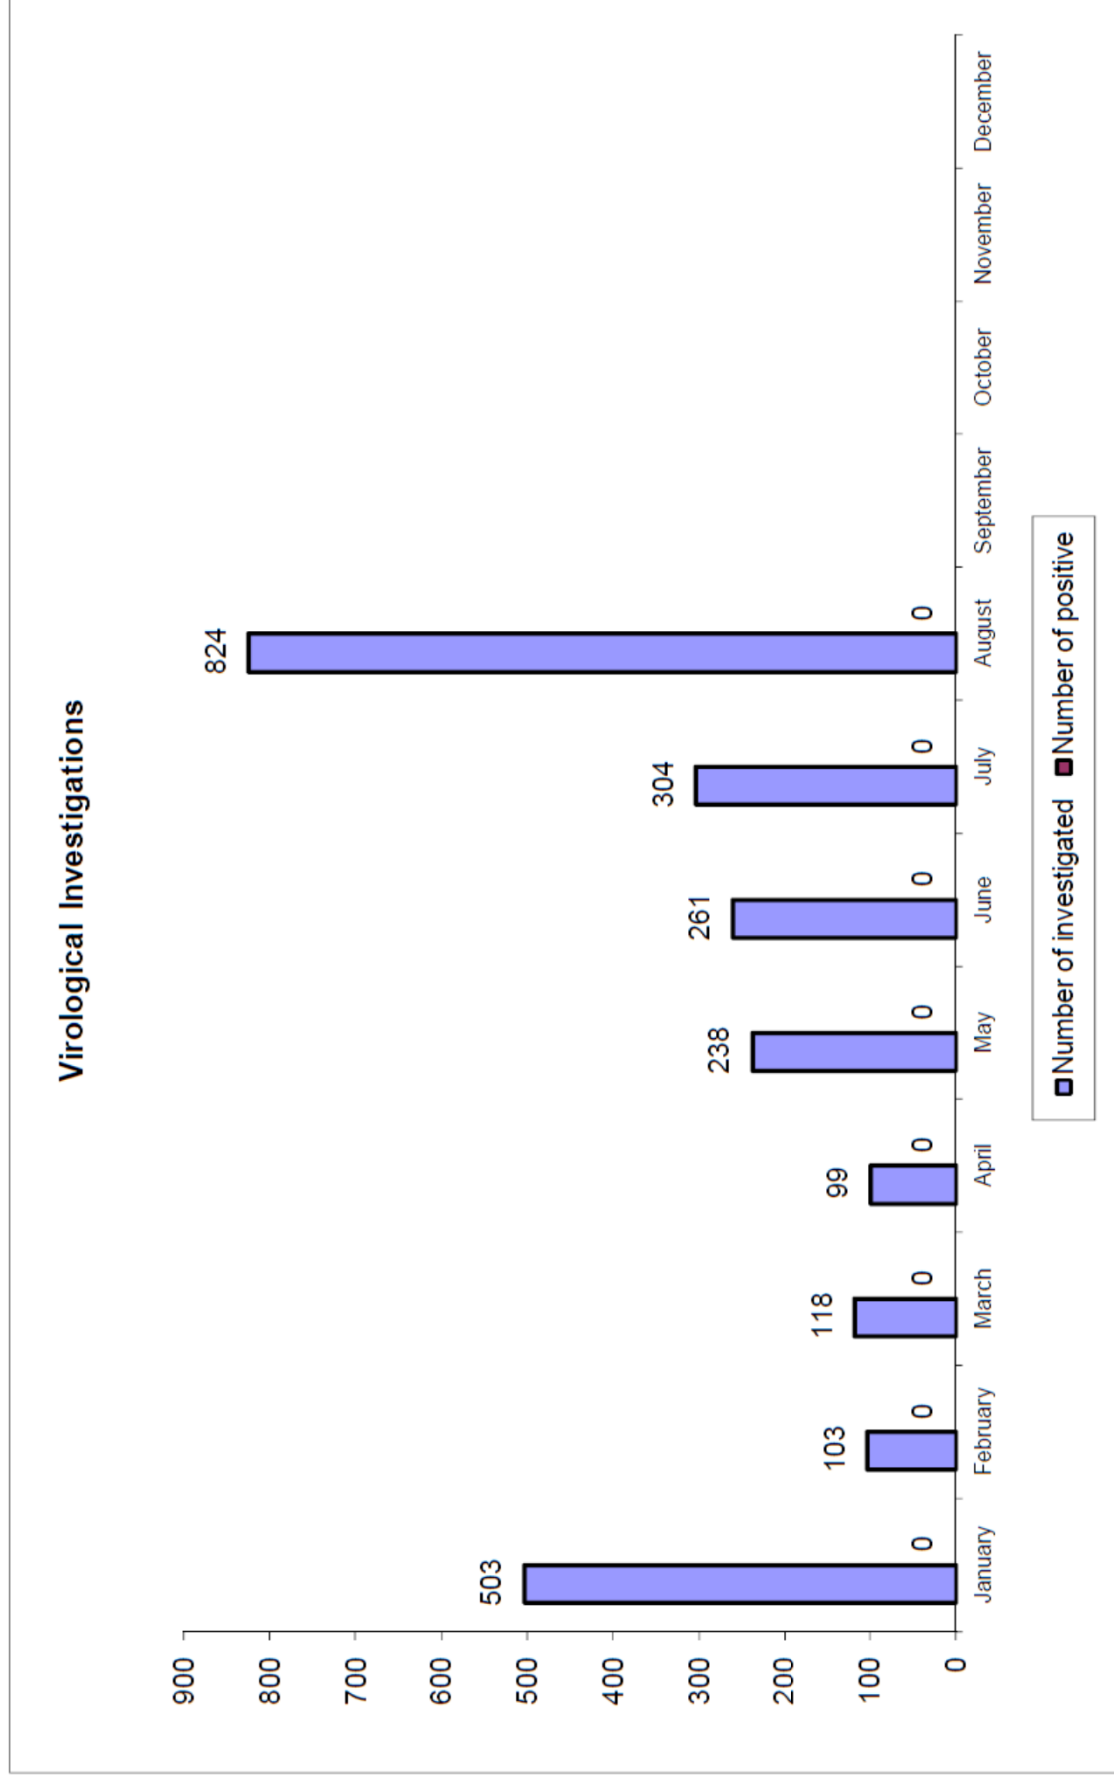

Laboratory Investigations of ASF – WB in Slovakia (January – August 2017) (perished)

Laboratory Investigations of ASF in wild boars in Slovakia during 2017 (January - August)

