# Weekly evolution of the number of HPAI outbreaks in poultry

- **Phase 1 :** From September 2022 to Mid-November 2022
  - Many primary introductions from wildlife
  - Split distribution throughout France
  - High proportion of captive birds affected
  
- **Phase 2 :** From Mid November to end of December 2022
  - Primary Introductions and inter-farm diffusion
  - Concentrated mainly in the Great West
  - Mainly affected poultry farms
  
- **Phase 3 :** From end of December to mid-March
  - Incidence decreases
  - Primary introductions
  - Cluster in Côtes d'Armor department
  
- **Phase 4 :** From mid-March to beginning of May
  - Stabilization – no outbreaks except in wildlife
  
- **Phase 5 :** From 4th May
  - Primary Introductions and inter-farm diffusion
  - Concentrated mainly in the South West
  - Mainly affected poultry farms

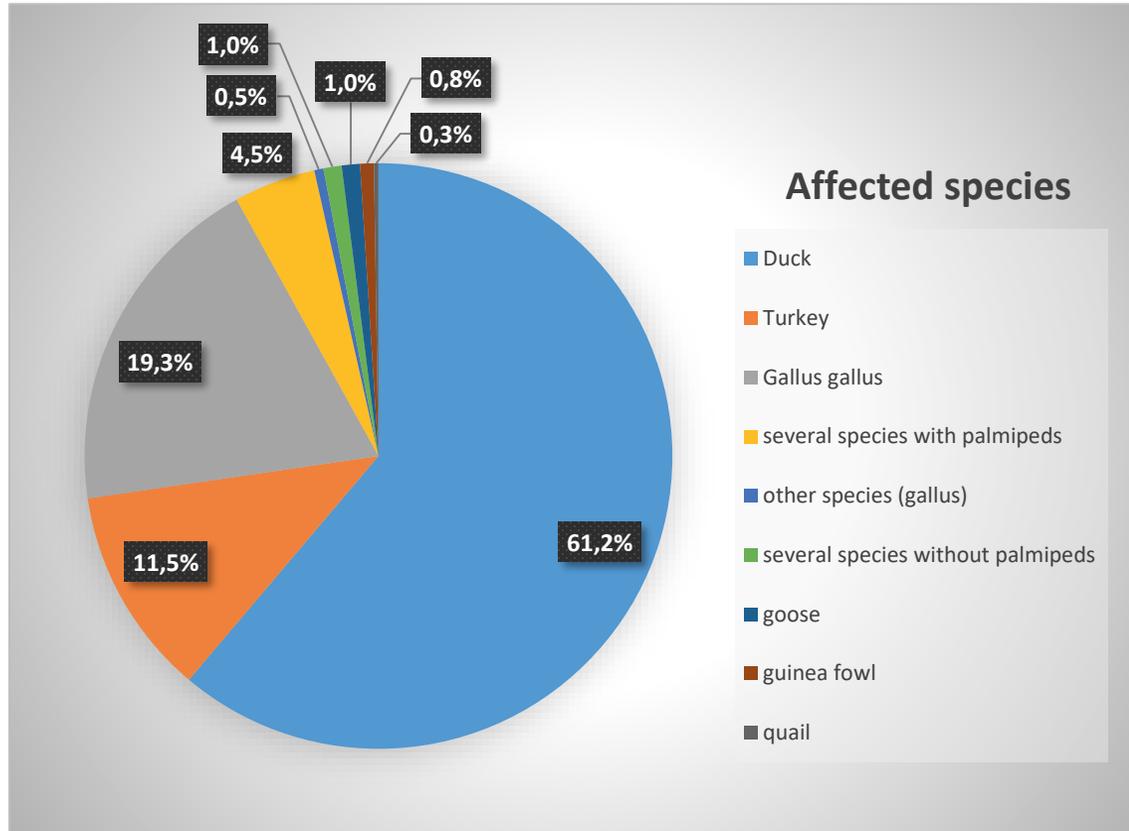

