

## Standard requirements for the submission of programmes of eradication and monitoring of TSE

Member States seeking a financial contribution from the Community for national programmes for the control and monitoring of transmissible spongiform encephalopathies (TSEs), shall submit applications containing at least the information set out in this form.

The central data base keeps all submissions. However only the information in the last submission is shown when viewing and used when processing the data.

If encountering difficulties, please contact [SANCO-VET-PROG@ec.europa.eu](mailto:SANCO-VET-PROG@ec.europa.eu), describe the issue and mention the version of this document: 2014 PROD 1.32

Instructions to complete the form:

Your current version of Acrobat is: 10.104

- 1) Be informed that you need to have at least the Adobe Reader version 8.1.3 or higher to fill and submit this form.
- 2) To verify your data entry while filling your form, you can use the "verify form" button at the top of each page.
- 3) When you have finished filling the form, verify that your internet connection is active and then click on the submit notification button below. If the form is properly filled, the notification will be submitted to the server and a Submission number will appear in the corresponding field.
- 4) **IMPORTANT: Once you have received the Submission number, save the form on your computer.**
- 5) If the form is not properly filled, an alert box will appear indicating the number of incorrect fields. Please check your form again and try to re-submit it according to steps 3), 4) and 5). Should you still have any difficulties, please contact [SANCO-BO@ec.europa.eu](mailto:SANCO-BO@ec.europa.eu).
- 6) For simplification purposes you are invited to submit multi annual programmes
- 7) As mentioned during the Plenary Task Force of 28/2/2014, you are invited to submit your programmes in English.

**IMPORTANT: AFTER SUBMITTING THE FORM DO NOT FORGET TO SAVE IT ON YOUR COMPUTER FOR YOUR RECORDS!**

Submission date

Thursday, August 21, 2014 15:03:52

Submission number

1408622633960-3597

# Standard requirements for the submission of programmes of eradication and monitoring of TSE

## 1. Identification of the programme

Member state: LIETUVA

Disease: Transmissible spongiform encephalopathies (TSEs)

This program is multi annual: yes

Type of submission: New multiannual programme

Request of Union co-financing  
from beginning of:

2015

To end of

2017

# Standard requirements for the submission of programmes of eradication and monitoring of TSE

Fax. : + 370 5 2404362

Email : vvt@vet.lt

## 2. Description of the programme

(max. 32000 chars) :

The purpose of this programme is as follows:

- monitoring of bovine animals for BSE
- monitoring of ovine and caprine animals for Scrapie disease.

## 3. Description of the epidemiological situation of the disease

(max. 32000 chars) :

Bovine spongiform encephalopathy (BSE) and Scrapie disease are compulsory notifiable diseases in Lithuania since 1992. No cases of bovine spongiform encephalopathy (BSE) and Scrapie disease have been recorded in Lithuania yet. New variant of Creutzfeldt-Jacob disease among humans has not been laboratory diagnosed in Lithuania either.

The TSEs active surveillance programme has been started in Lithuania since 1st of July 2001. This programme was prepared in compliance with the requirements set up in the Commission Decision 98/272/EC. The programme included sampling of dead, emergency slaughtered, cohort group (animals originating from countries with indigenous TSEs and their progenies, animals which have consumed potentially contaminated feedingstuffs) and suspected bovine animals (animals displaying behavior or

# Standard requirements for the submission of programmes of eradication and monitoring of TSE

neurological signs lasting for at least 15 days and resistant to treatment, moribund animals without signs of infectious or traumatic illness, animals displaying other progressive disease conditions) over 24 months of age, dead, emergency slaughtered and suspected for Scrapie disease ovine and caprine animals over 12 months of age.

Since 10 October 2002 Regulation of the European Parliament and of the Council (EC) No 999/2001 laying down rules for the prevention, control and eradication of certain transmissible spongiform encephalopathies was implemented.

In accordance with the Commission Decision 2009/719/EC of 28 September 2009 authorizing certain Member States to revise their annual BSE monitoring programmes as last amended by Commission Implementing Decision 2013/76/EC of 4 February 2013, Lithuania has amended the BSE monitoring programme and from January 2014 healthy slaughtered bovine animals older than 72 months will not be tested for BSE. Bovine animals presenting signs at the ante mortem inspection are considered as part of the risk animals to be sampled in accordance with Regulation (EC) No 999/2001, Annex III.A.I.2.1 – 2nd indent.

TSE testing is performed at the National Food and Veterinary Risk Assessment Institute, which is the reference laboratory for TSEs in Lithuania. There are no other laboratories for TSEs investigation in Lithuania.