Passive surveillance of ASF in domestic pigs

Clinical examination

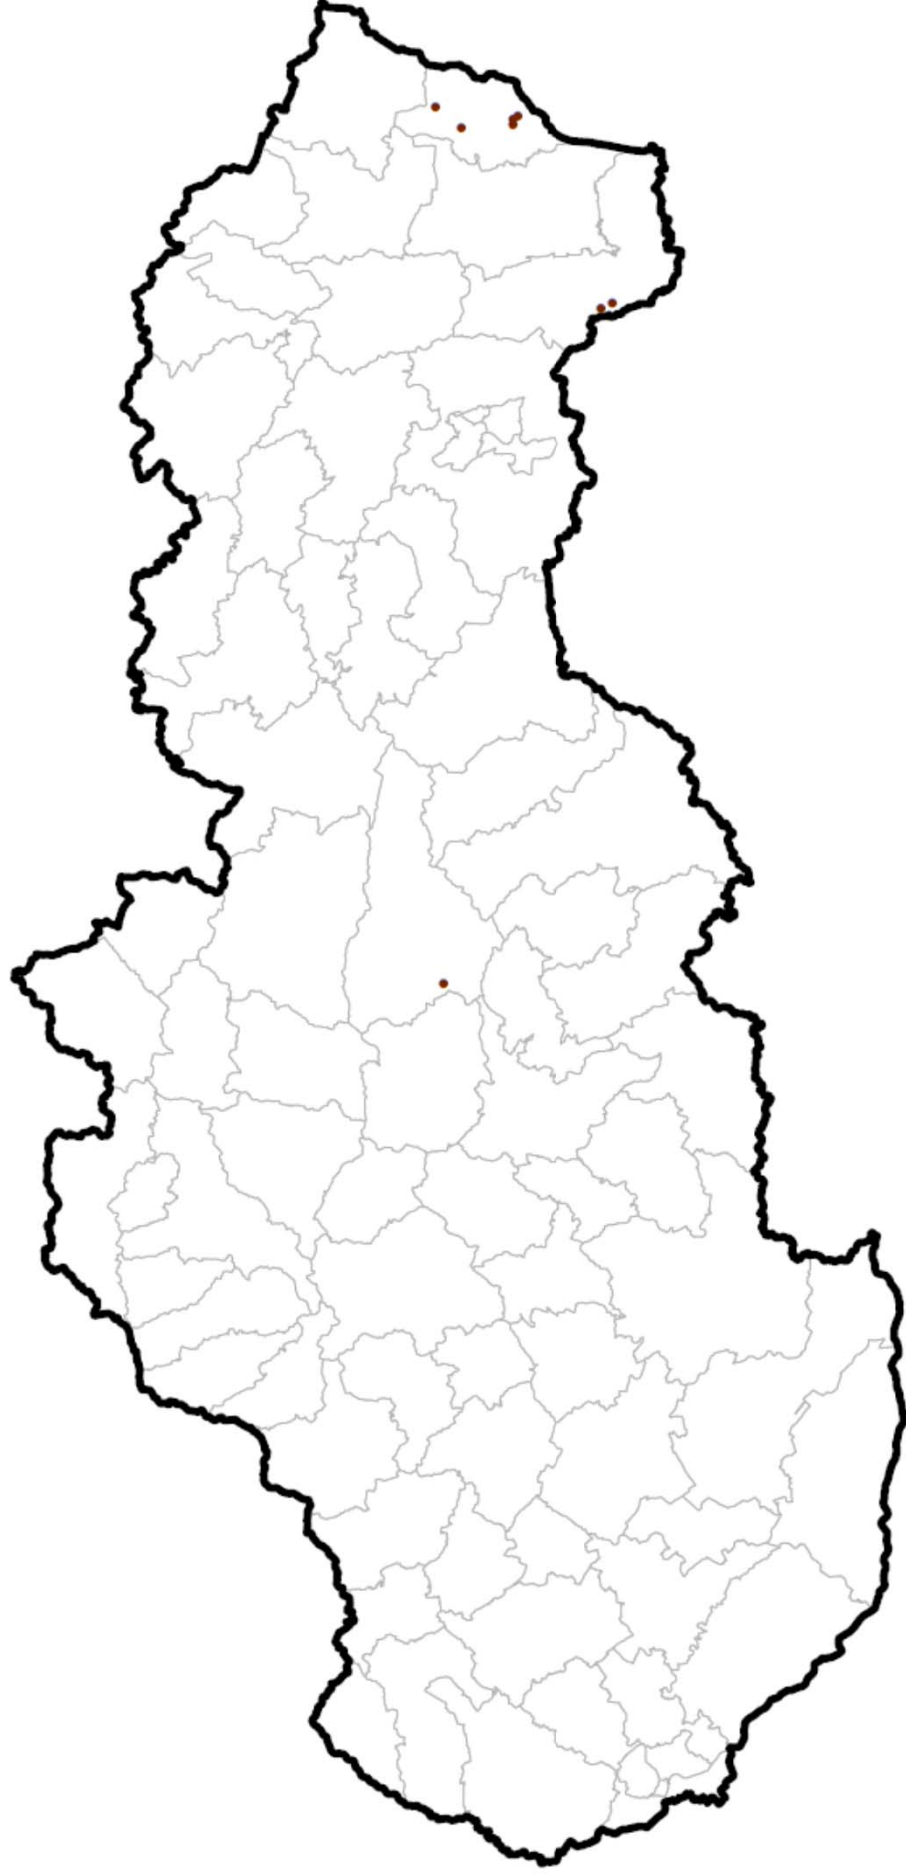

- in all pig holdings will be performed at least twice a year, with an interval of at least 6 months in high risk area and at least once a year in low risk area by a private veterinarian authorised for this activity.

