

“The Care4Dairy project has successfully synthesised a range of technical information on key animal health and welfare issues for dairy production systems, to create accessible and implementable content for end-users. The Best Practice Guides are proving an excellent means of guiding conversations and learning, with farmers, herd management staff and students alike”.

Head of Dairy Knowledge Transfer Department, Teagasc, Ireland

The European Parliament pilot project, implemented by the European Commission from 2021 to 2024, aimed to produce best practices guides relevant to dairy production across EU Member States.

ACHIEVEMENTS

Best Practice Guides

Focus areas include Dairy Calves, Dairy Heifers, Dairy Cows, and End of Career Cows

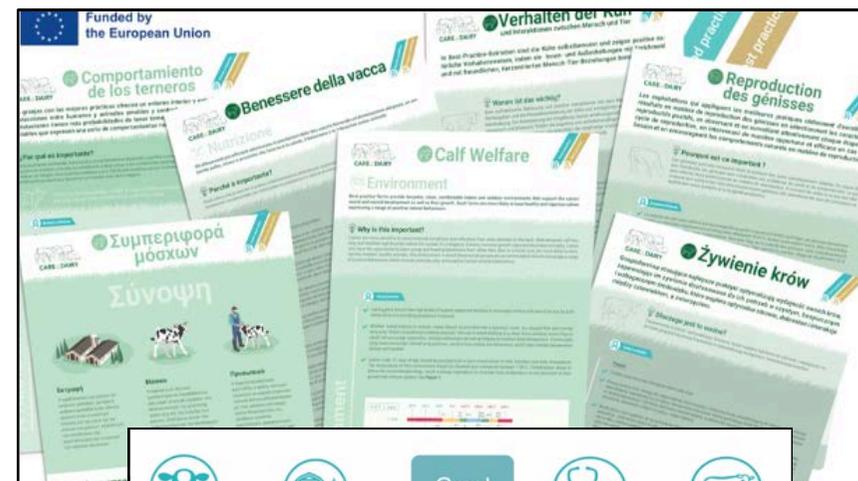

Training & Events

More than 20 sessions among online Webinars and in person Roadshows across 9 EU Member States, with an audience of over 2450 participants to disseminate guidelines and best practices

Resources

21 factsheets and 4 best practice guides, podcasts, videos, self-assessment tools, life stage infographics, case studies and the Care4Dairy App to improve dairy farm management

ALL THE MATERIALS AND THE VIDEOS ARE AVAILABLE FOR DISSEMINATION IN ENGLISH, FRENCH, GERMAN, GREEK, ITALIAN, POLISH AND SPANISH