From 1 July, 2001 Lithuania introduced rapid diagnostic test for TSEs (Enfer test). Samples from slaughtered animals are tested by rapid Enfer test and samples from other groups of animals were tested by histopathological examination and Enfer test. Bio-Rad rapid diagnostic test for TSEs also introduced in the National Veterinary Laboratory (from 1 of July 2008 - National Food and Veterinary Risk Assessment Institute) from 2002.

The genotyping of animals referred to in Annex III, Chapter A, Part II, point 8.2 of Regulation (EC) No 999/2001 will be performed in National Food and Veterinary Risk Assessment Institute.

The collection of samples will be done by veterinary inspectors from territorial State Food and Veterinary Service and authorized (contracted) private vets.

## 4. Measures included in the programme

### 4.1 Designation of the central authority in charge of supervising and coordinating the departments responsible for implementing the programme

(max. 32000 chars) :

State Food and Veterinary Service (SFVS) is the Central Competent Authority of the Republic of Lithuania responsible for the control of food and feed safety, animal health and animal welfare.

The Animal Health and Welfare Department is responsible for the coordination and control of all the activities of territorial State Food and Veterinary Services involved in the implementation of this program. This department collects the data, performs statistical analysis and evaluation of the surveillance program and informs the relevant authorities in European Union about the progress of the control and surveillance program.

The State Food and Veterinary Service consists of Administration and 15 Departments. Administration is comprised of the Director and 4 his deputies. The director is also Chief Veterinary Inspector of the State.

## Standard requirements for the submission of programmes of eradication and monitoring of TSE

### 4.2 *Description and delimitation of the geographical and administrative areas in which the programme is to be applied*

(max. 32000 chars):

The Transmissible spongiform encephalopathies monitoring programme is in place since 2008 and will be continued from 1st of January 2015 to 31st December of 2017 in whole Republic of the Lithuania.

### 4.3 *System in place for the registration of holdings*

(max. 32000 chars):

The animal holding registration is performed in accordance with Commission Regulation (EC) No 2629/97 of 29 December 1997 laying down detailed rules for the implementation of Council Regulation (EC) No 820/97 as regards ear tags, holding registers and passports in the framework of the system for the identification and registration of bovine animals.

### 4.4 *System in place for the identification of animals*

(max. 32000 chars):

According to the national legislation animal keeper is responsible for registration of animal holding, ear-tagging and registration of animals, keeping and updating of on-farm registers and notifications to the system. The ear-tagging and registration on the national database of the new born calf also movement notifications have to be made within 7 days after the event. Double notification system is required for animal movement recording to the database. The standard notification forms are used to declare movements of animals from one animal keeper to another or to a slaughterhouse. Corresponding animal movement reports are sent at the beginning and at the end of the movement action to the relevant State Food and Veterinary District office within 7 days. Movement data are recorded in the database at the moment of their first declaration even if the other part of the movement is never transmitted to the database.

### 4.5 *Measures in place as regards the notification of the disease*

(max. 32000 chars):

Law on Veterinary Activities" (Official Gazette, 1992, No. 2-15; 2010, No. 148-7563);  
In accordance with The Veterinary Law, animal owner and / or keeper must immediately notify to a veterinarian on animal death, abortions, simultaneous affection of several animals and any case, which arise suspicions that animal is affected by an infectious and contagious disease.  
Order of the director of the SFVS No B1-281 of 12 April 2006 "Contagious Diseases Control Program";

# Standard requirements for the submission of programmes of eradication and monitoring of TSE

(Official Gazette, 2006, No 48-1760), according to this Order animal owner and / or keeper must immediately notify to a veterinarian on suspicions of contagious diseases including TSE.

## 4.6 Testing

### 4.6.1 Rapid tests in bovine animals

#### Targets for year **2015**

	Age (in months) above which animals are tested	Estimated number of animals to be tested	Estimated number of rapid tests, including rapid tests used for confirmation

	Estimated number	
Animals to be killed under the requirements of Annex VII, Chapter B, point 2.1 of Regulation (EC) No 999/2001	0	

## 4.7.2 Measures following confirmation of a scrapie case

### 4.7.2.1 Description

(max. 32000 chars):

If a TSE is suspected case in an ovine or caprine animal on a holding in Lithuania is found until the results of the confirmatory examinations are available, all other ovine and caprine animals from that holding shall be placed under an official movement restriction. If there is evidence that the holding where the animal was present when the TSE was suspected is unlikely to be the holding where the animal could have been exposed to the TSE, the SFVS will decide that other holdings or only the holding of exposure shall be placed under official control by territorial SFVS, depending on the epidemiological information available. The milk and the milk products derived from the ovine and caprine animals of the holding placed under official control, which are present on that holding from the date when the presence of the TSE is suspected until the results of the confirmatory examinations are available, shall only be used within that holding.