ASF sampling

- virological monitoring (PCR) of all sick and death domestic pigs with ASF-clinical signs
- virological monitoring of all death domestic pigs in all pig holdings (including backyard farms) in the ASF buffer zone(s) – updated 1.1.2017

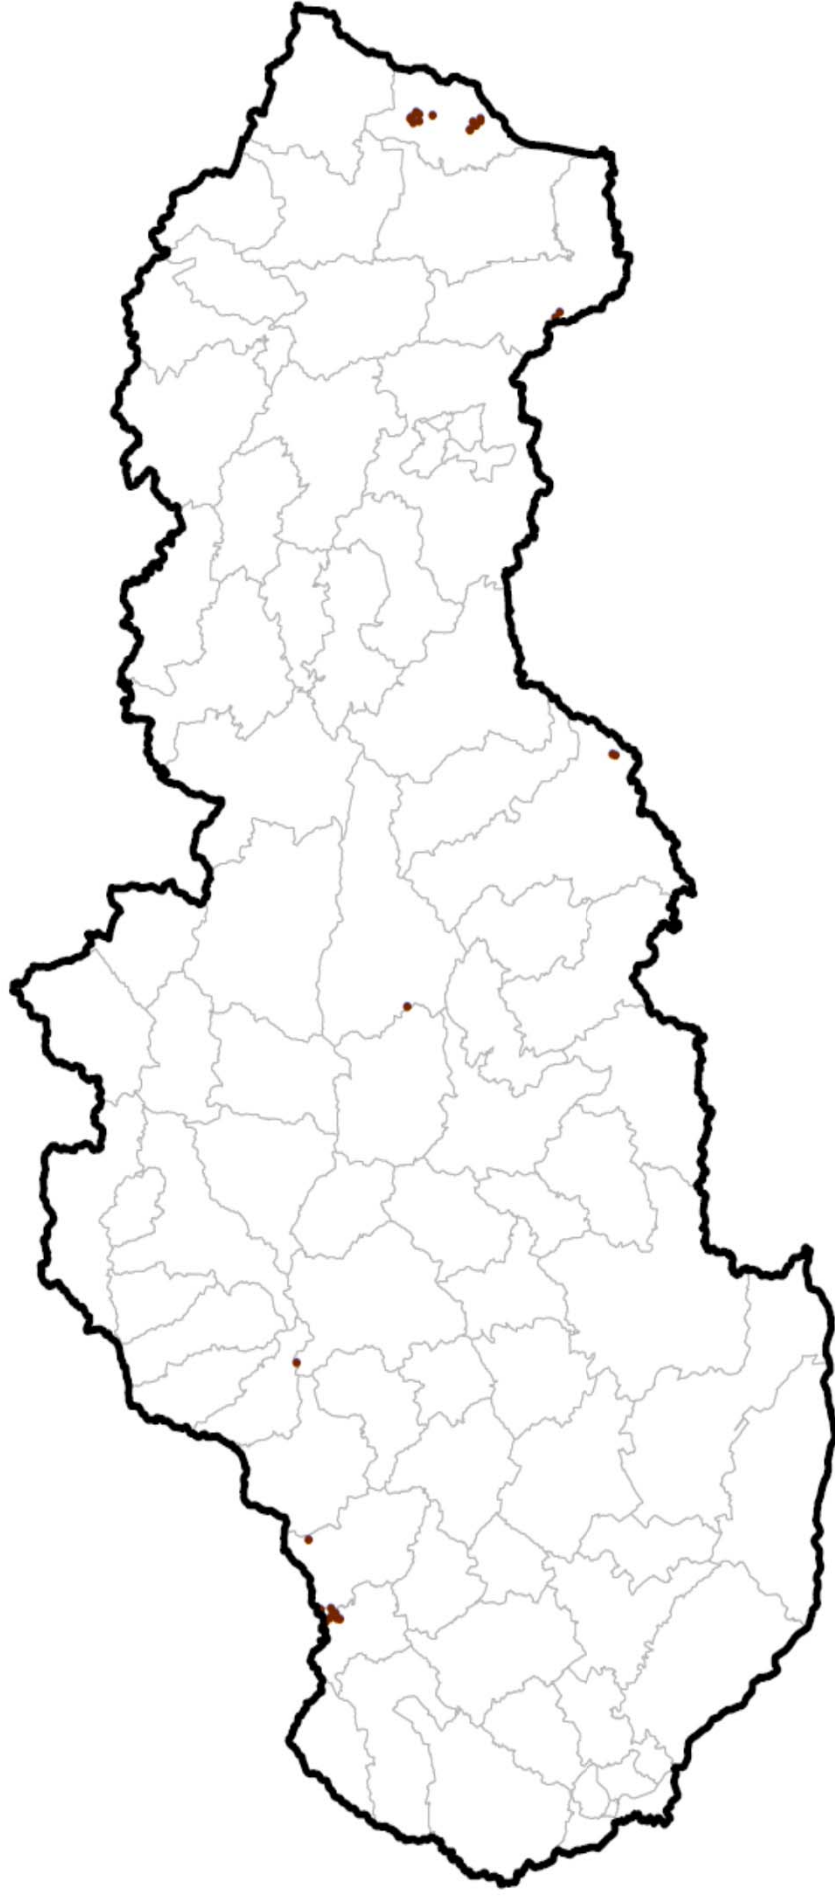

Laboratory Investigations of ASF in death domestic pigs in Slovakia (January – June 2017)

Laboratory investigations of ASF in domestic pigs in Slovakia in 2017 (January - June) - passive surveillance

