Poultry and Plg Low-input and Organic production systems' Welfare

A multiactor approach for improving animal welfare in poultry and pig low input outdoor and organic production systems

Anne Collin, INRAE
INRAE, Université de Tours, BOA, 37380 Nouzilly, France

10th meeting of the EU Animal Welfare Platform, 10th November, 2021

- High quality of the rearing system and of the products
- Diversity of practices throughout Europe
- Still a need to improve animal welfare and limit mortality, in relation to the outdoor access challenging the animals, ethical issues, the wish of practitioners and societal expectations

Evaluation of the animal welfare-improving practices by taking into account environmental, economic and social impacts including human well-being (practitioners, consumers, citizens)

What he was more than the state of the same of the sam

PPILOW Participatory approach led by AIAB (Italy)

Practitioners involved:

- Farmers
- Breeding companies
- Hatcheries
- Nutrition firms
- Equipment firms
- Slaughter houses & Processors
- Retailers
- Production organizations
- Veterinarians...

Different organisation scales depending on the country and production types

Other members of the society involved:

- Organic production syndicates, associations or federations
- Consumer associations
- Citizen associations, especially dedicated to animal welfare
- Policy makers

EIP AGRI abstracts in process...

First experimental results on the use of:

- Incubation conditions and insect larvae for limiting feather pecking in non beak-trimmed hens
- Males and females from 2 dual purpose crossbreeds or local/rustic breeds to avoid the elimination of day-old male chicks
- In ovo sexing after 1 day of incubation
- Alternative feeds (plant extracts, fermented feeds) in hens or pigs for limiting pathologies and parasitism
- Genetic lines and new hut design for sow and piglet welfare and survival...

This project has received funding from the European Union's Horizon 20
