

Lists of diseases subject to Union surveillance programme and for which disease-free compartments may be established

**PAFF COMMITTEE
Brussels, 24 September 2019**

Unit Animal Health and Welfare
Directorate-General for Health and Food Safety
European Commission

Why is this Implementing Regulation needed?

Based on the AHL, it is part of the legal basis to develop provisions in delegated Regulation on Union surveillance programmes and on disease-free compartments

	Empowerments in the AHL	
	Delegated act	Implementing act
Union surveillance programme (USP)	Art 29 Criteria to list diseases relevant for USP Technical content of the USP	Art 30 List of diseases subject to USP and their geographical scope
Disease-free compartments	Art 37 (5) Provisions for recognition of compartments free from diseases of aquatic animals	Art 37 (4) List of diseases for which disease-free compartments may be established

Union surveillance programmes (USP)

- Compulsory surveillance programmes run at the Union level for diseases that meet certain criteria
- Apply in all or part of the Union
- Currently: Decision 2010/367/EU = avian influenza
- Delegated Regulation (Doc SANTE/7066/2019) lays down criteria to list diseases for USP and technical provisions for USP for HPAI and infection with LPAIV (H5/H7)
- Implementing Regulation (Doc SANTE/7136/2019)
 - lists for USP HPAI and infection with LPAIV
 - sets out geographical scope = territory of Member States

Disease free compartments

- Implications on many aspects of AHL and delegated Regulations associated to it, including entry in the Union
- Limited to certain category A, B and C diseases
- Currently
 - Directive 2006/88: compartments free from diseases of aquatic animals
 - Regulation (EC) 616/2009: compartments free from avian influenza
- Delegated Regulation (Doc SANTE/7066/2019) lays down provisions for recognition of disease-free compartments for aquatic animals
- Implementing Regulation (Doc SANTE/7136/2019) lists all category A, (B) and C diseases of aquatic animals for the establishment of free compartments
- HPAI-free compartments to be addressed later
