

Foot and Mouth Disease (FMD) in DEU

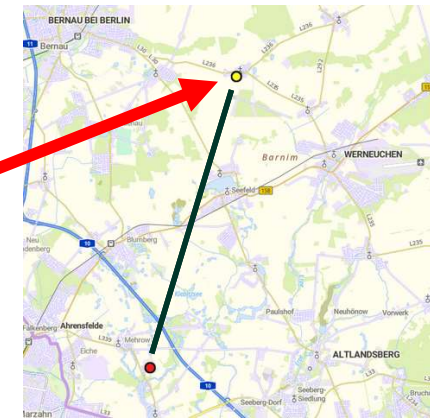

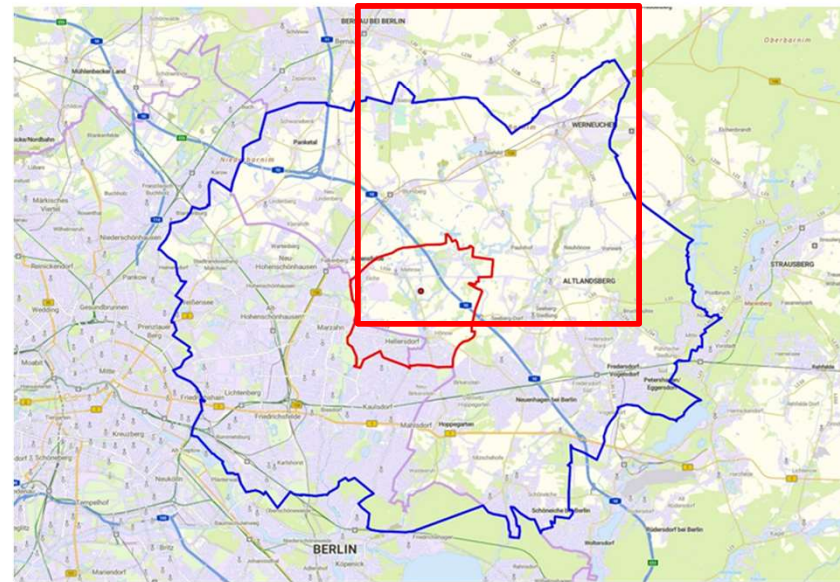

2nd extraordinary SCoPAFF January 2024

FMD in DEU
Brandenburg (BB)
– 1st case since 1988

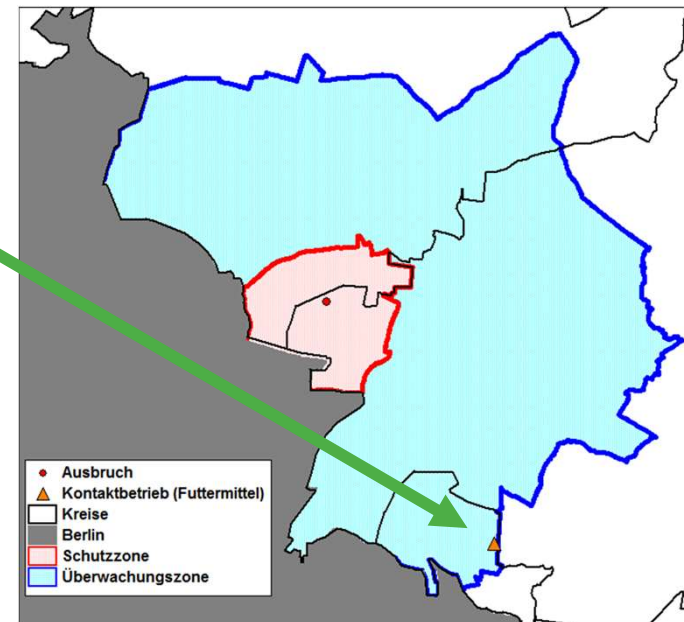

FMD measures in Brandenburg

- Suspicion case on January 16th: one goat of four with lesions, all killed and tested negative – 12 km north of primary case, district of Barnim

FMD measures in Brandenburg and Berlin

- All tested establishments in RZ negative, including killed animals of the contact establishment (hey delivery)
- In Berlin, districts of Lichtenberg, Treptow-Köpenick and Pankow are also within the surveillance zone

FMD additional measures

- Sampling of wild cloven-hooved animals ongoing
- so far negative (additionally using of old ASF-taken samples)
- FMD - testing in 2024 of 72 BTV negative animals with clinical signs

- Stand still in all of BB and BE for cloven-hoofed animals – prolonged till January 18th
- single hunt in BB allowed, no hunting in RZ in Berlin

- EU VET taking place since January 15th, 2025

FMD first conclusions

- So far no more infected establishments
- MS received lists of animals from BB since December 1st, 2024 – so far no information of conspicuous animals
- Role of wildlife in investigation

- Source of infection so far inconclusive – role of dog promenader alongside/through water buffaloes?

- All sorts of communication in ultrasonic speed uncontrollable
- Many additional challenges regards vaccination strategies

- EU VET taking place since January 15th, 2025

Thanks to the colleagues of:

- Friedrich-Loeffler-Institute
- Ministry of Brandenburg
- Ministry of Berlin