# Weekly evolution of the number of killed poultry in the outbreaks (excluding preventive depopulation)

**Total : 6 444 557**

# Affected species

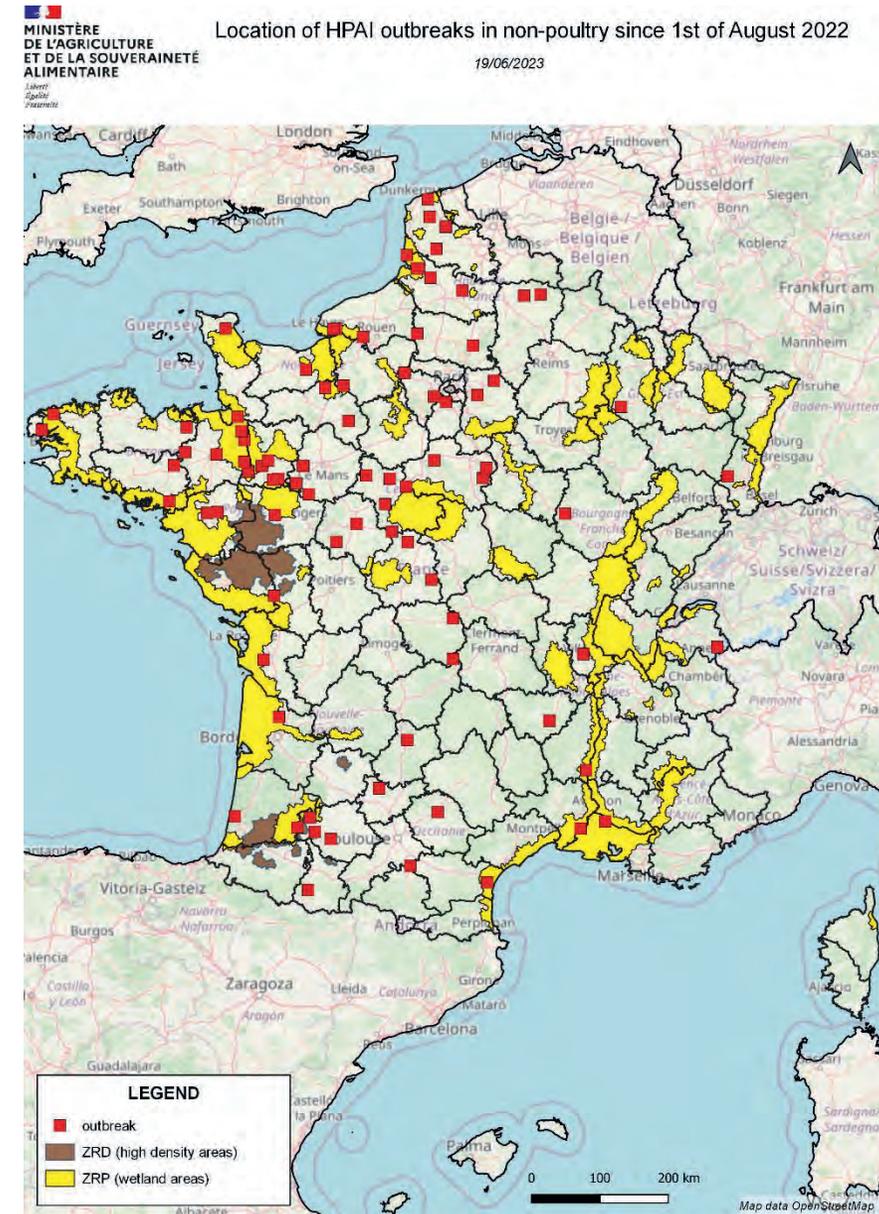

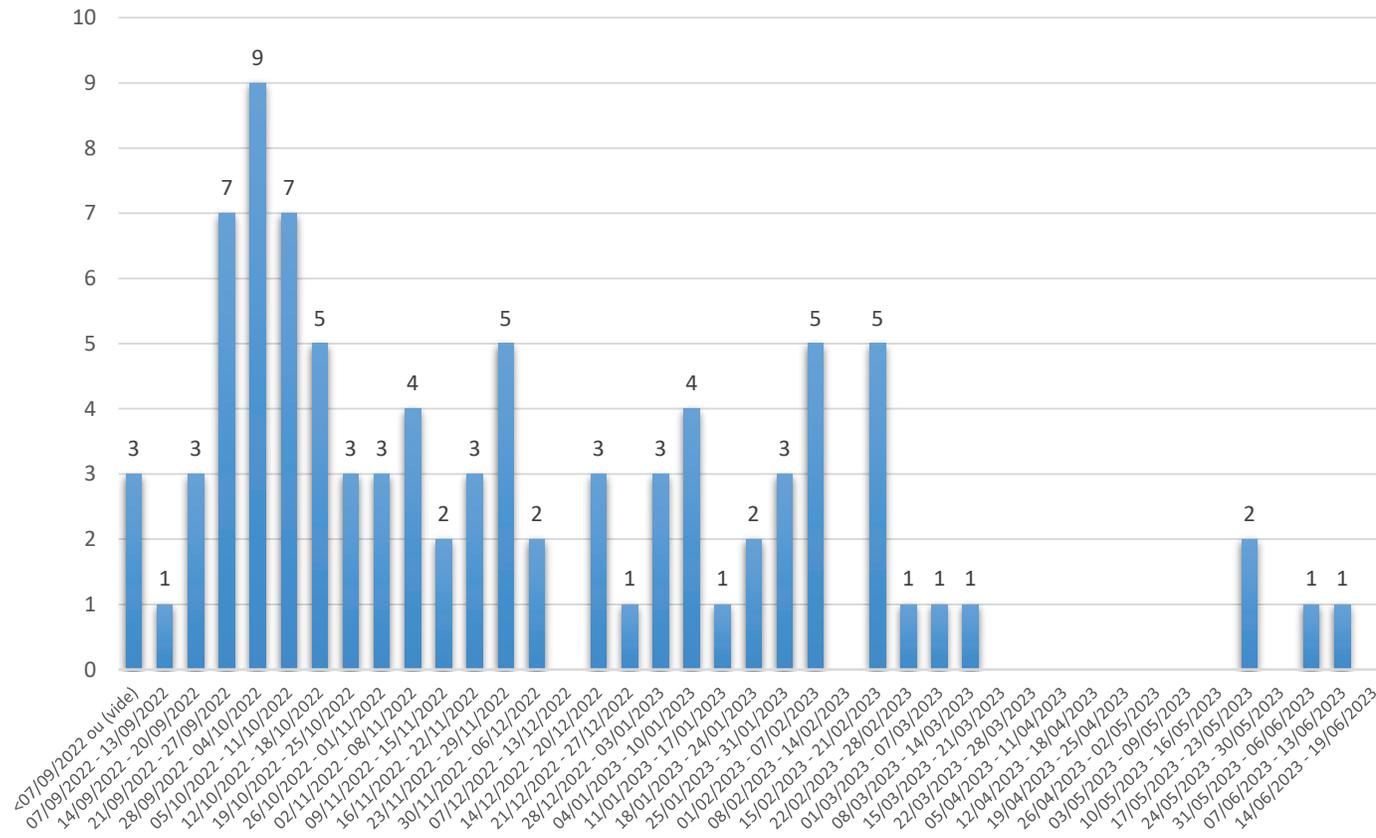

Affected species	Outbreaks
Duck	245
Turkey	46
Gallus gallus	77
several species with palmipeds	18
other species (gallus)	2
several species without palmipeds	4
goose	4
guinea fowl	3
quail	1
<b>Total général</b>	<b>400</b>