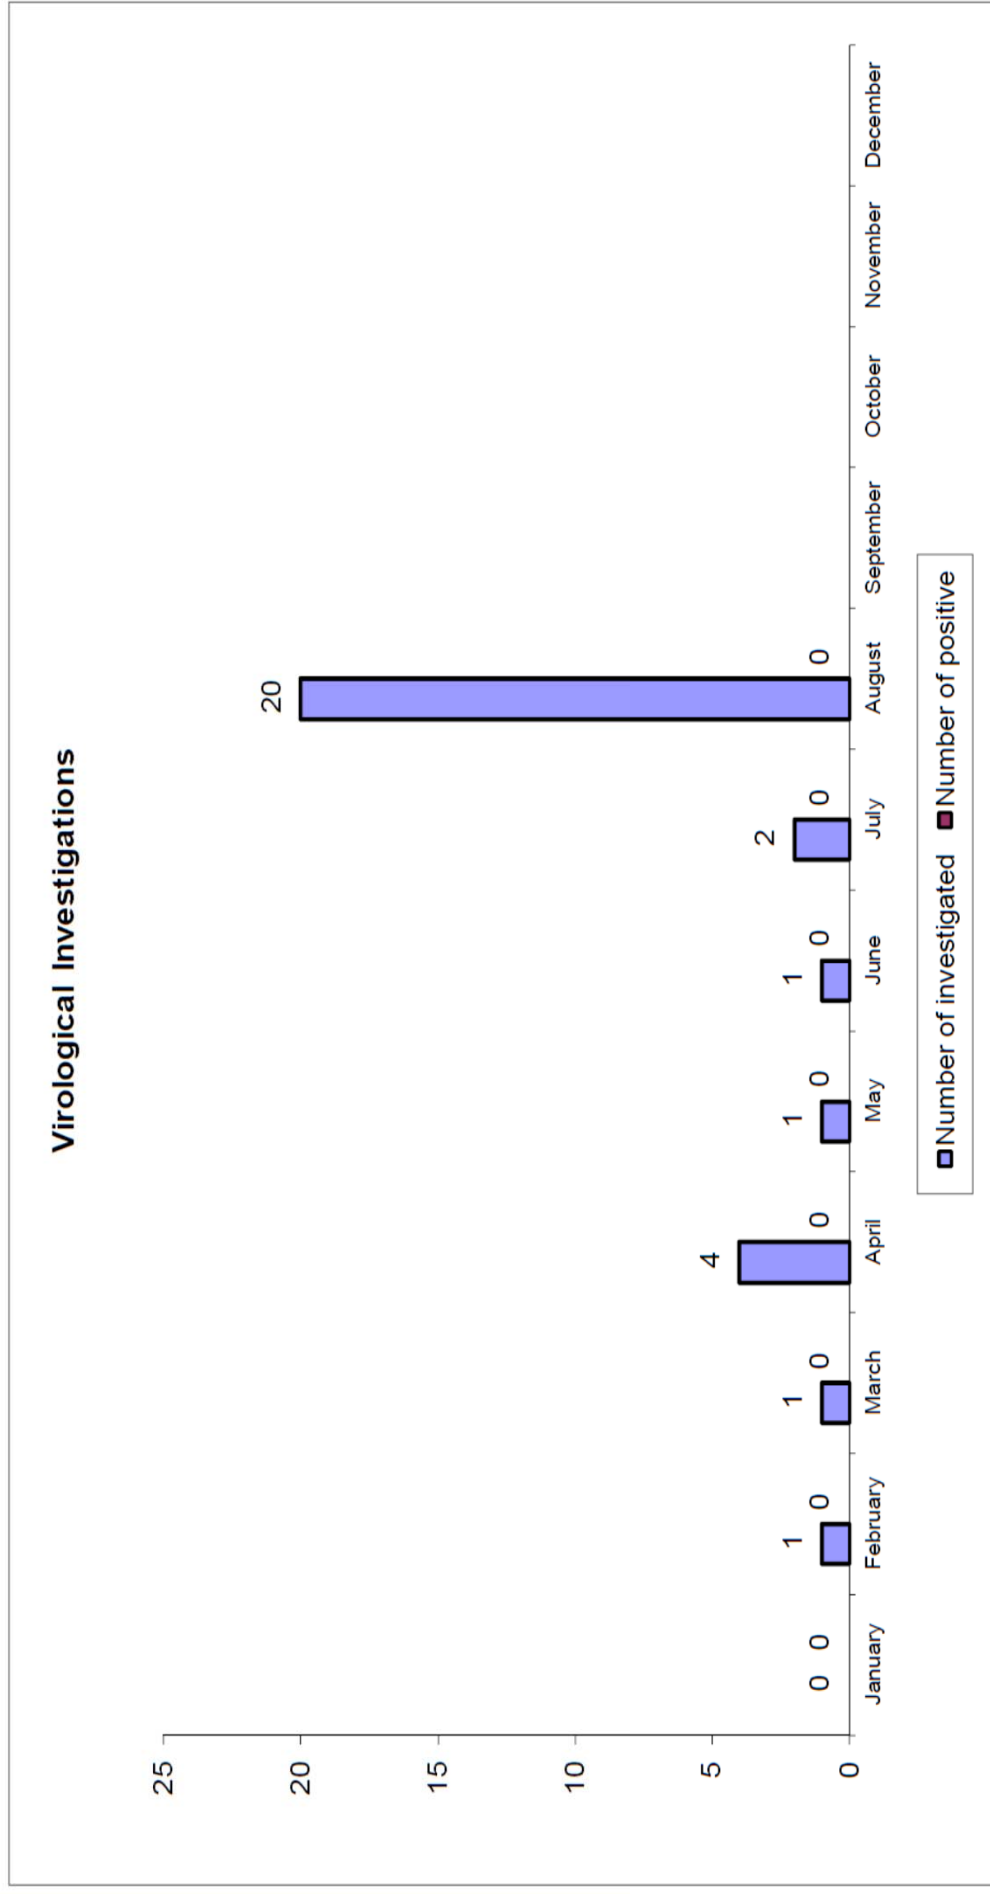

Laboratory Investigations of ASF in death domestic pigs in Slovakia (January – August 2017)

Laboratory investigations of ASF in domestic pigs in Slovakia in 2017 (January - August) - passive surveillance

Laboratory Investigations of ASF in death domestic pigs in Slovakia (January – August 2017)

Laboratory Investigations of ASF in domestic pigs in Slovakia during 2017 (January - August)

ASF control programme **in the Slovak Republic in 2017-**

ASF control programme

- focused on prevention
- updated according to the recommendations given by
 - ASF Task force group (December 2016) and „FVO“ audits (emergency preparedness + border control - June 2017/ August 2017)
- Clinical visits- include biosecurity checks and the verification of the registers and farm health and production parameters
- Hunting management in risk areas
 - a) hunted wild boar do not leave the hunting ground before tested ASF negative
 - b) hunting takes into account the minimum biosecurity measures

Recommendations of „FVO“ audits

1. To ensure to increase the number of dead pigs reported and tested for ASF from all registered and non-registered pig holdings in the buffer zone.