In case the confirmed TSE is classical scrapie, only positive animals and their progeny shall be culled and destroyed, the milk and milk products derived from the animals to be destroyed and which were present on the holding between the date of confirmation of the classical scrapie case and the date of the complete destruction of the animals shall not be used for the feeding of ruminants, except for the feeding of ruminants within that holding. The placing on the market of such products as feed for non-ruminants shall be limited to the territory of the Lithuania. The commercial document accompanying consignments of such products and any packaging containing such consignments must be clearly

## Standard requirements for the submission of programmes of eradication and monitoring of TSE

marked with the words: "shall not be fed to ruminants". The use and the storage of feedingstuffs containing such products shall be prohibited on farms where ruminants are kept. Bulk feedingstuffs containing such products shall be transported by means of vehicles which do not transport feedingstuffs for ruminants at the same time. If such vehicles are subsequently used for the transport of feedingstuffs intended for ruminants, they shall be thoroughly cleaned in order to avoid cross contamination, in accordance with a procedure approved by the SFVS.

In the case of confirmation of TSE in an ovine or caprine animal if BSE cannot be excluded after the results of a ring trial the killing and complete destruction of all animals, embryos and ova identified by the inquiry. The milk and the milk products derived from the animals to be destroyed, which were present on the holding between the date of confirmation that BSE cannot be excluded and the date of complete destruction of the animals, shall be destroyed.

Only where the TSE case confirmed on a holding is an atypical scrapie case, the SFVS may decide to slaughter bovine and caprine animals for human consumption provided that:

- the animals are slaughtered within the territory of Lithuania,
- all animals which are over 18 months of age or have more than two permanent incisors erupted through the gum and are slaughtered for human consumption shall be tested for the presence of TSE.

Pending the implementation of the measures referred to in paragraph 1(b) and (c), the holding on which the animal was present when the presence of a TSE was confirmed shall be placed under official control by territorial SFVS and all movement of animals susceptible to TSEs and products of animal origin derived from them from or to the holding shall be subject to authorisation by the territorial SFVS, with a view to ensuring immediate tracing and identification of the animals and products of animal origin concerned. If there is evidence that the holding where the affected animal was present when the TSE was confirmed is not likely to be the holding where the animal was exposed to the TSE, the SFVS may decide that both holdings or only the holding of exposure shall be placed under official control by territorial SFVS.

Owners will be compensated without delay for the loss of the animals that have been killed or products of animal origin destroyed in accordance with Article 12(2) and paragraph 1(a) and (c).

Without prejudice to Directive 82/894/EEC, the confirmed presence of any TSE other than BSE shall be notified to the Commission on an annual basis.

### 4.7.2.2 Summary table

### 4.7.3 Breeding programme for resistance to TSEs in sheep

#### 4.7.3.1 General description

*Description of the programme according to the minimum requirements set out in Annex VII, Chapter B of Regulation (EC) No 999/2001*

*(max. 32000 chars) :*

1. The breeding programme shall concentrate on herds of high genetic merit.
2. A database shall be established containing at least the following information:
  - (a) the identity, breed and number of animals in all flocks participating in the breeding programme;
  - (b) the identification of the individual animals sampled under the breeding programme;
3. A system of uniform certification shall be established in which the genotype of each animal sampled under the breeding programme is certified by reference to its individual identification number.
4. Sampling shall be carried out by personnel specifically designated for this purpose under the breeding programme.
5. A system for the identification of animals and samples, the processing of samples and the delivery of results shall be established which minimizes the possibility of human error. The efficiency of this system shall be subject to regular random checking.
6. The competent authority of the Member State may assist breed societies who wish to do so, to establish genetic banks consisting of semen, ova and/or embryos representative of prion protein genotypes which are likely to become rare as a result of the breeding programme.
7. Breeding programmes shall be drawn up for each breed, taking account of:
  - (a) frequencies of the different alleles within the breed;

## Standard requirements for the submission of programmes of eradication and monitoring of TSE

- (b) rarity of the breed;
- (c) avoidance of inbreeding or genetic drift.

### 5. Costs

#### 5.1 Detailed analysis of the costs

*(max. 32000 chars) :*

Total amount of the cost for implementation of monitoring programme of TSEs in Lithuania per year is 68 090 Euro. The monitoring will cover rapid testing of BSE and Scrapie.