# HPAI in captive birds

## 91 outbreaks, since 1 August 2022

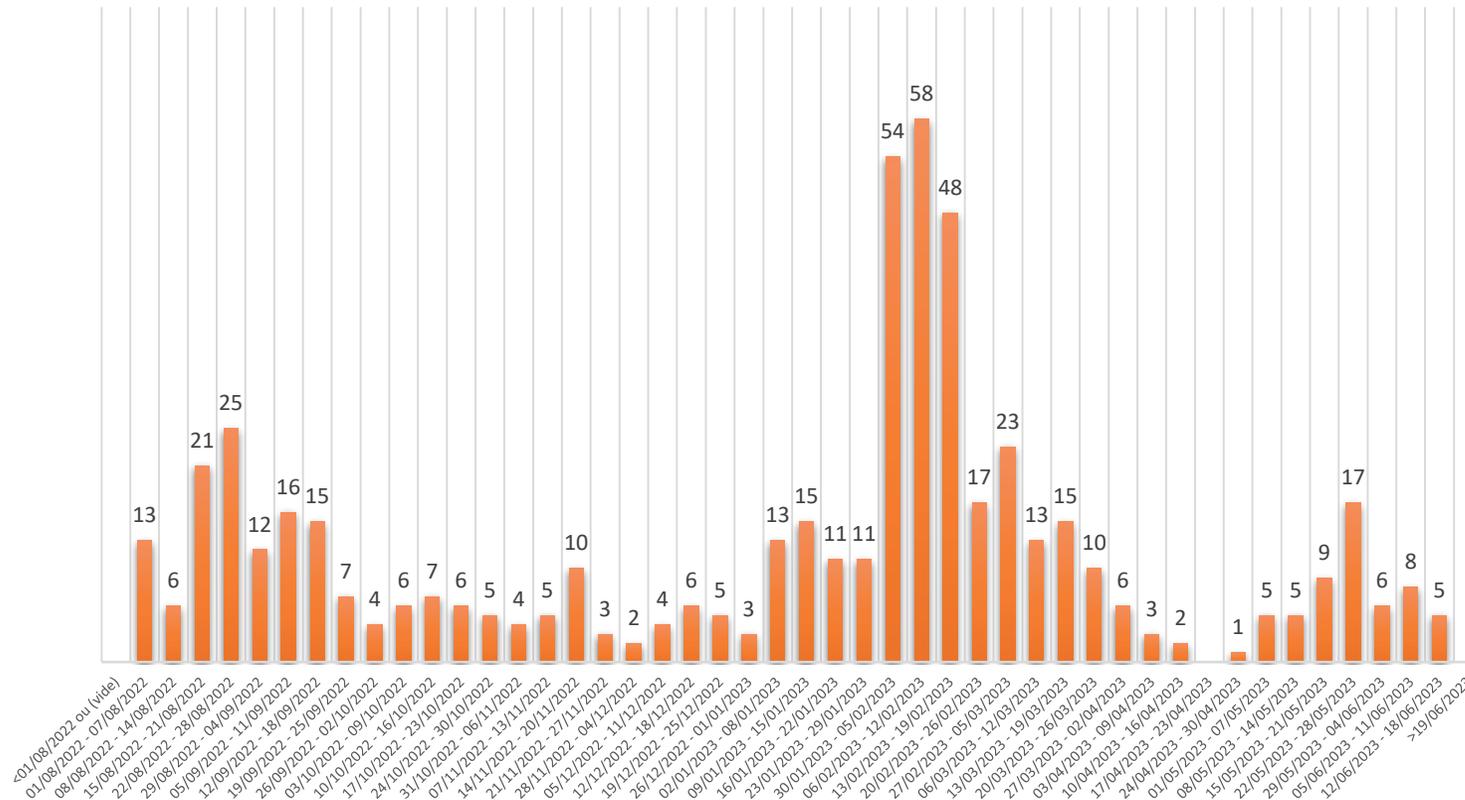

WEEKLY INCIDENCE

# HPAI cases in wildlife

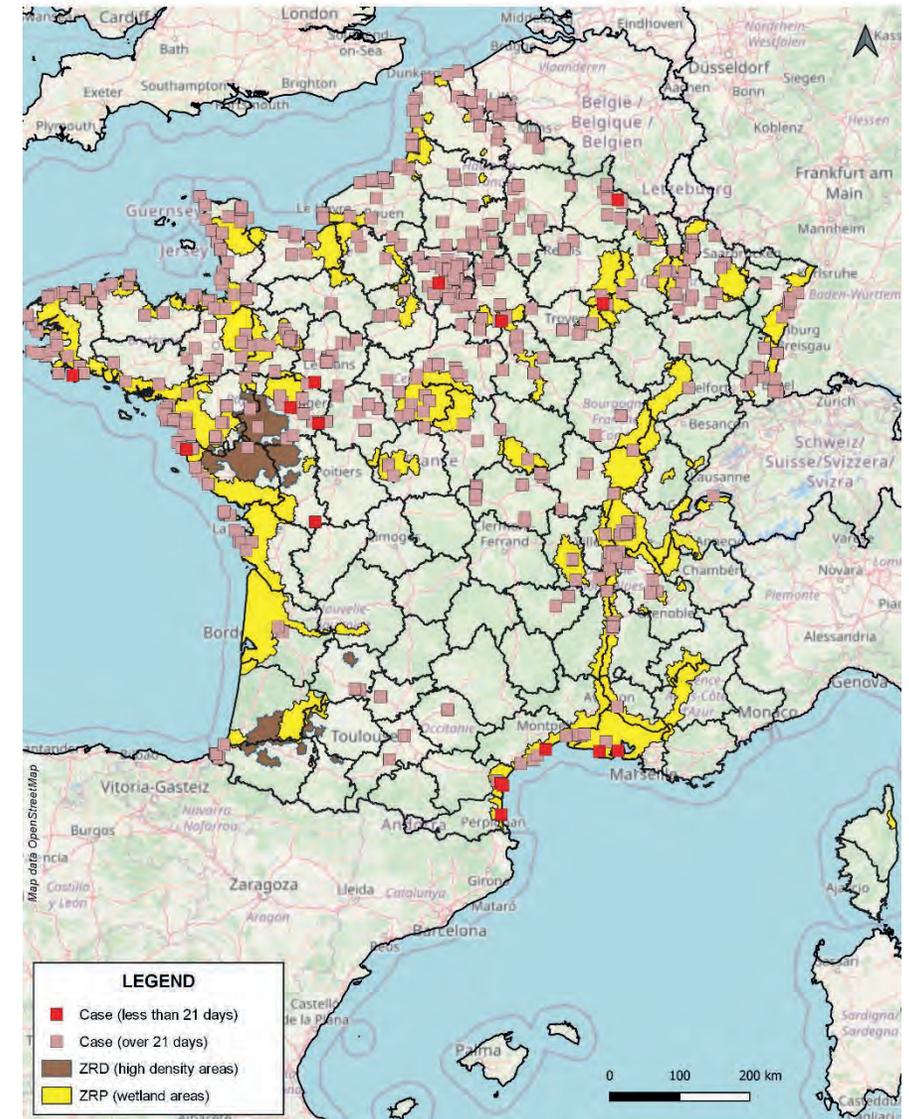

## 540 cases since 1 August 2022

WEEKLY INCIDENCE

Location of HPAI cases in wildlife since 1st of August 2022

19/06/2023

# PREVENTION MEASURES

# Prevention measures across the country since the lowering of risk level to moderate (26<sup>th</sup> april)

- **Early warning system**
  - Daily surveillance in farms with consideration of alert criteria
  - Vigilance reinforced in extended regulated areas (PZ, SZ, FRZ, BZ)
- **Sheltering of poultry in risk areas**
  - Risk areas are wetland areas (ZRPs) and areas with high poultry density (ZRDs)
  - All species of poultry in ZRPs ; palmipeds in ZRDs
- **Restriction on hunting activities in risk areas**
- **Prohibition of bird gathering in risk areas**

