SUMMARY REPORT

B.01 Exchange of views and possible opinion of the Committee on a draft Commission Implementing Regulation laying down rules for the application of Regulations (EU) 2016/429, (EU) 2016/1012 and (EU) 2019/6 of the European Parliament and of the Council with regard to the identification and registration of equine animals and establishing model identification documents for those animals.

The Commission presented the draft as revised following comments received from 60 stakeholders during public consultation and 14 Member States after discussion in the February PAFF Committee meeting. During the discussion, several Member States either took the floor or included comments in the chat. Questions have been answered and suggestions for improvement of the text noted for the final revision.

Outcome of the vote by written consultation: Favourable opinion.

C.01 Exchange of views of the Committee on a draft Commission Implementing Regulation amending Implementing Regulation (EU) 2017/717 as regards the model forms of zootechnical certificates for breeding animals and their germinal products.

The Commission presented draft Implementing Regulation amending Commission Implementing Regulation (EU) 2017/717. Those amendments result from discussions with Member States and stakeholders on the implementation of model forms of zootechnical certificates. The purpose of the amendments is to describe the format of the information in the zootechnical certificate on the results of tests carried out to verify the identity of certain purebred breeding animals. The draft Implementing Regulation proposes that either the details or the case number referring to the database where the details are available should be provided in a zootechnical certificate, in the box corresponding to results of the verification of the identity of breeding animals. The Commission requested Member States to provide comments to the presented document by 29 March 2021.