## Standard requirements for the submission of programmes of eradication and monitoring of TSE

### 5.2 Detailed analysis of the cost of the programme for year :

2015

1. Testing in bovine animals (as referred to in point 4.6.1)						
Costs related to	Specification	Number of units	Unitary cost in EUR	Total amount in EUR	Community funding requested	
1.1. Rapid tests	Bio-Rad TeSeE SAP	5 000	7.4	37000	yes	X
				<b>Add a new row</b>		
2. Testing in ovine and caprine animals (as referred to in point 4.6.2 and 4.6.3)						
Costs related to	Specification	Number of units	Unitary cost in EUR	Total amount in EUR	Community funding requested	
2.1. Rapid tests	Bio-Rad TeSeE SAP	3 600	7.4	26640	yes	X
				<b>Add a new row</b>		
3. Confirmatory testing (as referred to in point 4.6.4)						
Costs related to	Specification	Number of units	Unitary cost in EUR	Total amount in EUR	Community funding requested	
3.1. Confirmatory tests in Bovines	Primary molecular tests	60	50	3000	yes	X
				<b>Add a new row</b>		
Costs related to	Specification	Number of units	Unitary cost in EUR	Total amount in EUR	Community funding requested	
3.2. Confirmatory tests in Ovines and Caprines	N/A	5	50	250	yes	X
				<b>Add a new row</b>		

## Standard requirements for the submission of programmes of eradication and monitoring of TSE

4. Discriminatory testing (as referred to in point 4.6.5)						
Costs related to	Specification	Number of units	Unitary cost in EUR	Total amount in EUR	Community funding requested	
4.1. Primary molecular tests	N/A	0	0	0	no	<b>X</b>
				<b>Add a new row</b>		
5. Genotyping						
Costs related to	Specification	Number of units	Unitary cost in EUR	Total amount in EUR	Community funding requested	
5.1 Determination of genotype of animals in the framework of the monitoring and eradication measures laid down by Regulation (EC) No 999/2001 (as referred to in point 4.6.6 and 4.7.2.2)	genotyping	100	6	600	yes	<b>X</b>
				<b>Add a new row</b>		
Costs related to	Specification	Number of units	Unitary cost in EUR	Total amount in EUR	Community funding requested	
5.2 Determination of genotype of animals in the framework of a breeding programme (as referred to in point 4.7.3.2)	Genotyping	100	6	600	yes	<b>X</b>
				<b>Add a new row</b>		
6. Compulsory culling/slaughter						
Costs related to	Specification	Number of units	Unitary cost in EUR	Total amount in EUR	Community funding requested	
6.1 Compensation for bovine animals to be culled and destroyed under the requirements of Annex VII, Chapter B, point 2.1 of Regulation (EC) No 999/2001 (as referred to in point 4.7.12)	N/A	0	0	0	no	<b>X</b>
				<b>Add a new row</b>		

## Standard requirements for the submission of programmes of eradication and monitoring of TSE

Costs related to	Specification	Number of units	Unitary cost in EUR	Total amount in EUR	Community funding requested	
6.2 Compensation for ovine and caprine animals to be culled and destroyed under the requirements of Annex VII, Chapter B, point 2.2.2 of Regulation (EC) No 999/2001 (as referred to in point 4722)	N/A	0	0	0	no	<b>X</b>
				<b>Add a new row</b>		
6.3 Compensation for ovine and caprine animals to be sent for compulsory slaughter in application of the provisions of Annex VII, Chapter B, point 2.2.2 (b) and (c) of Regulation (EC) No 999/2001 (as referred to in point 4722)	N/A	0	0	0	no	<b>X</b>
				<b>Add a new row</b>		
<b>Total</b>				68 090,00 €

<b>Total</b>				68 090,00 €		

### 5.3 Co-financing rate:

The maximum co-financing rate is in general fixed at 50%. However based on provisions of Article 5.2 and 5.3 of the Common Financial Framework, we request that the co-financing rate for the reimbursement of the eligible costs would be increased:

- Up to 75% for the measures detailed below
- Up to 100% for the measures detailed below
- Not applicable

## Standard requirements for the submission of programmes of eradication and monitoring of TSE

*Please explain for which measures and why co-financing rate should be increased (max 32000 characters)*

The co-financing rate should be up to 100% for the measures detailed above in order to avoid human casualties or major economic disruptions for the Union as a whole.

### 5.4 Source of national funding

*Please specify the source of the national funding:*

- public funds*
- food business operators participation*
- other*

*Please provide details on the source of national funding (max 32000 characters)*

The TSE sampling and testing is funded from the national budget.