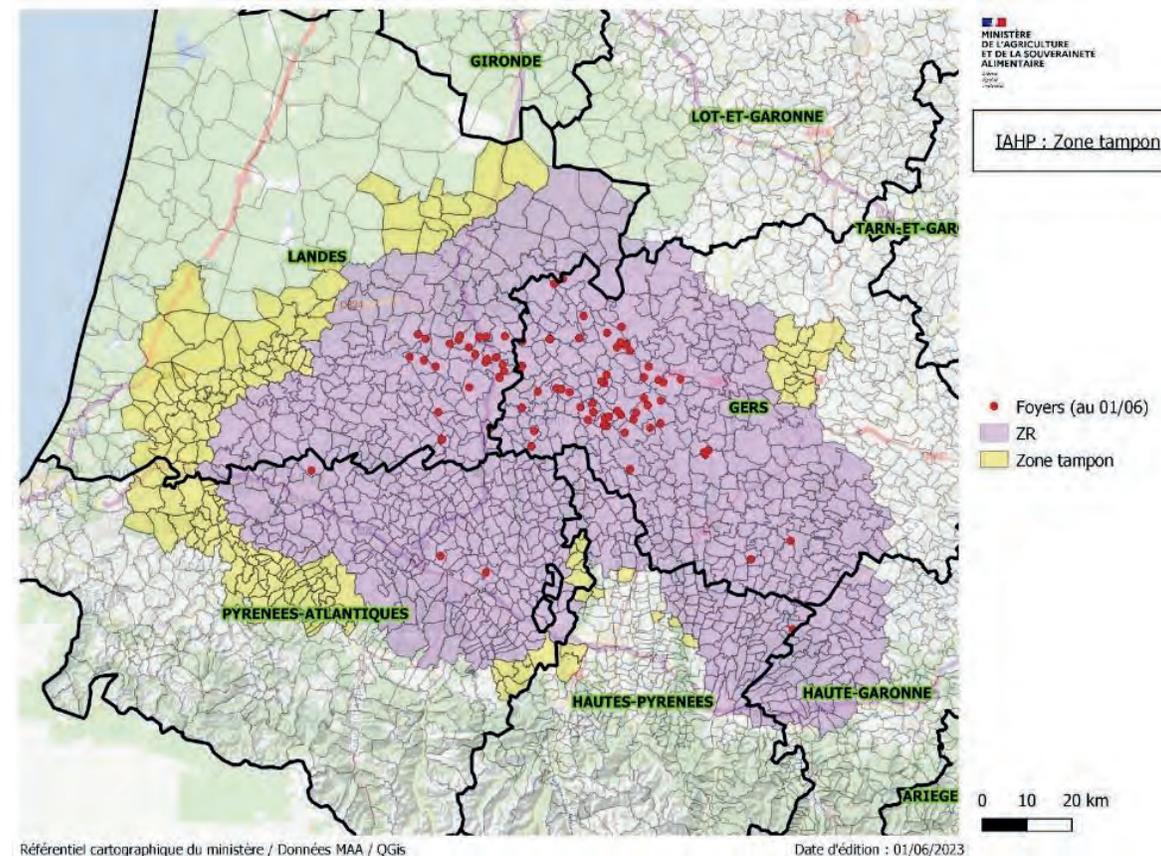

**MINISTÈRE  
DE L'AGRICULTURE  
ET DE LA SOUVERAINETÉ  
ALIMENTAIRE**

*Liberté

# **CONTROL MEASURES IN SOUTH WEST**

## Control measures in departments 32, 40, 47, 64 and 65

- **New outbreaks in departments 32, 40, 64 and 65 since 4<sup>th</sup> May**
- **Reinforced control measures to limit the spread of the disease**
- **Restricted zones extended :**
  - Around poultry outbreaks :
    - Protection zone (PZ) 3 km
    - Surveillance zone (SZ) 10 km
    - Further restricted zone (FRZ) 20 km
    - Buffer zone (BZ) including ZRDs and others municipalities with high poultry density
  - Around cases confirmed in wildlife :
    - Infected area 20 km

ZR = Restricted zone (ZP + ZS+ZRS)  
Zone tampon : Buffer zone

## Control measures in departments 32, 40, 47, 64 and 65

- **Additional measures in restricted areas to complement measures prescribed by Regulation (EU) 2020/687 :**
  - **Sheltering** for all poultry species
  - **Reinforced active surveillance** in palmipeds farms :
    - Compulsory autocontrols on dead animals and in the environment on a biweekly basis in PZ, SZ, FRZ
    - Compulsory autocontrols in the environment on a weekly basis in BF
    - Compulsory autocontrols on live animals on a weekly basis in BF (sample of establishments – prevalence rate limit : 3%)
    - Compulsory specific autocontrols in the environment and on dead and live animals for reproductive stock

## Control measures in departments 32, 40, 47, 64 and 65

- **Additional measures in restricted areas to complement measures prescribed by Regulation (EU) 2020/687 :**
  - **Movements :**
    - Prohibition of movement in PZ and SZ
    - 24-hour pre-movement autocontrols of poultry in FRZ and BZ
  - **Peri-focal preventive depopulation** over a radius of 10 km :
    - 1 km around an outbreak : all susceptible species
    - 1 to 10 km around an outbreak : palmipeds
    - Creation of a depopulation platform for young palmipeds
    - 2 or 3 depopulation companies
  - **Regulation of hunting activities** in PZ, SZ, FRZ

# Thank you for your attention