Measures in place

2. The time for submitting, testing and reporting laboratory results for samples submitted under passive surveillance for ASF should be shortened. Solution continuing - the measures will be full in force from October 2017

3. To ensure that an up-to-date register is kept on each holding which must include, inter alia, origin and destination details for all pigs leaving the holding. Measures in place

4. Wild boar populations management – implementation of a total feed ban and targeted hunting of females. The solution continuing - the measures will be full in force from from 1.1.2018

5. Biosecurity in hunting grounds in the buffer zone should be improved to ensure that hunted wild boar do not leave the hunting ground before test results are available. Measures in place

Main Activities within preparedness

- Training programmes for vets – ASF simulation exercise took place in March 2017
- Training programmes for hunters
- Intensive ASF monitoring programme in both wild boar and domestic pigs
- BIPs checks
- Exchange of views and co-operation with the experts of neighboring countries
- Public awareness

Public awareness

- Exchange of ASF information on the central level - regular meetings with Czech and Poland competent authorities, phoneconferences/consultations/exchange of informations with competent authorities of the neighboring countries (CZ, HU, PL, AT)
- ASF information on the web site of the SVFA, Ministry of Agriculture and the Slovak Hunter's Chamber;
- Distribution of ASF posters for all pig farmers and hunting managers and display of ASF posters on the all DVFAs';
- ASF information in the hunter magazine (Poľovníctvo a rybárstvo – Hunting and Fishing) + the arrangement of ASF national meeting with hunters – IN PROGRESS
- Awareness at the border- co- operation with customs

Africký Mor Ošipaných u diviačej zveri

Základné
informácie
pre poľovníkov
a užívateľov
poľovných revírov

2017

ASF – public awareness- info in the magazine

Pohroma nielen PRE DIVIAKY **AMO**

Africký mor ošipaných už straší v pohraničí. Budeme o pár rokov ešte loviť diviačiu zver?

*** MVDr. RUDOLF JANTO

Diviačia zver je poľovnícky atraktívna. No v krajine poznatejšej civilizáciou vplyvmi nadobudlo jej obhospodarovanie nový význam. Patrí k zriedkavým druhom, ktoré sa dokážu adaptovať na zmenené podmienky a obrovskú reprodukčnú schopnosť, ktorá sa pri ne správne vedenom obhospo-

darovaní vymáča už včasom revírov z rúk. Nielen u nás, ale aj v celej Európe. Bohaté výstavy po spoločných poľovačkách sa stali samozrejmosťou. Hoci sa prijímali rôzne stratégie na zataženie populačnej explózie, minuli sa účinku. Často aj pre formálny prístup poľovníkov. Situácia v Európe sa však mení a so, na čo sme boli

zvyknutí, môže byť za pár rokov minulosťou. V diviákej populácii sa totiž začal šíriť africký mor ošipaných!

O ČOM JE REČ?

Africký mor ošipaných (AMO) je vírusová choroba domácich svíň, európskych diviakov, amerických diviakov a prasiat bradavičnatých. Patrí k veľmi

horúčkou, krátkym priebehom s makroskopickými príznakmi veľmi podobnými klasickému moru ošipaných – krvácaním rôzneho rozsahu v podkoží, pod sliznicami, sekrétmi, v tkanivách rôznych orgánov a veľmi vysokou smrtnosťou, až 90-95 percent. Pôvodcom ochorenia je DNA vírus, ktorý je stabilný pri širo-

COLNÁ KONTROLA SLOVENSKEJ REPUBLIKY

CUSTOMS CONTROL OF SLOVAK REPUBLIC

Cestujete so sumou 10 000 €* alebo viac?

Žiadny problém - v každom prípade to oznámte colníkom pred vstupom do EÚ alebo odchodom z nej.

Travelling with the amount 10 000 €* or more?

No problem - in any case, do tell customs officials before entering into EU or leaving it.

Choroby neberú ohľad na štátne hranice

Ak prinesiete mäso alebo mliečne výrobky z krajiny mimo EÚ*, vyhlásite ich za riziko, že prinesiete najobľúbenejšiu chorobu zvierat.

Ak tento tovar nehlásite predtým, môže byť považovaný za protisprávny a môže byť zadržaný. Tieto produkty vám budú pri príchode ošetrované a znehodnotené.

Diseases don't respect borders

If you bring in meat or dairy products from outside the EU*, you risk importing animal diseases. If you do not declare such items, you may be fined or face criminal prosecution. These products will be seized and destroyed on arrival.

Choroby neberú ohľad na štátne hranice

Začeli ste chudnúť? Váš zvyklosť zmeniť režim, stravovať sa inak?

Diseases don't respect borders

Do you bring diet supplements? Your eating habits are different from the ones in your country?
